Semantic Theory A Linguistic Perspective:

Semantic Theory Don Lee Fred Nilsen, Alleen Pace Nilsen, 1975 **Linguistic Perspectives on Literature** Marvin K.L. Ching, Michael C. Haley, Ronald F. Lunsford, 2014-01-10 Although linguistics is often a technical and increasingly abstruse discipline many linguists retain a concern for the way in which linguistics can shed light on literature and literary problems In their introductory chapter the editors of this collection of essays by linguists on either side of the Atlantic enunciate a bold stance that defines the theoretical relationship between linguistics and literature delimits what should be considered a linguistic analysis of literature and explains how such an analysis is related to current theories of readership and literary criticism The editors theory of the relationship between linguistic and literary studies stipulates an eclectic rather than a holistic approach and the essays they have gathered together reflect this belief The contributions include such varied approaches as transformational grammar text grammar and speech act theory and the topics analysed include many that are at the heart of literature such as topicalization imagery figurative language ambiguity and the play on words through puns The anthology as a whole illustrates how linguistic theory illuminates the very nature of literary language It also gives evidence of the new insights into literature that have arisen from a close analysis of the language in which the literature is encoded Cognitive Neural Mechanism of Semantic Rhetoric Qiaoyun Liao, Lijun Meng, 2022-10-21 This book is a necessary supplement to the theoretical exploration into semantic rhetoric particularly a breakthrough in the study of the relationship between the source domain and target domain involved in the construction of semantic rhetorical discourse The study focuses on rhetorical expressions constructed by means of semantic variation or deviation of concepts Based on the holistic cognitive pragmatic model and the framework of impartment and inheritance of connotation and denotation this book constructs a new framework the Annotation Denotation Relevance Inheritance Model ADRIM to explain the construing of semantic rhetoric Besides rooted in the Index Hypothesis Theory and the research paradigm of affordance derivation in language comprehension three ERP experiments on metaphor irony and pun are conducted to demonstrate the psychological reality that people activate possible feature extraction in the process of understanding semantic rhetoric With those sample analyses and experiments the feasibility and operability of ADRIM are proved The book unfolds a combined approach of speculative research and empirical research and can provide a new methodological alternative for semantic rhetorical studies in different languages This title will be an essential read to students and scholars of Linguistics East Asian Studies and social workers who are interested in Language Studies in general The Language of Memory in a Crosslinguistic Perspective Mengistu Amberber, 2007 This book offers for the first time a detailed comparative study of how speakers of different languages express memory concepts While there is a robust body of psycholinguistic research that bears on how memory and language are related there is no comparative study of how speakers themselves conceptualize memory as reflected in their use of language to talk about memory This book addresses a key question how do speakers of different

languages talk about the experience of having prior experiences coming to mind remembering or failing to come to mind forgetting A complex array of answers is provided through detailed grammatical and semantic investigation of different languages including English German Polish Russian and also a number of non Indo European languages Amharic Cree Dalabon Korean and Mandarin In addition the book calls for a broader interdisciplinary engagement by urging that cognitive semantics be integrated with other sciences of memory The Handbook of Contemporary Semantic Theory Shalom

Lappin,Chris Fox,2019-02-12 The second edition of The Handbook of Contemporary Semantic Theory presents a comprehensive introduction to cutting edge research in contemporary theoretical and computational semantics Features completely new content from the first edition of The Handbook of Contemporary Semantic Theory Features contributions by leading semanticists who introduce core areas of contemporary semantic research while discussing current research Suitable for graduate students for courses in semantic theory and for advanced researchers as an introduction to current theoretical work **Demonstratives in Cross-Linguistic Perspective** Stephen C. The Syntax and Semantics of Noun Modifiers and the Theory of Universal Grammar Min-Joo Kim,2019-03-20 This book takes Korean as a basis to provide a detailed universal Determiner Phrase DP structure Adnominal adjectival expressions are apparently optional noun dependents but their syntax and semantics have been shown to provide an important window on the internal structure of DP By carefully examining data from Korean an understudied language as well as from other unrelated languages the book provides a broad perspective on the phenomenon of noun modification and its cross linguistic variations Furthermore it offers not only a thorough syntactic analysis but also a formal semantic analysis of noun modifiers that extends beyond a single language This book will be of great interest to researchers interested in theoretical syntax its interfaces with semantics pragmatics linguistic typology and language variation *Resources in*

Semantics Charles W. Kreidler,1998 Annotation Focusing on the English language this comprehensive and accessible introduction to semantics explores how languages organize and express meaning through words parts of words and sentences This title available in eBook format Click here for more information Visit our eBookstore at www.ebookstore.tandf.co.uk **Semiotic Principles in Semantic Theory** Neal R. Norrick,1981-01-01 This study represents a contribution to the theory of meaning in natural language It proposes a semantic theory containing a set of regular relational principles These principles enable semantic theory to describe connections from the lexical reading of a word to its figurative contextual reading from one variant reading of a polysemous lexical item to another from the idiomatic to its literal reading or to the literal reading s of one or more of its component lexical items Semiotic theory provides a foundation by supplying principles

defining motivated expression content relations for signs generally The author argues that regular semantic relational principles must derive from such semiotic principles to ensure the psychological reality and generality of the semantic principles

