

VALLARD ATLAS - 1547 -

An upside-down world

Have you ever dreamed of having a key piece of modern history in your private library?

The *Vallard Atlas* contains 15 lavishly illustrated nautical charts and is a wonderful testimony to the Age of Discovery. Curiously enough North is placed at the bottom of the page, a common practice in Muslim cartography. Some charts reveal the main features of the eastern coast of Australia, depicted 200 years before Capitan Cook disembarked there!

Crucial Maps in the Early Cartography and Place-Nomenclature of the Atlantic Coast of Canada William F.

Ganong, 1964-12-15 The Transactions of the Royal Society of Canada for the years from 1929 to 1937 included a series in nine parts of important papers on Crucial Maps which have been a frequent source of reference ever since for students of the history of discovery and of early cartography Their author William Francis Ganong had a life long interest in the natural and human history of his native province New Brunswick Although he was primarily a botanist with four full length books and an amazing number of articles to his credit it was through his series of monographs in the Transactions of the Royal Society of Canada that the breadth of his interests became known For over fifty years he contributed almost annually to the Transactions the results of his systematic investigations into New Brunswick's physiography aborigines early explorations wars and settlements Crucial Maps which concluded in 1937 was the last series of articles Ganong was the first investigator to employ a critical classification of maps based upon groupings by period and type although the cartography of Canada's east coast had earlier been introduced by Baron Alexander von Humboldt Ganong's contributions to cartography are enormous for example his reconstruction of Cabot's voyages while all may not agree with it is a masterpiece of inductive analysis which will remain a model in historical research his chapters on Gomez Verrazzano and Fagundes are still the chief secondary sources on these discoverers There have been notable additions to the bibliography of discovery and maps since Ganong wrote recently published works as well as the complete file of Ganong's correspondence with his fellow cartographer

G R F Prowse were consulted by Theodore E Layng Map Division Public Archives of Canada in preparing the commentaries which accompany this edition of Crucial Maps These commentaries with Mr Layng s introduction also provide an interesting sketch of Dr Ganong and his work Another important feature of this edition is the index prepared by William Morley of the John Carter Brown Library In much of his work Ganong was a pioneer and while subsequent studies have reached different conclusions on some points many of his results have seldom been challenged Students of the present and future will still use and quote from Crucial Maps Royal Society of Canada Special Publications No 7 *Sixteenth-century Maps Relating to Canada* Public Archives of Canada,1957 **Martin Waldseemüller's 'Carta marina' of 1516** Chet Van Duzer,2019-10-09 This open access book presents the first detailed study of one of the most important masterpieces of Renaissance cartography Martin Waldseemüller's Carta marina of 1516 By transcribing translating into English and detailing the sources of all of the descriptive texts on the map as well as the sources of many of the images the book makes the map available to scholars in a wholly unprecedented way In addition the book provides revealing insights into how Waldseemüller went about making the map information that can't be found in any other source The Carta marina is the result of Waldseemüller's radical re evaluation of what a world map should be he essentially started from scratch when he created it rejecting the Ptolemaic model and other sources he had used in creating his 1507 map and added more descriptive texts and a wealth of illustrations Given its content the book offers an essential reference work not only on this map but also for anyone working in sixteenth century European cartography *Animals and Maps* Wilma George,2023-11-15 *Animals and Maps* by Wilma George is an insightful and groundbreaking exploration of how animals have been depicted in maps throughout history This unique work reveals how early cartographers used animals not just as decorative elements but as significant markers of geography biodiversity and human animal relationships By meticulously analyzing historical maps George uncovers the hidden data about animal distribution and offers a scientific perspective on how early mapmakers interpreted and conveyed knowledge of the natural world This book highlights the role of animals in the visual language of cartography from medieval maps adorned with mythical creatures to Renaissance world maps illustrating exotic wildlife *Animals and Maps* presents a compelling fusion of cartographic history and zoological analysis providing readers with a deeper understanding of how animals have shaped and been shaped by human perceptions of the world A must read for those interested in cartography natural history and the intersections of science and art this book offers a fresh perspective on the world of maps This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1969 *The Rhinoceros of South Asia* Kees Rookmaaker,2024-04-30 The rhinoceros is an iconic animal Three species once inhabited South Asia two of which disappeared over a century ago This survey aims to reconstruct the historical

distribution of these large mammals resulting in new maps showing the extent of their occurrences Thousands of sources varied in time and nature are used to study the interactions between man and rhinoceros The text is supported by over 700 illustrations and 38 maps showing the importance of the rhinoceros in the scientific and cultural fabric of Asia and beyond

