Research in Education, 1974 **Engineering Education and Management** Liangchi Zhang, Chunliang Zhang, 2011-11-25 This is the proceedings of the selected papers presented at 2011 International Conference on Engineering Education and Management ICEEM2011 held in Guangzhou China during November 18-20, 2011. ICEEM2011 is one of the most important conferences in the field of Engineering Education and Management and is co-organized by Guangzhou University, The University of New South Wales, Zhejiang University and Xi'an Jiaotong University. The conference aims to provide a high-level international forum for scientists, engineers, and students to present their new advances and research results in the field of Engineering Education and Management. This volume comprises 122 papers selected from over 400 papers originally submitted by universities and industrial concerns all over the world. The papers specifically cover the topics of Management Science and Engineering, Engineering Education and Training, Project Engineering, Management, and Other related topics. All of the papers were peer-reviewed by selected experts. The papers have been selected for this volume because of their quality and their relevancy to the topic. This volume will provide readers with a broad overview of the latest advances in the field of Engineering Education and Management. It will also constitute a valuable reference work for researchers in the fields of Engineering Education and Management.

New Approaches to the Investigation of Language Teaching and Literature Garcés-Manzanera, Aitor, Carrillo García, María Encarnación, 2023-04-11 In the last two decades the field of language and literature teaching has experienced considerable growth as a result of the wide array of new methodological avenues that have arisen from different angles. This paradigm shift has paved the way for the integration of newly conceived didactic resources such as the mediation of social networks for learning language or the interdisciplinarity of culturally mediated language education. It is crucial to understand this shift in order to ensure students receive the best education possible. New Approaches to the Investigation of Language Teaching and Literature presents an overview of the ongoing methodological tools, practices, research designs, and strategies used in language and literature teaching and provides education researchers and practitioners with empirically sustained evidence of teaching strategies that may be implemented in language education. Covering key topics such as language skills, adult learners, digital literacy, and learning aids, this reference work is ideal for researchers, scholars, academicians, practitioners, educators, and students.

The Palgrave Handbook of Teaching and Research in Political Science Charity Butcher, Tavishi Bhasin, Elizabeth Gordon, Maia Carter Hallward, 2023-11-28 This book provides a resource for political science faculty wanting to increase their research productivity and/or teaching effectiveness in a time- and resource-efficient way. Faculty from various subfields and institution types offer examples of how they align their research and teaching activities to get more bang for their buck. While some contributors discuss projects within the Scholarship of Teaching and Learning (SoTL) research tradition, others go beyond this approach and integrate their teaching and research in other ways. As a result, this volume offers diverse innovative and

practical ways faculty can leverage the teaching scholarship connection to both improve scholarly productivity and ground political science instruction in pedagogical literature **Teacher Action Research** Gerald J.
