## **Selected Works Volume I:**

*Collected Works, Volume I* Adolf Grünbaum, 2013-07-16 Adolf Grünbaum is one of the giants of 20th century philosophy of science. This volume is the first of three collecting his most essential and highly influential work. The essays collected in this first volume focus on three related areas. They discuss scientific rationality, the problem of what it takes for a theory to be called scientific, and ask whether it is plausible to draw a clear distinction between science and non-science as was famously proposed by Karl Popper. They delve into the debate between determinism and indeterminism in both science and in the humanities. Grünbaum defends the position of the Humane Determinist, which then leads to a thorough criticism of the current theological approaches to ethics and morality where Grünbaum defends an explicit Secular Humanism as well as of prominent theistic interpretations of twentieth century physical cosmologies. The second volume is devoted to Grünbaum's writings on the Philosophy of Physics and Space Time and the third to his lectures on the Philosophy of Psychology and Psychoanalysis including his 1985 Gifford Lectures which are to be published for the first time. [Collected Works, Volume 1](#) V. I.

Lenin, 2017-10-03 Among the most influential political and social forces of the twentieth century, modern communism rests firmly on philosophical, political, and economic underpinnings developed by Vladimir Ilyich Ulyanov, later known as Lenin. For anyone who seeks to understand the twentieth century, capitalism, the Russian Revolution, and the role of Communism in the tumultuous political and social movements that have shaped the modern world, the works of Lenin offer unparalleled insight and understanding. Taken together, they represent a balanced cross-section of his revolutionary theories of history, politics, and economics; his tactics for securing and retaining power; and his vision of a new social and economic order. This first volume contains four works: *New Economic Developments in Peasant Life*, *On the So-Called Market Question*, *What the Friends of the People Are and How They Fight the Social Democrats*, and *The Economic Content of Narodism and the Criticism of It in Mr. Struve's Book*, written by Lenin in 1893-1894 at the outset of his revolutionary activity during the first years of the struggle to establish a workers' revolutionary party in Russia. **Kurt Gödel: Collected Works: Volume IV** Kurt

Gödel, 2013-10 Kurt Gödel (1906-1978) was the most outstanding logician of the twentieth century. These collected works form the only comprehensive edition of Gödel's work available and are designed to be useful and accessible to as wide an audience as possible without sacrificing scientific or historical accuracy. [Wilhelm Dilthey: Selected Works, Volume VI](#) Wilhelm Dilthey, 2019-11-12 This book completes a landmark six-volume translation of the major writings of Wilhelm Dilthey (1833-1911), a philosopher and historian of culture who continues to have a significant influence on philosophy, hermeneutics, and the theory of the human sciences. These volumes make available to English readers texts that represent the full range of Dilthey's work. The works in this volume present Dilthey's most deeply held views about philosophy and how it can guide human practices. *System of Ethics* (1890) argues that Humean sympathy motivates us only externally and must be replaced with the internally motivated fellow-feeling of solidarity that respects others as ends in themselves. *The Essence of Philosophy* (1907

demonstrates how philosophy has developed from its traditional metaphysical role to the epistemological and encyclopedic functions that ground and order the natural and human sciences The work also discloses an orientational function of philosophy that is explored further in *The Types of World View and Their Development* 1911 Philosophical world views are important in that they address the existential needs and riddles that grow out of life experience and are not solved by any of the sciences In addition the book features three other significant essays *Present Day Culture and Philosophy* 1898 concerns the challenges to philosophy posed by contemporary culture *Dream* 1903 is about the thinkers portrayed in Raphael's School of Athens and Dilthey's worries about them breaking up into three divergent groups Finally *The Problem of Religion* 1911 considers how religiosity can still inform lived experience in secular times

**Wilhelm Dilthey: Selected Works, Volume III** Wilhelm Dilthey, 2021-07-13 This volume provides Dilthey's most mature and best formulation of his Critique of Historical Reason. It begins with three Studies Toward the Foundation of the Human Sciences in which Dilthey refashions Husserlian concepts to describe the basic structures of consciousness relevant to historical understanding. The volume next presents the major 1910 work The Formation of the Historical World in the Human Sciences. Here Dilthey considers the degree to which carriers of history—individuals, cultures, institutions, and communities—can be articulated as productive systems capable of generating value and meaning and of realizing purposes. Hegel's idea of objective spirit is reconceived in a more empirical form to designate the medium of commonality in which historical beings are immersed. Any universal claims about history need to be framed within the specific productive systems analyzed by the various human sciences. Dilthey's drafts for the Continuation of the Formation contain extensive discussions of the categories most important for our knowledge of historical life: meaning, value, purpose, time, and development. He also examines the contributions of autobiography to historical understanding and of biography to scientific history. The finest summary of Dilthey's views on hermeneutics can be found in The Understanding of Other Persons and Their Manifestations of Life. Here Dilthey differentiates understanding relative to three kinds of manifestations of life. After giving his analysis of elementary understanding, he examines the role of induction in higher understanding and interpretation and the relevance of transposition and re-experiencing for grasping individuality.

