Redesigning Collegiate Leadership:

Redesigning Collegiate Leadership Estela Mara Bensimon, Anna Neumann, 1994-08-01 Most organizational theorists use the athletic team as a metaphor for the effective work group specific players motivated to give their best performance in pursuit of a common goal This book offers a different model focusing instead on the complex ways that members of a leadership team interact wield power use language and create meaning The authors describe the team as a culture and argue that effective team leadership depends on expecting understanding and appreciating the differences among individuals

Redesigning Collegiate Leadership Estela Mara Bensimon, Anna Neumann, 1993 Reading this work becomes a personal as well as intellectual journey of reflecting on who we are and what we might wish to become as collaborative leaders and team builders An important journey for any administrator in American higher education today NASPA Journal

A Blueprint for Equity-Driven Community College Leadership Pamela L. Eddy, Kim E. VanDerLinden, 2024-08-14 Expert advice and effective strategies for community college leaders who endeavor to embed equity and social justice in institutional policies practices and structures

Redesigning America's Community Colleges Thomas R. Bailey, Shanna Smith Jaggars, Davis Jenkins, 2015-04-09 In the United States 1 200 community colleges enroll over ten million students each year nearly half of the nation's undergraduates Yet fewer than 40 percent of entrants complete an undergraduate degree within six years This fact has put pressure on community colleges to improve academic outcomes for their students Redesigning America's Community Colleges is a concise evidence based guide for educational leaders whose institutions typically receive short shrift in academic and policy discussions It makes a compelling case that two year colleges can substantially increase their rates of student success if they are willing to rethink the ways in which they organize programs of study support services and instruction Community colleges were originally designed to expand college enrollments at low cost not to maximize completion of high quality programs of study The result was a cafeteria style model in which students pick courses from a bewildering array of choices with little guidance The authors urge administrators and faculty to reject this traditional model in favor of guided pathways clearer more educationally coherent programs of study that simplify students choices without limiting their options and that enable them to complete credentials and advance to further education and the labor market more quickly and at less cost Distilling a wealth of data amassed from the Community College Research Center Teachers College Columbia University Redesigning America's Community Colleges offers a fundamental redesign of the way two year colleges operate stressing the integration of services and instruction into more clearly structured programs of study that support every student's goals

Enhancing Campus Capacity for Leadership Adrianna Kezar, Jaime Lester, 2011-07-26 Enhancing Campus Capacity for Leadership explores a mostly untapped resource on college campuses the leadership potential of staff and faculty at all levels This book contributes to the growing tradition of giving voice to grassroots leaders offering a unique contribution by honing in on leadership in educational settings In an increasingly corporatized environment

grassroots leadership can provide a balance to the prestige and revenue seeking impulses of campus leaders act as a conscience for institutional operations with greater integrity create changes related to the teaching and learning core build greater equity improve relationships among campus stakeholders and enhance the student experience The text documents the stories of grassroots leaders including the motivation and background of these bottom up beacons the tactics and strategies that they use the obstacles they overcome and the ways that they navigate power and join with formal authority This investigation also showcases how grassroots leaders in institutional settings particularly more marginalized groups can face significant backlash While we like to believe that organizations are civil and humane the stories in this book demonstrate a dark side with which we must reckon The book ends with a discussion of the future of leadership on college campuses examining the possibilities for shared and collaborative forms of leadership and governance

Rethinking Leadership in a Complex, Multicultural, and Global Environment Adrianna J. Kezar, 2023-07-03 The complexity of the decisions that today's higher education leaders face as they engage with a diversifying student body, globalization and technological advances requires embracing new ways of thinking about leadership. This book examines the new theories and concepts of leadership that are described in the multidisciplinary literature on leadership and are being applied in other sectors from government to the non-profit and business communities to explore the implications for leaders and leadership programs in higher education. At a time when the heroic controlling and distant leader of the past has given way to a focus on teams, collectives and social change, the contributors to this book ask: What new skills and competencies should leaders and programs be addressing? The recognition of the interdependence of groups within organizations and between organizations of cultural and social differences and of how technology has sped up decision time and connected people across the globe have changed the nature of leadership as well as made the process more complex and diffuse. This book is addressed to anyone developing institutional, regional or national leadership development programs; to aspiring leaders planning to participate in such programs; and to campus leaders concerned with the development and pipeline of emerging leaders. It will be particularly useful for administrators in faculty development offices who are planning and creating workshops in leadership training and for staff in human resource offices who offer similar training.

