Wonder as a New Starting Point for Theological Anthropology José Francisco Morales

Torres,2023-04-04 In Wonder as a New Starting Point for Theological Anthropology Opened by the World Jos Francisco Morales Torres constructs a new theological anthropology that begins with wonder He contends that the visceral experience of wonder is an opening up of the human by an excess that saturates the world This opened by ness points to a transforming receptivity as the basis of the person and to an extravagant Generosity that grounds all creation Thus wonder which is grounded in generous Excess is not only a gift but a demand it calls for a liberative praxis that resist the forces that flatten the fullness of life into what is useful and profitable and that reduce the limitless worth of fellow humans to mere commodities to be exploited and exchanged at the altar of the idolatrous Market Wonder reveals a primordial receptivity in the human person which demands of us an ethic of sustainability that does not reduce the other to commodity a vulnerability that risks being opened by the other a commitment to solidarity and liberation that resist the forces of an insatiable idolatrous Market that seeks only to steal and kill and destroy **The Moral Psychology of Shame** Alessandra

Fussi,Raffaele Rodogno,2023-02-01 Few emotions have divided opinion as deeply as shame Some scholars have argued that shame is essentially a maladaptive emotion used to oppress minorities and reinforce stigmas and traumas an emotion that leaves the self at the mercy of powerful others Other scholars however have argued that the absence of a sense of shame in a subject their shamelessness is tantamount to a vicious moral insensitivity As the eleven original chapters in this collection attest however shame scholars are entering a new phase one in which scholarship no longer attempts to defend one side of shame against the other but rather accepts both faces as faithful to the phenomenon to be explained At the core of our understanding of shame there are profound disagreements about the importance of the Other in shaping our moral identity As this collection shows by its study of shame the difficulty of the connection between Self Other and morality spans over millennia and cultures and currently animates important debates at the core of feminism and disability studies Contributors Mark Alfano Alessandra Fussi Lorenzo Greco JeeLoo Liu Katrine Krause Jensen Heidi L Maibom Tjeert Olthof Imke von Maur Alba Montes S nchez Raffaele Rodogno Alessandro Salice Krista K Thomason ngrid Vendrell Ferran *Studia*

Phaenomenologica: Vol. XV / 2015 - Early Phenomenology Dermot Moran,Rodney K.B. Parker,2016-02-01 *Narrative and Self-Understanding* Garry L. Hagberg,2019-11-15 This exciting new edited collection bridges the gap between narrative and self understanding The problem of self knowledge is of universal interest the nature or character of its achievement has been one continuing thread in our philosophical tradition for millennia Likewise the nature of storytelling the assembly of individual parts of a potential story into a coherent narrative structure has been central to the study of literature But how do we gain knowledge from an artform that is by definition fictional by definition not a matter of ascertained fact as this applies to the understanding of our lives When we see ourselves in the mimetic mirror of literature what we see may not just be a matter of identifying with a single protagonist but also a matter of recognizing long form structures long arc narrative shapes that give a place to and thus make sense of the individual bits of experience that we place into those structures But of course

