West, 1996-12 During the last Ice Age a thousand mile wide land bridge connected Siberia and Alaska creating the region known as Beringia Over twelve thousand years ago a procession of large mammals and the humans who hunted them crossed this bridge to America Much of the Russian evidence for this migration has until now remained largely inaccessible to American scholars American Beginnings brings together for the first time in one volume the most up to date archaeological and palaeoecological evidence on Beringia from both Russia and America An invaluable resource It will no doubt remain the key reference book for Beringia for many years to come Steven Mithen *Journal of Human Evolution* Extraordinary The fifty six contributors represent the most prominent American and Russian researchers in the region Choice Publication of this well illustrated compendium is a great service to early American and especially Siberian Upper Paleolithic archaeology Nicholas Saunders *New Scientist* This is a great book perhaps the greatest contribution to the archaeology of Beringia that has yet been published This is the kind of book to which archaeology should aspire Herbert D G Maschner *Antiquity* [Archaeology in America](#) Linda S. Cordell, Kent Lightfoot, Francis McManamon, George Milner, 2008-12-30 The greatness of America is right under our feet The American past the people battles industry and homes can be found not only in libraries and museums but also in hundreds of archaeological sites that scientists investigate with great care These sites are not in distant lands accessible only by research scientists but nearby almost every locale possesses a parcel of land worthy of archaeological exploration Archaeology in America is the first resource that provides students researchers and anyone interested in their local history with a survey of the most important archaeological discoveries in North America Leading scholars most with an intimate knowledge of the area have written in depth essays on over 300 of the most important archaeological sites that explain the importance of the site the history of the people who left the artifacts and the nature of the ongoing research Archaeology in America divides its coverage into 8 regions the Arctic and Subarctic the Great Basin and Plateau the Great Plains and Rocky Mountains the Midwest the Northeast the Southeast the Southwest and the West Coast Each entry provides readers with an accessible overview of the

archaeological site as well as books and articles for further research *Batza Tena, Trail to Obsidian* Donald Woodforde Clark, Annette McFadyen Clark, 1993-01-01 This volume reports on the findings from the extensive archaeological surveys and excavations in the Batza T na area Alaska's most important source of obsidian Published in English **Human Ecology of Beringia** John F. Hoffecker, Scott A. Elias, 2007 Twenty five thousand years ago sea level fell more than 400 feet below its present position as a consequence of the growth of immense ice sheets in the Northern Hemisphere A dry plain stretching 1 000 miles from the Arctic Ocean to the Aleutians became exposed between northeast Asia and Alaska and across that plain most likely walked the first people of the New World This book describes what is known about these people and the now partly submerged land named Beringia which they settled during the final millennia of the Ice Age Humans first occupied Beringia during a twilight period when rising sea levels had not yet caught up with warming climates Although the land bridge between northeast Asia and Alaska was still present warmer and wetter climates were rapidly transforming the Beringian steppe into shrub tundra This volume synthesizes current research some previously unpublished on the archaeological sites and rapidly changing climates and biota of the period suggesting that the absence of woody shrubs to help fire bone fuel may have been the barrier to earlier settlement and that from the outset the Beringians developed a postglacial economy similar to that of later northern interior peoples The book opens with a review of current research and the major problems and debates regarding the environment and archaeology of Beringia It then describes Beringian environments and the controversies surrounding their interpretation traces the evolving adaptations of early humans to the cold environments of northern Eurasia which set the stage for the settlement of Beringia and provides a detailed account of the archaeological record in three chapters each of which is focused on a specific slice of time between 15 000 and 11 500 years ago In conclusion the authors present an interpretive summary of the human ecology of Beringia and discuss its relationship to the wider problem of the peopling of the New World
