Proven Remedies:

Collecting Recipes Lennart Lehmhaus, Matteo Martelli, 2017-09-25 With a clear comparative approach this volume brings together for the first time contributions that cover different periods of the history of ancient pharmacology from Greek Byzantine and Syriac medicine to the Rabbinic Talmudic medical discourses This collection opens up new synchronic and diachronic perspectives in the study of the ancient traditions of recipe books and medical collections Besides the highly influential Galenic tradition the contributions will focus on less studied Byzantine and Syriac sources as well as on the Talmudic tradition which has never been systematically investigated in relation to medicine This inquiry will highlight the overwhelming mass of information about drugs and remedies which accumulated over the centuries and was disseminated in a variety of texts belonging to distinct cultural milieus Through a close analysis of some relevant case studies this volume will trace some paths of this transmission and transformation of pharmacological knowledge across cultural and linguistic boundaries by pointing to the variety of disciplines and areas of expertise involved in the process *The Hahnemannian Monthly*, 1891 **Mother's Remedies** Thomas Jefferson Ritter, 1916 Unproven Medical Treatments Lure Elderly Kristine M. Napier, 1994 *Ellingwood's Therapeutist*, 1915 Peasant Remedies For Sinus Infections, *The Hahnemannian Advocate* H W Pierson, 1902 **Transactions** Homoeopathic Medical Society of the State of New York, 1882 The Critique, 1904 In the Wake of the Compendia J. Cale Johnson, 2015-11-13 In the Wake of the Compendia presents papers that examine the history of technical compendia as they moved between institutions and societies in ancient and medieval Mesopotamia This volume offers new perspectives on the development and transmission of technical compilations looking especially at the relationship between empirical knowledge and textual transmission in early scientific thinking The eleven contributions to the volume derive from a panel held at the American Oriental Society in 2013 and cover more than three millennia of historical development ranging from Babylonian medicine and astronomy to the persistence of Mesopotamian lore in Syriac and Arabic meditations on the properties of animals The volume also includes major contributions on the history of Mesopotamian rationality epistemic labels for tested and tried remedies and the development of depersonalized case histories in Babylonian therapeutic compendia Together these studies offer an overview of several important moments in the development of non Western scientific thinking and a significant contribution to our understanding of how traditions of technical knowledge were produced and transmitted in the ancient world **St. Louis Journal of Homeopathy and Clinical Reporter**, 1888 *The Healing Enigma* Vinton McCabe, 2007-01-01 In his twenty five years as a homoeopathic lecturer Vinton McCabe has taught thousands of medical professionals and laypersons alike both the philosophy and practice of homoeopathic medicine Through his books on the subject he has reached many more giving his readers both the tenets of homoeopathy as put forth originally by Samuel Hahnemann more than two hundred years ago and his own unique viewpoint on the subject of homoeopathic healing With *The Healing Enigma* McCabe makes use of his full