at precisely this juncture a question arises do we make that sense or do we discover it The twelve chapters brought together here lucidly and steadily reveal how the matters at hand are far more intricate and interesting than any such dichotomy could accommodate This is a book that investigates the ways in which life and literature speak to each other **Emotion Theory: The Routledge Comprehensive Guide** Andrea Scarantino,2024-07-23 Emotion Theory The Routledge Comprehensive Guide is the first interdisciplinary reference resource which authoritatively takes stock of the progress made both in the philosophy of emotions and in affective science from Ancient Greece to today A two volume landmark publication it provides an overview of emotion theory unrivaled in terms of its comprehensiveness accessibility and systematicity Comprising 62 chapters by 101 leading emotion theorists in philosophy classics psychology biology psychiatry neuroscience and sociology the collection is organized as follows Volume I Part I History of Emotion Theory 10 chapters Part II Contemporary Theories of Emotions 10 chapters Part III The Elements of Emotion Theory 7 chapters Volume II Part IV Nature and Functions of 35 Specific Emotions 22 chapters Part V Challenges Facing Emotion Theory 13 chapters Special Elicitors of Emotions Emotions and Their Relations to Other Elements of Mental Architecture Emotions in Children Animals and Groups Normative Aspects of Emotions Most of the major themes of contemporary emotion theory are covered in their historical philosophical and scientific dimensions This collection will be essential reading for students and researchers in philosophy psychology neuroscience sociology anthropology political science and history for decades to come *Empathy, Sociality, and Personhood* Elisa Magrì,Dermot Moran,2018-03-12 This book explores the phenomenological investigations of Edith Stein by critically contextualising her role within the phenomenological movement and assessing her accounts of empathy sociality and personhood Despite the growing interest that surrounds contemporary research on empathy Edith Stein's phenomenological investigations have been largely neglected due to a historical tradition that tends to consider her either as Husserl's assistant or as a martyr However in her phenomenological research Edith Stein pursued critically the relation between phenomenology and psychology focusing on the relation between affectivity subjectivity and personhood Alongside phenomenologists like Max Scheler Kurt Stavenhagen and Hedwig Conrad Martius Stein developed Husserl's method incorporating several original modifications that are relevant for philosophy phenomenology and ethics Drawing on recent debates on empathy emotions and collective intentionality as well as on original inquiries and interpretations the collection articulates and develops new perspectives regarding Edith Stein's phenomenology The volume includes an appraisal of Stein's philosophical relation to Edmund Husserl and Max Scheler and develops further the concepts of empathy sociality and personhood These essays demonstrate the significance of Stein's phenomenology for contemporary research on intentionality emotions and ethics Gathering together contributions from young researchers and leading scholars in the fields of phenomenology social ontology and history of philosophy this collection provides original views and critical discussions that will be of interest also for social philosophers and moral psychologists *Phenomenologies of Love* ,2025-03-13 This

edited volume offers a comprehensive view of various possible phenomenological approaches of the experience of love ranging from classical historical perspectives up to contemporary and critical viewpoints It explores both the crucial importance of the question of love for the history of phenomenology as well as the rich potential of phenomenology for a deeper insight in the experience of love and its various dimensions such as its affective relational but also ethical and religious aspects

The Publishers' Trade List Annual, 1985 **Science Meets Philosophy** Hans Christian Garmann Johnsen, 2023-04-26 The book is an attempt to bring together what are often seen as incommensurable scientific and philosophical positions Its core argument is that a main reason for the divisions about what constitutes scientific knowledge relates to disagreements on philosophical issues The book explores what these disagreements are about and discusses whether they can be overcome Taking a historical perspective the book traces the divides in science back to three main philosophical traditions realism idealism and scepticism It maps how these have inspired three main current positions in science logical empiricism phenomenology and sociology of scientific knowledge The book is intended for a general audience concerned with today's debates on scientific knowledge and society It will be useful for students and researchers studying philosophy of science sociology of scientific knowledge realism phenomenology positivism logical empiricism analytical philosophy and sustainable scientific knowledge

Wilfrid Sellars Willem A. DeVries, 2014-12-18 Wilfrid Sellars 1912-89 has been called the most profound and systematic epistemological thinker of the twentieth century Robert Brandom He was in many respects ahead of his time and many of his innovations have become widely acknowledged for example his attack on the myth of the given his functionalist treatment of intentional states his proposal that psychological concepts are like theoretical concepts and his suggestion that attributions of knowledge locate the knower in the logical space of reasons However while many philosophers have begun to acknowledge Sellars's inspiration in their work their interpretation of his thought has not always been the most accurate His writings are difficult Individually his essays are complex and sometimes rely on doctrines and arguments he put forward elsewhere Each of his articles is deepened and strengthened by seeing it in its systematic context but he never wrote a unified exposition of his system which therefore has to be pieced together from numerous disparate sources Willem DeVries addresses these difficulties specifically and provides a careful reading and remarkable overview of Sellars's systematic philosophy that will become the standard point of reference for all philosophers seeking to understand Sellars's hugely significant body of work