Discovering the Mammoth John J McKay,2017-08-08 The fascinating saga of solving the mystery of this ancient animal who once roamed the north country and has captivated our collective imagination ever since Today we know that a mammoth is an extinct type of elephant that was covered with long fur and lived in the north country during the ice ages But how do you figure out what a mammoth is if you have no concept of extinction ice ages or fossils Long after the last mammoth died and was no longer part of the human diet it still played a role in human life Cultures around the world interpreted the remains of mammoths through the lens of their own worldview and mythology When the ancient Greeks saw deposits of giant fossils they knew they had discovered the battle fields where the gods had vanquished the Titans When the Chinese discovered buried ivory they knew they had found dragons teeth But as the Age of Reason dawned monsters and giants gave way to the scientific method Yet the mystery of these mighty bones remained How did Enlightenment thinkers overcome centuries of myth and misunderstanding to reconstruct an unknown animal The journey to unravel that puzzle begins in the 1690s with the arrival of new type of ivory on the European market bearing the exotic name mammoth It ends during the Napoleonic Wars with the first recovery of a frozen mammoth The path to figuring out the mammoth was traveled by merchants diplomats missionaries cranky doctors collectors of natural wonders Swedish POWs Peter the Great Ben Franklin the inventor of hot chocolate and even one pirate McKay brings together dozens of original documents and illustrations some ignored for centuries to show how this odd assortment of characters solved the mystery of the mammoth and in doing so created the science of paleontology

Terrae Incognitae: Mapping the Unknown Carla Lois,2024-12-23 The blank spots on a map and the legends that speak of terrae incognitae are among the most seductive sirens of the cartographic imagination They hint at the existence of unknown lands yet tell us nothing about what they are or what they might be like Do such lands even exist How many types of terrae incognitae are there What does it mean and what has it meant to mark a land as unknown Why do so many maps of the last five centuries insist on reserving a place for unknown geographies This book navigates the cartographic unknown exploring its contribution to the history of knowledge and geographical culture

Crucial Maps in the Early Cartography and Place-nomenclature of the Atlantic Coast of Canada Royal Society of Canada,William Francis Ganong,1964 **Lies of the Land** Camille Serchuk,2025-01-14 Lies of the Land examines the often overlooked artistic roots of mapmaking practice in early modern France offering an original perspective on discourses of accuracy and their relationship to the pictorial origins of modern mapmaking Until the seventeenth century most mapmakers in France were painters Schooled in techniques of drawing and perspective and in the careful study of nature that we associate with early modernity they also learned the more expressive and imaginative Mannerist forms that dominated

French painting in this period Their maps draw on conventions of both painting and mapmaking to create beautiful informative and persuasive images for a wide variety of contexts and purposes In this book Camille Serchuk explores the strategies these cartographers deployed to weave together accuracy ornament and artifice in maps at all scales Looking beyond the techniques of measurement and perspective Serchuk shows how painterly interventions framed and manipulated the appearance and reception of cartographic objects *Lies of the Land* is an important new assessment of the character and status of early modern cartography that challenges binary distinctions between art and science and between decorative and epistemic images It will appeal especially to art historians and historians of sixteenth century France as well as scholars of map history

The Huntington Henry E. Huntington Library and Art Gallery, Peggy Park Bernal, 2003 The treasures of the Huntington literary historic artistic and botanical are captured in this beautiful volume Lavishly illustrated with nearly 130 full color photographs and containing a wealth of information about the collections the book is both a pictorial treat and a fascinating resource for anyone wanting to learn more about the Huntington

