Quality Ellen Earle Chaffe, Lawrence A. Sherr, 1992-04-14 A look at TQM and higher education *The Quality Management Sourcebook* Christine Avery, Diane Zabel, 2002-09-11 The concept of Quality Management began in the manufacturing sector but a growing concern with quality in other areas of the economy has led to its wider application in service industries government education and other not for profit agencies A great quantity of material related to quality management has been produced in recent years much of it by small presses professional and trade associations and consultants The Quality Management Sourcebook is the first in depth international guide to the most useful material and sources of information The book begins with the origins of quality management explains how it evolved examines its current situation and explores the future The book is divided into five main sections Introduction General sources for information Applications of total quality management Focus on specific aspects of quality management Quality in the future Resource materials The Quality Management Sourcebook is an essential reference for everybody involved in either the theory or practice of quality management in manufacturing retail banking and insurance the utilities industry the transportation industry health education and other public services Over 900 citations cover books journal articles technical reports video training materials and software Each is followed by a descriptive annotation Resource materials include strategies for locating additional information training materials organizations and consultants The book concludes with a glossary of quality management terms a name index a title index and a detailed subject index **Catalog of ERIC Clearinghouse Publications** ,1997 **Managing for Quality in Higher Education** , **Resources in Education** ,2001-10 *The ERIC Review* ,1991 Provides information on programs research publications and services of ERIC as well as critical and current education information **Leading the eLearning Transformation of Higher Education** Gary E. Miller, Kathleen S. Ives, 2023-07-03 Published in Association with eLearning has entered the mainstream of higher education as an agent of strategic change This transformation requires eLearning leaders to develop the skills to innovate successfully at a time of heightened competition and rapid technological change In this environment eLearning leaders must act within their institutions as much more than technology managers and assume the prime role of helping their institutions understand the opportunities that eLearning presents for faculty for students and for client organizations in the community They need to prepare to participate in policy development around these opportunities They must understand the multiple dimensions of practice in the field operations administration and working within the complex culture of a higher education institution while also functioning as scholars of the field who can bring the best ideas from other institutions to help shape policy around eLearning The second edition builds on the success of the first edition and presents both the collective expertise of veterans who have pioneered the field for 20 years and of a rising generation of eLearning leaders that are transforming online programs at their own institutions to address these challenges This edition has been updated and expanded to reflect the

increasing complexity of the field with seven new chapters and the revision of eight chapters that appeared in the first edition New and updated topics include The evolving role of the chief online learning officer Issues of diversity as more women and minorities enter leadership roles in the field The increasing role of learning analytics and data based decisions The potential tensions involved in cohort based versus individualized instruction The increasing need for faculty professional development The affordances of cloud computing adaptive learning artificial intelligence the internet of things and mobile learning to the field The open educational resources movement and the implications for institutional policy and practice The challenges of an increasingly complex competitive environment Accessibility There are few comparable positions in higher education than that of eLearning leaders who work across multiple academic and support units and whose work fundamentally affects the institution as a whole This volume is written for them *Quality Assurance and Institutional Transformation* Shuiyun Liu, 2016-05-03 This book illustrates the higher education quality assurance system and its impact on institutional transformation in China It starts by describing the higher education system in China and its quality assessment schemes It discusses in detail the Quality Assessment of Undergraduate Education QAUE and the Subject Evaluation two of the most influential external quality assessment schemes which are conducted on the institutional and subject levels respectively In the second part of this book QAUE is taken as an example for the impact analysis Using case studies it explores the impact of the QAUE on various dimensions of quality provisions in universities with different statuses and presents the views of various stakeholders Based on the empirical findings from the Chinese schemes and the theories on organizational change and the mechanism of external quality assessment it proposes a model to describe how quality assessment interacts with the evaluated universities and causes them to change **Quality Management for the Post-secondary Classroom** Herschel Purdue, 1997 Strategic Transformation of Higher Education Stewart E. Sutin, W. James Jacob, 2016-09-23 Strategic Transformation of Higher Education examines the broken revenue driven business model characteristic of higher education in an environment that demands greater access more affordable tuition accountable leaders and faculty who deliver a consistently high quality of relevant education The authors demonstrate that enduring business models must support institutional academic missions and that they are integral to systemic and strategic transformation by diagnosing the case for change and offering a practitioners guide for reform This book surveys deficient government education policies practices and funding formulas of select countries and offers remedies It identifies impediments to change along with ways to develop and deliver evidence based solutions to improve institutional effectiveness and operating efficiencies and it cites exemplars of change in these areas Special attention is given to leadership attributes requisite of driving institutional redesign and to a paradigm shift that calls for transition from knowledge creation to plan implementation Strategic Transformation of Higher Education emphasizes a collective need for reflection a will to consistently question prevailing assumptions and the courage to afford practical application to innovation
