Reconstructing Education Towards A Pedagogy Of Critical Humanism:

Reconstructing Education Greta Hofmann Nemiroff, 1992-01-01 **Reconstructing Education** Greta Hofmann Nemiroff, 1992-05-30 Drawing on elements of progressive education existential theory feminist pedagogy and values education critical humanism combines the holistic psychological concerns of humanistic education with the sociopolitical contextualization of critical pedagogy Developed over the past seventeen years in one of North America's most experimental postsecondary programs The New School of Dawson College this theory and practice responds to both the personal and the political needs of students *Reconstructing Education* is at once a review of this century's educational theories an account of the work at the school and an empowering illustration of the way in which schools can incite the motivation of students and encourage them to become active members in a truly democratic society The case study chapters on The New School give concrete examples of how this philosophy is manifested in the school's methodology structure and pedagogy and draws heavily on the written work of teachers and students To formulate a similar approach for a specific school it is essential to combine a rigorous analysis of existing educational models with the dialectical process of creating and recreating a new model defined by the articulation of both learners and teachers affective cognitive and socially constructed needs This is a valuable book for anyone concerned with alternative approaches to education and for courses on educational theory or the philosophy of education *The Radicalization of Pedagogy* Simon Springer, Marcelo Lopes de Souza, Richard J. White, 2016-05-27 How do activists learn radical politics Does the increasing neoliberalisation of education limit the possibilities of transgressive pedagogies And in what contexts have anarchist geographers successfully shaped alternative pedagogic practices Pedagogy is central to geographical knowledge and represents one of the key sites of contact where anarchist approaches can inform and revitalize contemporary geographical thought This book looks at how anarchist geographers have shaped pedagogies that move towards bottom up organic transformations of societies spaces subjectivities and modes of organizing where the importance of direct action and prefigurative politics take precedence over concerns about the state Examining contemporary and historical case studies across the world from formal and informal contexts the chapters show the potential for new imaginaries of anarchist geographies that will challenge and inspire geographers to travel beyond the traditional frontiers of geographical knowledge *The SAGE Encyclopedia of Qualitative Research Methods* Lisa M. Teaching for Democracy in an Age of Economic Disparity Cory Wright-Maley,Trent Davis,2016-07-01 Teaching for Democracy in an Age of Economic Disparity addresses the intersections between democratic education and economic inequality in American society Drawing upon well established theoretical constructs in the literature on democratic citizenship as well as recent events this volume outlines the ways in which students can not only be educated about democracy but become actively engaged in the social issues of their time The collection begins with an examination of how the confluence of capitalism and education have problematized the current model of democratic education before transitioning into discussions of how teachers can confront economic disparity both economically and civically in the classroom The authors then introduce a variety of ways in which teachers can engage and empower students civic action at all grade levels As a final component the volume explores new avenues for civic action including the use of social media for democratic engagement in schools and opportunities for critical reflection and cross cultural dialogue This book is a valuable resource for both scholars interested in the research on democratic education and practicing teachers wishing to turn their students into critical active citizens

Challenges of Multicultural Education Norah Peters-Davis, Jeffrey Shultz, 2015-12-03 The voices of college students and teachers vividly enlighten readers about the real world challenges of multicultural education Courses on diversity abound in American universities today But open classroom discussion of racial and gender differences can evoke discomfort as much as new understandings Negotiating these courses takes a toll on both faculty and students as classrooms become filled with emotion Based on student and teacher experience in a range of American colleges and universities this book shows how to meet these challenges and create a truly open and beneficial environment The authors demonstrate pedagogical strategies and new approaches A vital resource for teachers students college administrators and university libraries Contents Introduction Dialogue on Diversity Teaching From Silence and Resistance to Tongues Untied The Racial Experiment Starting with a Story and Sharing the Discussion Leading Irritating Supporting Representing Identity Matters in Class What Lies Beneath Conclusion Democratic Leadership in Education Philip Woods, 2005-10-03 This is an important book for anyone who is serious about introducing or sustaining democratic leadership in schools Busy practitioners will get much from it by going straight to the chapters about how democratic leadership could be made to work Kate Myers Times Educational Supplement I found this an interesting and stimulating book The book's ideas are a useful counterpoint to some of the daft notions of macho leadership and management being peddled in education and indeed the public sector more widely Woods book has the merits that though radical it seeks to base its recommendations in the real world and to argue that there are possibilities for change that can bring about real improvements in everyone's experience and outcomes Matching the rhetoric of democracy with reality or at least making them closer might also improve the quality of our political process and hence increase interest and reduce cynicism about politics something which surely should be welcomed Woods agenda is significant and his book certainly worth reading ESCalate Philip Woods productively refocuses our attention not on heroes and visions but on how we understand and practise within educational institutions in ways that are social and relational He provides a realistic and yet challenging analysis of democratic leadership in ways that speak to practitioners policy makers and researchers We deal everyday with issues of social justice and Philip Woods shows us how we might think differently about it and so work for a better system of learning and schooling Professor Helen Gunter School of Education University of Manchester Not another bunny but a welcome academic fox Kevin Avison Steiner Waldorf Schools Fellowship The theory and practice of democracy and democratic leadership have implications for how we understand what ought to be counted as improving schools In this book the author focuses on the idea of democratic leadership He examines what is meant by democratic leadership and what forms it can take and shows how it is relevant to school education and learning The author shows how the ideals and theories of democratic leadership can translate into practice and sets out some of the challenges that democratic leadership poses in the context of contemporary education This book challenges many of the assumptions