Early Mapping of Southeast Asia Thomas Suarez, 2012-08-07 With dozens of rare color maps and other documents *Early Mapping of Southeast Asia* follows the story of map making exploration and colonization in Asia from the 16th to the 19th centuries It documents the idea of Southeast Asia as a geographical and cosmological construct from the earliest of times up until the dawn of the modern era using maps itineraries sailing instructions traveler s tales religious texts and other contemporary sources it examines the representation of Southeast Asia both from the historical perspective of Western exploration and cartography and also through the eyes of Asian neighbors Southeast Asia has always occupied a special place in the imaginations of East and West This book recounts the fascinating story of how Southeast Asia was quite literally put on the map both in cartographic terms and as a literary and imaginative concept

Early Modern Nautical Charts of the Adriatic Sea Josip Faričić, Tome Marelić, 2025-08-13 This Open Access book provides a comprehensive and multi layered understanding of the development of Adriatic Sea nautical cartography from its beginnings in the late Middle Ages to the implementation of geodetic and hydrographic surveys in the early nineteenth century During the early modern period the importance of nautical charts exceeded mere navigational purpose as they also became a medium for conveying an extensive array of socioeconomic information and messages The authors examine how the geographical characteristics and social elements of the Adriatic Sea and its surroundings were observed understood and cartographically represented in accordance with contemporary scientific technological socioeconomic cultural or political frameworks using various phenomenological viewpoints and methodological techniques Since the Adriatic Sea has historically functioned as a smaller scale version of the Mediterranean its contents transcend its geographical boundaries and are also broadly applicable to other Mediterranean regions

Visual Voyages Daniela Bleichmar, 2017-01-01 An

unprecedented visual exploration of the intertwined histories of art and science of the old world and the new From the voyages of Christopher Columbus to those of Alexander von Humboldt and Charles Darwin the depiction of the natural world played a central role in shaping how people on both sides of the Atlantic understood and imaged the region we now know as Latin America Nature provided incentives for exploration commodities for trade specimens for scientific investigation and manifestations of divine forces It also yielded a rich trove of representations created both by natives to the region and visitors which are the subject of this lushly illustrated book Author Daniela Bleichmar shows that these images were not only works of art but also instruments for the production of knowledge with scientific social and political repercussions Early depictions of Latin American nature introduced European audiences to native medicines and religious practices By the 17th century revelatory accounts of tobacco chocolate and cochineal reshaped science trade and empire around the globe In the 18th and 19th centuries collections and scientific expeditions produced both patriotic and imperial visions of Latin America Through an interdisciplinary examination of more than 150 maps illustrated manuscripts still lifes and landscape paintings spanning four hundred years Visual Voyages establishes Latin America as a critical site for scientific and artistic exploration affirming that region s transformation and the transformation of Europe as vitally connected histories **Beyond**

Capricorn Peter Trickett,2007 Argues that in 1522 a century before the Dutch and 250 years before Captain Cook the Portuguese discovered and mapped parts of Australia and New Zealand Draws from primary and secondary historical sources archaeological evidence and stories handed down through Aboriginal oral tradition *The Black Ships* Jonathon Fairall,2025-01-03 Three men three voyages one century This book is about the beginning of the modern global order which was created around 1500 in one of the most marginal countries in Europe The Black Ships were the engines of the voyages of discovery which linked Europe to Asia for the first time The brutal men who sailed these ships were excited by neither the search for unknown lands nor by scientific curiosity but by the deadly contest between Christian and Muslim that consumed Europe for nearly a thousand years The men of Portugal determined that they would engage in the greatest and final crusade to rid the world of Islam To do so they forged new technologies that enabled them to cross oceans They never quite achieved their aims But they changed the world **Place Names of the Northern Peninsula** E. R. Seary,Memorial University of Newfoundland. Institute of Social and Economic Research,2000 Using 1954 1959 National Toponymic Series maps as a base point the study records the development of each name in map sources across a period beginning in the early sixteenth century up to the middle of the twentieth century Included is a map keyed to the study area a glossary of foreign terms a history of the mapping of Newfoundland names an analytical survey of the place names of the Northern Peninsula a gazetteer which present historical interpretive and linguistic notes a list of the maps consulted and a bibliography of the writings of E R Seary