*Collected works* Kurt Gödel, 1986 Kurt Gödel 1906–1978 was the most outstanding logician of the 20th century. This second volume of Gödel's works collects the remainder of his published work covering the period 1938–1974. Each article or closely related group of articles is preceded by an introductory note that elucidates it and places it in its historical context.

**The Idea of Nation and its Future in India** Shibani Kinkar Chaube, 2016-10-26 This volume is a theoretico-empirical study of nations and nationalism on a global scale. It enquires if the idea of the nation by its own logic is feasible and whether India fulfils the requirement of nationhood with a reasonable prospect of survival. The monograph engages with the theories of nation and nationalism and examines if they are relevant and tenable in contemporary times. It looks at the way these ideas have acted out in the Indian nation while attempting to map its future trajectory. It also asks how do the two fundamental challenges to the idea of nation—ethnicity and class—fare in the era of globalisation and further how does India, a new state in an ancient society, reconceptualise the paradigm of this debate. The book will be of great interest to scholars and students of political science, political theory, history, political philosophy, and South Asian studies as well as informed general readers.

I. Lenin,2019-02-26 Re launch of the Collected Works of the legendary revolutionary in paperback Among the most influential political and social forces of the twentieth century modern communism rests firmly on philosophical political and economic underpinnings developed by Vladimir Ilyich Ulyanov later known as Lenin For anyone who seeks to understand capitalism the Russian Revolution and the role of communism in the tumultuous political and social movements that have shaped the modern world the works of Lenin offer unparalleled insight and understanding      **Principles of Subjective Anthropology** Binggong Chen,2023-03-27 This book puts forward the concept of subjective anthropology and outlines a theoretical system that will allow subjective anthropology to qualify as a new academic discipline in its own right In an effort to respond to the field s proper role as the science of humanity subjective analysis has been introduced into the study of anthropology The book fills two distinct gaps in our knowledge and understanding of modern man offering detailed descriptions of personality and of groups while also advancing the theory of structure and choice The book formulates seven basic principles of subjective anthropology and divides anthropology into three major branches subjective anthropology cultural anthropology and biological or physical anthropology which can be further divided into sub branches The book pursues three key goals advancing and developing the theoretical system of subjective anthropology reconstructing the discipline of anthropology and establishing a Chinese anthropology with Chinese characteristics Chinese visions and Chinese styles      **Witnesses to Permanent Revolution: The Documentary Record** Richard B. Day,Daniel Gaido,2009-02-23 The theory of Permanent Revolution has been associated with Leon Trotsky for more than a century since the first Russian Revolution in 1905 Trotsky was the most brilliant proponent of Permanent Revolution but by no means its sole author The documents in this volume most of them translated into English for the first time demonstrate that Trotsky was one of several participants in a debate from 1903 7 that involved numerous leading figures of

Russian and European Marxism including Karl Kautsky Rosa Luxemburg Franz Mehring Parvus and David Ryazanov This volume reassembles that debate assesses it with reference to Marx and Engels and provides new evidence for interpreting the formative years of Russian revolutionary Marxism A Brief Modern Chinese History Haipeng Zhai, Jinyi Zhang, 2020-10-20 This book is part of an initiative in cooperation with renowned Chinese publishers to make fundamental formative and influential Chinese thinkers available to a western readership providing absorbing insights into Chinese reflections of late Haipeng Zhang and Jinyi Zhai provide us with a history of China's struggle for national independence and prosperity reflecting the humiliation in the sinking period and the struggle during the rising period After the Japanese aggressions against China had caused more damage to China than all previous invasions Chinese society not only avoided the continued sinking but also laid the foundation for China's modernization and the recent success story to the present day

