### **Genetic Improvement of Farmed Animals** Geoff Simm, Geoff

Pollott, Raphael Mrode, Ross Houston, Karen Marshall, 2020-11-26 Genetic Improvement of Farmed Animals provides a thorough grounding in the basic sciences underpinning farmed animal breeding Relating science to practical application it covers all the major farmed animal species cattle sheep goats poultry pigs and aquaculture species *Utilisation and conservation of farm animal genetic resources* Kor Oldenbroek, 2023-08-28 The genetic diversity comprised in farm animal species and breeds is an important resource in livestock systems For several reasons within the different species used for food production only a few breeds are developed towards high output breeds fitting in high input systems In this process many breeds are set aside from the food producing livestock systems These breeds will be faced with extinction unless new functions for these breeds are found This is a real threat for the genetic diversity within species This book is intended to give insight into the issues of the utilisation and conservation of farm animal genetic resources towards a broad group of readers interested in these subjects The insight is presented as applications of population molecular and quantitative genetics that can be used to take appropriate decisions in utilisation and conservation programmes A previous edition of this book is a key resource in courses worldwide and cited in many scientific publications The first two chapters discuss the decisions to be made in utilisation and conservation Chapter 3 surveys the different ways in which the diversity we observe within a species can be characterised Chapter 4 illustrates recent results using this theory for utilisation and conservation purposes Chapters 5 6 and 7 give theoretical backgrounds necessary to make decisions and chapters 8 and 9 present the operation and practical implications of selection and conservation schemes

### **Mastitis in dairy production** H. Hogeveen, 2023-08-28

Worldwide mastitis is still one of the most important diseases in the dairy sector Being a multifactorial disease caused by multiple pathogens control remains a difficult issue Mastitis not only affects the health of milk producing animals having consequences for the profitability of dairy farms it also affects the animal welfare Moreover mastitis negatively influences the milk quality having consequences for the dairy processing industry In other words mastitis affects a large part of the dairy production chain Due to ongoing scientific effort insight in mastitis in the context of increasingly complex farming systems is improving This insight leads to better methods to control mastitis either by prevention or by adequate measures e g therapy when a cow or goat or sheep gets mastitis This book reflects the current knowledge from all over the world on mastitis as it was presented during the 4th IDF International Mastitis Conference held in June 2005 in Maastricht the Netherlands The papers of the 115 oral presentations and the 13 keynote presentations are reflecting not only the current knowledge of

mastitis control but are also giving ideas for future solutions for control measures
