T. Stanbury, Fred Thompson, Institute for Research on Public Policy, 1982 From the Introduction This study examines the nature of and prospects for regulatory reform in Canada In particular we are concerned with the elimination of liberalization of direct regulation in such industries as telecommunications airlines trucking and agriculture In focusing our attention on the prospects for reforming direct regulation in Canada we do not wish to slight the potential value of reforming the regulatory process But most procedural reforms focus on the margin or flow of new regulation while deregulation proper is aimed at reducing the enormous stock already in existence Within the field of direct regulation we have further narrowed our analysis to the role of the federal government as regulator **The Challenge of Regulatory Reform** Domestic Council (U.S.). Review Group on Regulatory Reform, 1977 **Reforming Regulation** Roger G. Noll, 2010-12-01 Many observers agree that federal regulation of business often fails to prevent monopoly profits promote technological change or protect consumers against market abuses Why President Nixon assigned the task of proposing reforms to his Advisory Council on Executive Organization called the Ash Council after its chairman Roy L Ash The object of both the Council s report and this

paper is to advance the public search for reform The council suggested that a leading cause of regulatory failure lies in the organization of regulatory agencies This analysis leads to an alternative view that the regulatory process is inherently flawed regardless of agency organization and the real sources of weakness may be laws establishing regulatory mandates and the political environment in which regulation operates Drawing on the insights of economists political scientists and lawyers the author examines a number of federal regulatory agencies and views their performance in the light of regulatory theory He prescribes no remedies but suggests the route to be followed if regulation is to approach its economic and social goals

Subcommittee on Regulatory Reform, 1982      *OECD Reviews of Regulatory Reform Regulatory Policy in Chile Government Capacity to Ensure High-Quality Regulation* OECD, 2016-04-25 Chile enjoys a very sound macroeconomic framework and economic resilience partly due to a prudent regulatory and supervisory framework for its financial system Nevertheless Chile lacks a comprehensive regulatory reform programme This report examines how Chile can ensure high quality regulation      *Institutions for Economic Reform in Asia* Philippa Dee, 2009-12-16 In the same way that no economy starts out with the best set of economic policies no economy starts out with the best institutions to support the policy making process Instead they inherit institutions that reflect their own unique culture and history The task of structural reform has to be addressed therefore in the context of domestic economic and political institutions and processes Examining the nature of structural economic reform and the institutional circumstances in which it succeeds or is inhibited this volume is less about the content of structural reform and more about how to get there The chapters develop principles governing the types of institutions that are likely to assist the structural reform process and then examine the application of those principles within a number of case studies Finally the volume presents some ideas about how regional cooperation could help to build and support those institutions that in turn support domestic structural reforms Consisting of theoretical chapters and country specific case studies this book draws on experience with structural reform across a range of Asian economies at different stages of economic development As such it will be of interest to students and scholars of Asian Economics and Development Economics      *The Anticompetitive Impact of Regulation* Giuliano Amato, Laraine L. Laudati, 2001-01-01 This timely book addresses the important issue of the negative effects of anticompetitive regulation on industry and the massive economic harm it causes The distinguished contributors including economic and legal scholars advocate the need for a review of all anticompetitive laws and address several industry and country case studies with the ultimate aim of providing recommendations to eliminate the impact of anticompetitive regulation The first part of the book considers regulations affecting private business and professions part two covers public utility and public services regulation whilst part three discusses the role of institutions and competition authorities in relation to anticompetitive practices The authors draft

guidelines based on economic evidence and legal arguments which they believe would provide a starting point for the European Union to address the problem They go on to propose possible implementation strategies for these guidelines from both an institutional and legal perspective The book also includes a historical perspective on the evolution of anticompetitive regulation complemented by an overview of the actions currently being implemented to address and reverse the problem in other jurisdictions