**Following Marx** Michael Lebowitz, 2009-01-15 What does it mean to follow Marx In this examination of Marx's methodology combined with specific applications on topics in political economy such as neo Ricardian theory analytical Marxism the falling rate of profit crisis theory monopoly capital Paul Sweezy advertising and the capitalist state this volume argues that the failure to understand or explicit rejection of Marx's method has led astray many who consider themselves Marxists By focusing particularly upon the concept of a totality and the necessary form of appearance of capital as many capitals in competition Following Marx both demonstrates why Marx insisted that in competition everything is reversed and provides a guide for following Marx *Shaken Authority* Christian P. Sorace, 2017-05-09 In *Shaken Authority* Christian P Sorace examines the political mechanisms at work in the aftermath of the 2008 Sichuan earthquake and the broader ideological energies that drove them Sorace takes Communist Party ideas and discourse as central to how that organization formulates policies defines legitimacy and exerts its power Sorace argues that the Communist Party has never abandoned its conviction that discourse can shape the world and the people who inhabit it Sorace also demonstrates how the Communist Party's planning apparatus continues to play a crucial role in engineering China's economy and market construction especially in the countryside Sorace takes a distinctive and original interpretive approach to understanding Chinese politics and *Shaken Authority* demonstrates how Communist Party discourse and ideology influenced the official decisions and responses to the Sichuan earthquake Sorace provides a clear view of the lived outcomes of Communist Party plans rationalities and discourses in the earthquake zone The three case studies he presents each demonstrate a different type of reconstruction and model of development urban rural integration tourism and ecological civilization Sorace's work emphasizes the need for a grounded literacy in the political concepts discourses and vocabularies of the Communist Party itself To dismiss China's official discourse as empty propaganda Sorace argues makes China and Chinese realities harder to understand not easier **Twilight of the Gods - Götterdämmerung over the "New World Order"** Stefan Engel, 2016-03-02 For the title of this book author Stefan Engel employs an allegory from German mythology in the g tterd

mmerung the twilight of the gods the end of the world engulfs the worn out gods of an antiquated age and out of the world conflagration grows an admirable new world of peace an full joyous live The parallel with the decline of the present ruling stratum of world society and the preparation of a new future well worth living is intended The book wrests this vision from the realm of mythology and places it on a scientific foundation It conveys a perspective to all those for whom the g tterd mmerung of ruling world finance capital does not signify the end of history but the starting point for an new epoch of the social deveolement of humanity without hunger exploitation and war *Collected Works of F.H. Bradley: The principles of logic* Francis Herbert Bradley,1922 Marx's Capital, Method and Revolutionary Subjectivity Guido Starosta,2015-11-24 In Marx s Capital Method and Revolutionary Subjectivity Guido Starosta develops a materialist inquiry into the social and historical determinations of revolutionary subjectivity Through a methodologically minded critical reconstruction of the Marxian critique of political economy from the early writings up to the Grundrisse and Capital this study shows that the outcome of the historical movement of the objectified form of social mediation which has turned into the very alienated subject of social life i e capital is to develop as its own immanent determination the constitution of the self abolishing working class as a revolutionary subject A crucial element in this intellectual endeavour is the focus on the intrinsic connection between the specifically dialectical form of social science and its radical transformative content **Marxism and Freedom** Raya Dunayevskaya,2024-01-11 In this classic exposition of Marxist thought Raya Dunayevskaya with clarity and great insight traces the development and explains the essential features of Marx s analysis of history Using as her point of departure the Industrial and French Revolutions the European upheavals of 1848 the American Civil War and the Paris Commune of 1871 Dunayevskaya shows how Marx inspired by these events adapted Hegel s philosophy to analyze the course of history as a dialectical process that moves from practice to theory The essence of Marx s philosophy as Dunayevskaya points out is the human struggle for freedom which entails the gradual emergence of a proletarian revolutionary consciousness and the discovery through conflict of the means for realizing complete human freedom But freedom for Marx meant freedom not only from capitalist economic exploitation but also from all political restraints Continuing her historical analysis Dunayevskaya reveals how completely Marx s original conception of freedom was perverted through its adaptations by Stalin in Russia and Mao in China and the subsequent erection of totalitarian states The exploitation of the masses persisted under these regimes in the form of a new state capitalism Yet despite the profound derailment of Marxist political philosophy in the twentieth century Dunayevskaya points to developments such as the Hungarian revolt of 1956 and the Civil Rights struggles in the United States as signs that the indomitable quest for freedom on the part of the downtrodden cannot be forever repressed The Hegelian dialectic of events propelled by the spirit of the masses thus moves on inexorably with the hope for the future achievement of political economic and social freedom and equality for all
