Selected Topics In General Chemistry:

General Chemistry I as a Second Language David R. Klein, 2005-03-16 Many students and instructors are overwhelmed by the vast amount of content and concepts presented in General Chemistry. Students often emerge from the course with little understanding of chemical concepts and must be retaught in subsequent courses. This supplemental text can be paired with Olmsted Williams Brady Spencer or any other General Chemistry title. David Klein is a lecturer at Johns Hopkins University where he teaches Organic and General Chemistry. He is a dynamic and creative teacher and uses analogy to help students grasp difficult topics. Klein's unique informal voice and manner of presentation help students truly master key topics in this course. He is also the author of *Organic Chemistry as a Second Language*. Response to this book has been phenomenal.

These communities have numerous benefits on professional development such as enhancing educator preparedness and learning. The possibilities of these communities are endless; however, further study is required to understand how these learning communities work and the best practices and challenges they face. *Experiences and Research on Enhanced Professional Development Through Faculty Learning Communities* shares the experiences and research related to the enhanced professional development received by university faculty and staff participating in a series of collaborative faculty learning communities. The book, using qualitative, quantitative, and mixed methodologies, considers educator experiences as participants in the faculty learning communities, what they learned, and how they applied and implemented best practices in their courses. Covering topics such as curricula, course design, and rubrics, this reference book is ideal for administrators, higher education professionals, program developers, program directors, researchers, academicians, scholars, practitioners, instructors, and students. **Green and Sustainable Processing** Ponnadurai Ramasami, 2021-10-25 Based on The Virtual Conference on Chemistry and its Applications VCCA 2020 Research and Innovations in Chemical Sciences Paving the Way Forward held in August 2020 and organized by the Computational Chemistry Group of the University of Mauritius.