inherent in educational policy and conventional approaches to leadership It is about understanding and exploring both the idea of democratic leadership and its practical relevance through examples drawn from practice and research This book is for practitioners and students on professional development and academic courses It will be essential reading for all policy makers academics and others such as inspectors who critically examine leadership and management of educational institutions Every now and then a book is written in the field of leadership that stands out says something different is coherent original and makes us really ponder and think This is such a book it will provoke policy makers academics experienced practitioners and advanced students Cambridge Journal Education

Resisting Barriers to Belonging Beverly S. Faircloth, Laura M. Gonzalez, Katherine Ramos, 2021-10-18 Decades of theory research and practice have singled out sense of belonging in its many derivative forms as a pivotal component of healthy development psychologically socially culturally academically The human need for belonging and therefore its essential nature have been well established across multiple arenas Despite growth in this field answers to the barriers to belonging among marginalized groups and contexts remain especially elusive For decades this work was anchored primarily in dominant whistream lenses and contexts Therefore the authors attempt here to highlight the responsibilities of systems and individual actors to meaningfully adapt and intentionally make space for belonging for all Within that we advocate for the inclusion and preservation of culture identity and voice and reframe belonging as a fundamental human right Moreover the authors draw on insights and generate implications across multiple fields education psychology sociology counseling cultural foundations and community work Considering belonging through a critical equitable culturally sustaining perspective while simultaneously identifying settings where more attention to barriers to belonging is needed is a non negotiable element of moving the work of positive human development forward

Symbolic Movement Philip Wexler,2008-01-01 This is a book about sociology of education past present and future In the first section the author chronicles and specifies the changes in the field in a reflexive sociology of education tracing the path out of liberalism through radicalism and postmodernism to an emergent new age stance in understanding education in society Section two looks in more detail how these movements have actually worked in education and society The third section places the historical macrosocial analysis of education and society on the smaller more everyday screen of school life Based on the author s studies in high school the question of identity and education is the fulcrum for a series of concrete studies or school portraits which connect public social change and more personal everyday life and identity with the social process of schooling The final section probes the new age theme Questions of spirituality rationality magic mysticism and sublimation are related to changes both in education and in sociology of education What does it mean to do educational research in a re sacralized mystical society And does a new theory of sociology of education emerge on a Weberian rather than Durkheimian functionalist or Marxist radical view of the directions and reversals that begin in modernity and become more evident in our times

Higher Education and Love Victoria de Rijke,Andrew Peterson,Paul Gibbs,2022-01-01 This book explicitly unites the concepts of higher education and love to examine how these concepts are mutually compatible As the world of higher education moves towards the metrics of value and the worth of knowledge becomes more valued in its use rather than its discovery a crisis brews If higher education is to contribute to the wellbeing of the self and of others then the institution needs to be radically reviewed to see if and how love contributes to higher education within and beyond its walls This book addresses the core question of what would the university might be like today and into the future if the timeless notion of love was the basis of its educative process notwithstanding the material artefacts the university helps to create but also as a way of framing approaches to higher education