Urban Education Karen Symms Gallagher, Rodney Goodyear, Dominic Brewer, Robert Rueda, 2013-03-19 Many factors complicate the education of urban students. Among them have been issues related to population density, racial/ethnic/cultural and linguistic diversity, poverty, racism, individual and institutional and funding levels. Although urban educators have been addressing these issues for decades, placing them under the umbrella of urban education and treating them as a specific area of practice and inquiry is relatively recent. Despite the wide adoption of the term, a consensus about its meaning exists at only the broadest of levels. In short, urban education remains an ill-defined concept. This comprehensive volume addresses this definitional challenge and provides a 3-part conceptual model in which the achievement of equity for all, regardless of race, gender or ethnicity, is an ideal that is central to urban education. The model also posits that effective urban education requires attention to the three central issues that confronts all education systems: a) accountability of individuals and the institutions in which they work; b) leadership, which occurs in multiple ways and at multiple levels; and c) learning, which is the raison d'être of education. Just as a three-legged stool would fall if any one leg were weak or missing, each of these areas is essential to effective urban education and affects the others.

Shaping the College Curriculum Lisa R. Lattuca, Joan S. Stark, 2011-01-11 Shaping the College Curriculum focuses on curriculum development as an important decision making process in colleges and universities The authors define curriculum as an academic plan developed in a historical social and political context They identify eight curricular elements that are addressed intentionally or unintentionally in developing all college courses and programs By exploring the interaction of these elements in context they use the academic plan model to clarify the processes of course and program planning enabling instructors and administrators to ask crucial questions about improving teaching and optimizing student learning This revised edition continues to stress research based educational practices The new edition consolidates and focuses discussion of institutional and sociocultural factors that influence curricular decisions All chapters have been updated with recent research findings relevant to curriculum leadership accreditation assessment and the influence of academic fields while two new chapters focus directly on learning research and its implications for instructional practice A new chapter drawn from research on organizational change provides practical guidance to assist faculty members and administrators who are

engaged in extensive program improvements Streamlined yet still comprehensive and detailed this revised volume will continue to serve as an invaluable resource for individuals and groups whose work includes planning designing delivering evaluating and studying curricula in higher education This is an extraordinary book that offers not a particular curriculum or structure but a comprehensive approach for thinking about the curriculum ensuring that important considerations are not overlooked in its revision or development and increasing the likelihood that students will learn and develop in ways institutions hope they will The book brings coherence and intention to what is typically an unstructured haphazard and only partially rational process guided more by beliefs than by empirically grounded substantive information Lattuca and Stark present their material in ways that are accessible and applicable across planning levels course program department and institution local settings and academic disciplines It s an admirable and informative marriage of scholarship and practice and an insightful guide to both Anyone who cares seriously about how we can make our colleges and universities more educationally effective should read this book Patrick T Terenzini distinguished professor and senior scientist Center for the Study of Higher Education The Pennsylvania State University *Connecting Learning Across the Institution* Pamela L. Eddy, 2014-03-25 Most research on learning tends to occur in silos based on stakeholder perspective This volume seeks to break down these silos and draw together scholars who research learning from different perspectives to highlight commonalities in learning for students faculty and institutions When we understand how learning is experienced across the institution we can develop strategies that help support enhance and reinforce learning for all Exploring what it means to bridge learning across the institution this volume provides a roadmap to improve learning for all Both scholarly and practical it advances the knowledge about the ways we investigate and study learning across and for various groups of learners It also Collects thinking about learning in its various formats in one location Provides a platform for synthesis Outlines key questions for thinking more deeply about learning on campus Instead of thinking of learning as discrete depending on the stakeholder group this volume highlights the commonalities across all types of learners **Building Organizational Capacity** J. Douglas Toma, 2010-11-15 Every university or college president envisions bold initiatives big projects intended to change the nature of an institution with significant implications across all sectors How can leaders and senior managers charged with implementing reforms effectively frame their work and anticipate potential pitfalls No organization can maximize its capacity defined as the administrative foundation essential for establishing and sustaining initiatives without considering its core elements individually and in concert according to J Douglas Toma This book examines eight essential organizational elements purposes structure governance policies processes information infrastructure and culture and illuminates their influence in strategic management through case studies at eight institutions Building Organizational Capacity situates strategic management within the context of higher education providing practitioners with the tools to better understand institutional challenges in accomplishing its missions and realizing its aspirations Toma s clear and well

The Organization of Higher Education Michael N. Bastedo, 2012-05-01

Colleges and universities are best understood as networks of departments working together to fulfill a mission of education innovation and community partnership To better understand how these large and complex institutions function scholars can apply organizational and strategic planning concepts made familiar by business management This book follows that model and explores the new and emerging ways by which organizational theories address major contemporary concerns in higher education The contributors to this volume are both influenced and inspired by the pioneering work of Marvin Peterson and his four decade career researching higher education organization

Comprising a serious reexamination of the field the essays review past and current thinking address the field s core theoretical traditions and pursue exciting new lines of inquiry including the organizational dynamics of diversity and social movement organizations

Ideal for courses in administration and theory this book reinvigorates the study of higher education as an organization and encourages scholars to rediscover the value of organizational principles in all areas of higher education research
