To Be Frank Kevan Christie,2025-09-28 Fifty

something newspaper columnist Frank Savage pens a controversial piece calling for dogs and babies to be banned from cafés as his swansong to journalism. Instead of being dismissed, the column catapults him to stardom and into further trouble. On a night out, Frank spots his arch enemy Brewster 56, an apparently reformed racist homophobic football hooligan turned drug dealer, now a respected figure in the local community whom he blames for his brother's death. This coincides with the arrival of his eldest daughter Naomi, whom Frank hasn't seen for years. A genius with numbers, she works for an organised crime syndicate in London headed by the Wise One but is desperate to break free and go straight. The Syndicate places Naomi in the seaside town of Portobello, Edinburgh, to work alongside Brewster, overseeing their money laundering operation. As Naomi and Frank grow closer and begin to heal old wounds, neither realises they are both hiding secrets that would devastate the other.

Using Test Data for Student Achievement Nancy W. Sindelar, 2011-11-11 Schools are drowning in test data but many schools do little with test results other than sort students into various categories of proficiency or lack thereof. Some educators feel testing has taken the joy out of teaching. Others believe valuable instructional time has been lost as a result of testing. Yet NCBL and other federal and state mandates have placed educators under increasing pressure to make certain all students meet standards on high stakes tests. Now more than ever, teachers and administrators need to embrace testing as a valuable classroom tool to guide instruction, use efficient technological resources available for test scoring and analysis, and profit from the benefits of test analysis to increase learning and achievement. *Using Test Data for Student Achievement* shows educators step by step how to use test data to facilitate student learning. The book combines research, technology, and Sindelar's experience as a teacher and administrator to provide practical and efficient ways to use test data to increase learning, close achievement gaps, and even raise test scores.
