Quality Schooling:

Leadership for Quality Schooling Colin W. Evers, Kam-cheung Wong, 2013-04-15 *Leadership for Quality Schooling* provides the latest thinking and research on school leadership from a range of international scholars in the field of educational administration. Because of the growing acceptance of school based models of school management there is now developing a greater focus on how quality education can be more fully achieved in this increasingly commonplace administrative context. Since one major aspect of promoting quality is the role of school leadership this book offers a particular focus on the question of the connection between leadership and school improvement effectiveness and performance. *Leadership for Quality Schooling* will be of interest to educational practitioners, students, researchers, academics and policymakers. It is intended as a guide to the latest research on leadership as well as a stimulus to further thought for those looking for alternative ideas to existing practices. **Quality Education** Anthony Patrick Carnevale, 1994 **Quality School** William Glasser, M.D., 2010-11-16 Glasser recommends non coercive methods developed in Japan to help students to see the value of education and to strive for quality in their schoolwork. **Quality education** Muchativugwa L. Hove, Martha Matashu, 2021-11-30 This book investigates the intersections between education, social justice, gendered violence and human rights in South African schools and universities. The rich and multifarious tapestry of scholarship and literature emanating from South African classrooms provides a fascinating lens through which we can understand the complex consequences of the economies of education, social justice imperatives, gendered violence in the lives of women and children and marginalised communities. The scholarship in the book challenges readers to imagine alternative futures predicated on the transformational capacity of a democratic South Africa. Contributors to this volume examine the many ways in which social justice and gendered violence mirror, express, project and articulate the larger phenomenon of human rights violations in Africa and how in turn the discourse of human rights informs the ways in which we articulate, interrogate, conceptualise, enact and interpret quality education. The book also wrestles with the linguistic contradictions and ambiguities in the articulation of quality education in public and private spaces. This book is essential reading for scholars seeking a solid grounding in exploring quality education, the instances of epistemic disobedience, the political implications of place and power and human rights in theory and practice. **Quality School Education** Marlow Ediger, 2010 School education across the world has gained special significance as it makes its students acquire adequate knowledge in various disciplines and decide the future course of action in education. Several individual and national and international professional organisations are suggesting various measures to enhance the status of school education in all its dimensions. This book on quality in school education discusses many things to be taken care of, to be worked out and to be implemented. This work will be of great use to all the people concerned to and personnel involved in school education. **Studies on the educational quality of schools** Manfred Prenzel, The priority program 'The educational quality of schools' has been established seven years ago by the

German Research Foundation DFG The projects in this program investigated conditions inside and outside of school and their impact on the development of mathematical scientific and cross curricular competencies In this book major findings of the program are presented The projects not only give an overview of their research questioning methods and findings but also of approaches and materials that have been developed to support learning and teaching in mathematics and science class rooms The studies reported here identify factors for weaknesses in the educational outcomes that became apparent in the international comparisons like TIMSS and PISA The projects however provide empirically substantiated units on approaches that can help to improve the educational quality of schools Publisher ed Quality and Equity in Education Michael Byram, Mike Fleming, Joseph Sheils, 2023-02-15 The work of the Council of Europe in plurilingual and intercultural education is highly influential in Europe and beyond and has been so for many years The Common European Framework of Reference and its Companion Volume and related instruments provide ways in which to implement policies and a broader vision of providing quality and equity in education across the curriculum a vision which incorporates the core values of the Council of Europe and which educates children and young people to be plurilingual intercultural and democratic citizens This book presents this educational vision demonstrates how it can be realised through the application of Council of Europe instruments in practice and does so in a way which is easily and quickly accessible to teachers of all subjects and in all educational institutions as well as to other educationists including policymakers

Decentralization for high-quality education F. Henry Healey, Luis Crouch, 2012-08-29 As developing countries seek to improve the quality of their education systems one approach they are considering is decentralization But transforming a centralized system into one that is decentralized and high quality is a complex undertaking one that requires among other things a coherent design This report details an approach for creating a viable design for a high quality decentralized education system an approach that is premised on sound principles such as economies of scale speed of transaction and customer satisfaction and which has effective schools as the focal point of the method *Quality Education for Latinos and Latinas* Rita Portales, Marco Portales, 2010-01-01 As educators and legislators across the country debate how to improve public schools the most vital factor often disappears from the equation the relationship between the teacher and the student According to veteran educators Rita and Marco Portales this relationship is the central issue in the education of students especially Latino a students who often face serious barriers to school success because of the legacy of racism insufficient English language skills and cultural differences with the educational establishment To break down these barriers and help Latino a students acquire a quality education the Portaleses focus attention on the teacher student relationship and offer a proven method that teachers can use to strengthen the print and oral skills of their students They begin by analyzing the reasons why schools too often fail to educate Latino a students using eloquent comments from young Latinos as and their parents to confirm how important the teacher student relationship is to the student s success Then they show how all educational stakeholders
