Quantum Leap Beginnings:

VIRTUAL GOD / THE BEGINNING (2017) Aydın Türkgücü, 2017-09-18 VIRTUAL GOD THE BEGINNING It is not God It is God like You must have read news claiming Artificial Intelligence would take away our jobs marriages with robots would start and it would bring the end of humankind What do we know about this doomsday machine which is believed to take over our businesses first then our spouses and finally bring an end to humanity How will the consciousness that would empower the robots to act on their own be insufflated to them Will this doomsday machine do all these without the knowledge and authorization of the Creator who claims to be the God of all times and creator of everything How will the religions be affected Will Virtual God destroy faith or will it renew it We have been so sure that we were not living in a dream and everything was real for millions of years that we kept asking the questions Where did we come from and why which could take us nowhere We never thought of asking the principal questions I have been asking Where do we live in and how do we know this which brought me nominations for the Nobel Peace Prize in 2015 2017 When the border between virtual reality and reality disappears soon we will be forced to ask Which one is real which one is virtual Which one is human which one is divine You can be sure that your perspective on yourself your partner your work your environment and your experiences will change forever once you start living in a world where you can never be sure of its reality Virtual God is the name of the artificial intelligence based universe machine created by humans enabling them to live in virtual illusionary universes and it is like the God of those virtual universes I describe the Holistic Peace stage as the discovery of God within ourselves by making use of the advancements in technology I tried to explain it most simply through the love story that Ata and Maya characters will live in the future This book seats you in front of your Ark of the Covenant and invites you to be an Inheritor to the Book It is written by examining the Holy Books and the old information to calm down deep concerns that will arise in the Paradox of God stage of the Golden Age of Knowledge we entered in 2014 AYDIN T RKG C Knowledge Golden Age AI VR Virtual Holistic Holly Personell Eden Hell Robot Artificial Holographic Dimension Time Human History Space Mental tools social political name limits unlocked Love Religion exit God Aliens Beginning Brain love virtualgod galactic quantum quantumleap leap dream araf logos NASA ISS rules Space_Station Science prize peace culture gravity blackhole time timetravel blackmatter holly book hollybooks verses prophet eden eve adam philosophy **After the Beginning** Anthony L. Edridge, 2012-06 A new and inspiring view of creation and the Flood After the Beginning offers compelling insight about God's purpose for an eternal loving relationship with mankind that was made in His image This theme is revealed in Genesis with the creation of Adam and Eve with the animals named by Adam and with the animals that were saved on the ark From creation through the Flood Dr Edridge concludes that the creatures described in Genesis had emotional capability such as mammals and birds Further consideration of species that should be included in the creation narrative leads to agreement between the biblical sequence of creation and the scientific chronology of the fossil record and the early stages of the Earth's development Dr

Edridge examines different flood models to determine if they are consistent with biblical parameters and scientific scrutiny. Based on documented flood records and geological events he proposes a new catastrophic Flood Model that meets both qualitative and quantitative requirements for the most likely flooded area the cradle of civilization. This model is unique providing a viable mechanism that caused the Flood to subside but which agrees with the biblical description. **The Time of Life** William McNeill, 2012-02-01. The Time of Life explores Heidegger's rethinking of ethics and of the ethical in terms of an understanding of the original Greek notion of *thos*. Engaging the ethical in Heidegger's thought in relation to Aristotle, Michel Foucault, and Friedrich Hölderlin. William McNeill examines the way in which Heidegger's thought shifts our understanding of ethics away from a set of theoretically constructed norms, principles, or rules governing practice toward an understanding of the ethical as our concrete way of Being in the world. Central to this study is the consideration of the ethical in relation to time: the time of biological life, the time of human life as biographical and historical, the temporality of human action, and the historicity of human thought. In addition, this book critically examines the predicament of ethical responsibility in a scientific technological era, considering how the world of modern science and technology call upon us to rethink the nature of ethical responsibilities. **A Permanent Beginning** Yitzhak Lewis, 2020-03-01. Situates a Hasidic master in the context of his time, demonstrating his formative influence on Jewish literary modernity. The Hasidic leader R. Nachman of Braslav (1772-1810) has held a place in the Jewish popular imagination for more than two centuries. Some see him as the self-proclaimed Messiah, others as the forerunner of modern Jewish literature. Existing studies struggle between these dueling readings, largely ignoring questions of aesthetics and politics in his work. *A Permanent Beginning* lays out a new paradigm for understanding R. Nachman's thought and writing, and with them the beginnings of Jewish literary modernity. Yitzhak Lewis examines the connections between imperial modernization processes in Eastern Europe at the turn of the eighteenth century and the emergence of modern literature in the storytelling of R. Nachman. Reading his tales and teachings alongside the social, legal, and intellectual history of the time, the book's guiding question is literary: How does R. Nachman represent this changing environment in his writing? Lewis paints a nuanced and fascinating portrait of a literary thinker and creative genius at the very moment his world was evolving unrecognizably. He argues compellingly that R. Nachman's narrative response to his changing world was a major point of departure for Jewish literary modernity. This is a groundbreaking study. There can be no doubt that it will constitute a basic work for understanding the theology and stories of R. Nachman, modern Judaism, and modern literature in general. Jonatan Meir, author of *Literary Hasidism: The Life and Works of Michael Levi Rodkinson*. This book is a rare intellectual achievement. Lewis addresses the question of Hasidism's modernity by analyzing key issues in the study of R. Nachman, such as the question of his Messianity. His answers are thought-provoking and convincing, and his exciting book dramatically extends our understanding of the challenges posed by R. Nachman's tales and mystical texts. Hannan Hever, Yale University. The Beginnings of Christianity Paul Wernle, 1903. *Heidegger's*

Possibility Kenneth Maly, 2008-01-01 Heidegger's *Possibility* focuses on issues of language and translation which are both important formative aspects of Heidegger's work and which place his thought and writing processes in perspective

Towards an Epistemology of Ruptures Arun Iyer, 2014-01-23 By systematically uncovering and comprehensively examining the epistemological implications of Heidegger's history of being and Foucault's archaeology of discursive formations *Towards an Epistemology of Ruptures* shows how Heidegger and Foucault significantly expand the notions of knowledge and thought This is done by

tracing their path breaking responses to the question What is the object of thought The book shows how for both thinkers thought is not just the act by which the object is represented in an idea and knowledge not just a state of the mind of the individual subject corresponding to the object Each thinker in his own way argues that thought is a productive event in which the subject and the object gain their respective identity and knowledge is the opening up of a space in which the subject and object can encounter each other and in which true and false statements about an object become possible They thereby lay the ground for a new conceptual framework for rethinking the very relationship between knowledge and its object
