Burnham,1993 Seeks to discover why so many good people engage in activities that many including themselves consider bad finding a coalition of economic and social interest in which the singleminded quest for profit is allied to the values of the Victorian saloon underworld and bohemian rebelliousness **935 Lies** Charles Lewis,2014-06-24 Facts are and must be the coin of the realm in a democracy for government of the people by the people and for the people requires and assumes to some extent an informed citizenry Unfortunately for citizens in the United States and throughout the world distinguishing between fact and fiction has always been a formidable challenge often with real life and death consequences But now it is

more difficult and confusing than ever The Internet Age makes comment indistinguishable from fact and erodes authority It is liberating but annihilating at the same time For those wielding power whether in the private or the public sector the increasingly sophisticated control of information is regarded as utterly essential to achieving success Internal information is severely limited including calendars memoranda phone logs and emails History is sculpted by its absence Often those in power strictly control the flow of information corroding and corrupting its content of course using newspapers radio television and other mass means of communication to carefully consolidate their authority and cover their crimes in a thick veneer of fervent racialism or nationalism And always with the specter of some kind of imminent public threat what Hannah Arendt called objective enemies An epiphanic public comment about the Bush war on terror years was made by an unidentified White House official revealing how information is managed and how the news media and the public itself are regarded by those in power You journalists live in what we call the reality based community But that s not the way the world really works anymore We re an empire now and when we act we create our own reality we re history s actors and you all of you will be left to just study what we do And yet as aggressive as the Republican Bush administration was in attempting to define reality the subsequent Democratic Obama administration may be more so Into the battle for truth steps Charles Lewis a pioneer of journalistic objectivity His book looks at the various ways in which truth can be manipulated and distorted by governments corporations even lone individuals He shows how truth is often distorted or diminished by delay truth in time can save terrible erroneous choices In part a history of communication in America a cri de coeur for the principles and practice of objective reporting and a journey into several notably labyrinths of deception 935 Lies is a valorous search for honesty in an age of casual sometimes malevolent distortion of the facts **The Cigarette Century** Allan M.

Brandt,2009-01-06 The invention of mass marketing led to cigarettes being emblazoned in advertising and film deeply tied to modern notions of glamour and sex appeal It is hard to find a photo of Humphrey Bogart or Lauren Bacall without a cigarette No product has been so heavily promoted or has become so deeply entrenched in American consciousness And no product has received such sustained scientific scrutiny The development of new medical knowledge demonstrating the dire harms of smoking ultimately shaped the evolution of evidence based medicine In response the tobacco industry engineered a campaign of scientific disinformation seeking to delay disrupt and suppress these studies Using a massive archive of previously secret documents historian Allan Brandt shows how the industry pioneered these campaigns particularly using special interest lobbying and largesse to elude regulation But even as the cultural dominance of the cigarette has waned and consumption has fallen dramatically in the U S Big Tobacco remains securely positioned to expand into new global markets The implications for the future are vast 100 million people died of smoking related diseases in the 20th century in the next 100 years we expect 1 billion deaths worldwide **Tobacco Goes to College** Elizabeth Crisp Crawford,2014-03-24 This is the first book to document the history of cigarette advertising on college and university campuses From the 1920s to the

1960s such advertisers had a strong financial grip on student media and thus a degree of financial power over colleges and universities across the nation The tobacco industry s strength was so great many doubted whether student newspapers and other campus media could survive without them When the Tobacco Institute the organization that governed the industry decided to pull their advertising in June of 1963 nearly 2 000 student publications needed to recover up to 50 percent of their newly lost revenue Although student newspapers are the main focus of this book tobacco s presence on campus permeated more than just the student paper Cigarette brands were promoted at football games on campus radio and through campus representatives and promotional items were placed on campus in locations such as university stores and the student union
