Quaker Experiences In International Conciliation:

Quaker Experiences in International Conciliation C. H. Mike Yarrow, 1978-01-01 As far back as the early 1900s the Quakers have been engaged in a program of quiet private diplomacy that won them a Nobel Peace Prize in 1947 During the turbulent 1960s they acted as unofficial conciliators in several tense situations This comprehensive study of Quaker peace making activities focuses primarily on the variety and effectiveness of their efforts in Berlin from 1960 to 1973 in India Pakistan in 1965 and in Nigeria from 1967 to 1970 Quaker Experiences in International Conciliation C. H. Mike Yarrow, 1978 *Mediation in International Relations* J. Bercovitch, J. Rubin, 1994-01-13 This collection of articles examines mediation in a range of situations including international relations informal mediation by private individuals and by scholars and practitioners as well as the superpowers as mediators *International Conflict Mediation* Jacob Bercovitch, Scott Sigmund Gartner, 2008-12-10 This book examines how new empirical approaches to mediation can shed fresh light on the effectiveness of different patterns of conflict management and offers guidelines on the process of international mediation International conflict mediation has become one of if not the most prominent and important conflict resolution methods of the early 21st century This book argues that traditional approaches to mediation have been inadequate and that in order to really understand how the process of international mediation works studies need to operate within an explicit theoretical framework adopt systematic empirical approaches and use a diversity of methods to identify critical interactions contexts and relationships This volume captures recent important changes in the field of international conflict mediation and includes essays by leading scholars on a variety of critical aspects of conflict management using state of the art analytical tools and up to date data This book will of great interest to scholars of peace and conflict studies methods in social science and of International Relations in general **The contribution of NGOs to international conflict resolution** Tilman Pradt, 2014-04-11 Non governmental organisations NGOs have become important actors in the globalised world They run aid and relief programmes in the poorest countries support international institutions like the United Nations or are watchdogs of them for example watchdogs of the Bretton Woods institutions In doing so NGOs naturally work permanently with state agencies and it is probably hard to find an NGO which is totally free of any governmental support in financial logistical or informative matters Thus there are strong NGO government connections on a daily work basis NGOs run multiple attempts to contribute to the resolution of conflicts on all political levels They bring together people on the grass root level they try to influence high officials through public pressure and they organise conferences and discussions with members and consultants of the concerned parties The latter approach is analysed in this study But how do NGOs influence the level of official international relations To which degree can NGOs improve the relations of two conflicted parties especially when the conflict is protracted and severe The aim of this study is to define the preconditions of successful NGO mediation to measure the NGO influence as an antecedent condition for successful mediation and to exhibit its limits The underlying assumption is

that conflict resolution is more likely if NGO mediation supports this attempt This approach can be labelled as an assumption of constant effect since the focus is on understanding the NGOs influence on international conflict resolution Three cases of NGO led mediation attempts are analysed The cases are selected because of their problematic official relations are chosen under criteria of comparability Thus they have similar conditions framework in common namely in matters of time territory and main actors The case studies analysed are seated in the Middle East because negotiations between Israel and Palestine were and still are highly conflicted protracted and many mediation attempts by third parties have taken place there The analysis of these three cases their differences and similarities shall lead to a better general understanding of the possibilities and limits of NGOs and the necessary preconditions *International Relations* Margot Light,A.J.R. Groom,2016-10-06

International Relations offers a guide to the state of International Relations theory during the Cold War It provides a critical commentary on the literature of the time and covers all aspects of this discipline in detail *Social Determinants of Health in Europe* Adrian Bonner,2024-12-18 Drawing on the perspectives of women and children displaced from Ukraine as well as local authority policy makers and service providers this book provides a unique view of the direct and indirect consequences of war in Europe Part of the Social Determinants of Health series this book reviews the socioeconomic challenges faced by the UK and other European countries and suggests ways that these wicked issues should be addressed It is essential reading for local authorities national governments and humanitarian organisations

The Multiple Realities of International Mediation Marieke Kleiboer,1998 Recent experiences have demonstrated once again the complexities of brokering an end to deep rooted ethnic and international conflicts as well as the difficulties of evaluating the outcomes of third party interventions Addressing these issues this book offers a sophisticated approach to assessing mediation efforts and to reconstructing and interpreting mediation processes **Peacemaking in International Conflict** I. William Zartman,2007

This updated and expanded edition of the highly popular volume originally published in 1997 describes the tools and skills of peacemaking that are currently available and critically assesses their usefulness and limitations **Theory and Practice of International Mediation** Jacob Bercovitch,2011-01-05 This volume brings together some of the most significant papers on international conflict mediation by Professor Jacob Bercovitch one of the leading scholars in the field It has become common practice to note that mediation has been and remains one of the most important structures of dealing with and resolving social conflicts Irrespective of the level of political or social organization of their location in time and space and of the political sophistication of a society mediation has always been there to help deal with conflicts As a method of conflict management the practice of settling disputes through intermediaries has had a rich history in all cultures both Western and non Western In some non Western countries especially in the Middle East and China mediation has been the most important and enduring structure of conflict resolution Jacob Bercovitch has been at the forefront of developments in international conflict mediation for more than 25 years and is generally recognized as one of the most important scholars in the field His

theoretical and empirical analyses have come to define the parameters in the study of mediation This volume will help scholars and practitioners trace the history of the field its position today and its future and will be of much interest to all students of mediation negotiation conflict management international security and international relations in general