The Interface between Scientific and Technical Translation Studies and Cognitive Linguistics Ralph Krüger, 2015-04-17 Scientific and Technical Translation STT is a highly complex and knowledge intensive field of translation and cognitive linguistics is a usage based linguistic framework which provides powerful theoretical tools for modelling knowledge organisation and representation in discourse This book explores the interface between scientific and technical translation studies and cognitive linguistics by discussing the epistemological contextual textual and cross linguistic dimensions of scientific and technical translation from a cognitive linguistic perspective Particular emphasis is placed on explicitation and implicitation as indicators of the interaction between text and context in STT The corpusbased investigation of the two phenomena illustrates the complex knowledge requirements pertaining to scientific and technical translation and demonstrates the explanatory power of cognitive linguistics with regard to important textual and contextual aspects of STT

Foundations of Speech Act Theory S.L. Tsohatzidis, 2002-09-11 Foundations of Speech Act Theory investigates the importance of speech act theory to the problem of meaning in linguistics and philosophy The papers in this volume written by respected philosophers and linguists significantly advance standards of debate in this area Beginning with a detailed introduction to the individual contributors this collection demonstrates the relevance of speech acts to semantic theory It includes essays unified by the assumption that current pragmatic theories are not well equipped to analyse speech acts satisfactorily and concludes with five studies which assess the relevance of speech act theory to the understanding of philosophical problems outside the area of philosophy of language

Theory and description in African Linguistics Emily Clem , Peter Jenks , Hannah Sande , 2019 The papers in this volume were presented at the 47th Annual Conference on African Linguistics at UC Berkeley in 2016 The papers offer new descriptions of African languages and propose novel theoretical analyses of them The contributions span topics in phonetics phonology syntax semantics and pragmatics and reflect the typological and genetic diversity of languages in Africa Four papers in the volume examine Areal Features and Linguistic Reconstruction in Africa and were presented at a special workshop on this topic held alongside the general session of ACAL

Culture and Language Use Gunter Senft, Jan-Ola Östman, Jef Verschueren, 2009-06-25 The ten volumes of Handbook of Pragmatics Highlights focus on the most salient topics in the field of pragmatics thus dividing its wide interdisciplinary spectrum in a transparent and manageable way While other volumes select philosophical cognitive grammatical social variational interactional or discursive angles this second volume reviews basic topics and traditions that place language use in its cultural context As emphasized in the introduction and as revealed in the choice of articles culture is by no means to be seen as standing in opposition to society and cognition on the contrary the notion cannot be understood without insight into the intricate interactions of social and cognitive structures and processes In addition to the topical

articles a number of contributions to this volume is devoted to aspects of methodology Others highlight the role of eminent scholars who have made the study of cultural dimensions of language use into what it is today *New Perspectives on Romance Linguistics* Chiyo Nishida, Jean-Pierre Y. Montreuil, 2006-08-31 This is the first of two volumes emanating from the Linguistic Symposium on Romance Languages held at the University of Texas at Austin in February 2005 It features the keynote address delivered by Denis Bouchard on exaptation and linguistic explanation as well as seventeen contributions by emerging and internationally recognized scholars of Spanish French Italian as well as Rumanian While the emphasis bears on formal analyses the coverage is remarkably broad as topics range from morphology syntax semantics pragmatics and language acquisition Each article seeks to represent a new perspective on these topics and a variety of frameworks and concepts are exploited distributive morphology entailment theory grammaticalization information structure left periphery polarity lattice spatial individuation thematic hierarchy etc This volume will challenge anyone interested in current issues in theoretical Romance Linguistics Theory and Practice of Writing William Grabe, Robert B. Kaplan, 2014-09-25 This book undertakes a general framework within which to consider the complex nature of the writing task in English both as a first and as a second language The volume explores varieties of writing different purposes for learning to write extended text and cross cultural variation among second language writers The volume overviews textlinguistic research explores process approaches to writing discusses writing for professional purposes and contrastive rhetoric It proposes a model for text construction as well as a framework for a more general theory of writing Later chapters organised around seventy five themes for writing instruction are devoted to the teaching of writing at the beginning intermediate and advanced levels Writing assessment and other means for responding to writing are also discussed William Grabe and Robert Kaplan summarise various theoretical strands that have been recently explored by applied linguists and other writing researchers and draw these strands together into a coherent overview of the nature of written text Finally they suggest methods for the teaching of writing consistent with the nature processes and social context of writing **Words and the Mind** Barbara Malt, Phillip Wolff, 2010-03 The study of word meanings promises important insights into the nature of the human mind by revealing what people find to be most cognitively significant in their experience However as we learn more about the semantics of various languages we are faced with an interesting problem Different languages seem to be telling us different stories about the mind For example important distinctions made in one language are not necessarily made in others What are we to make of these cross linguistic differences How do they arise Are they created by purely linguistic processes operating over the course of language evolution Or do they reflect fundamental differences in thought In this sea of differences are there any semantic universals Which categories might be given by the genes which by culture and which by language And what might the cross linguistic similarities and differences contribute to our understanding of conceptual and linguistic development The kinds of mapping principles structures and processes that link language and non linguistic knowledge must

accommodate not just one language but the rich diversity that has been uncovered. The integration of knowledge and methodologies necessary for real progress in answering these questions has happened only recently as experimental approaches have been applied to the cross linguistic study of word meaning. In *Words and the Mind*, Barbara Malt and Phillip Wolff present evidence from the leading researchers who are carrying out this empirical work on topics as diverse as spatial relations, events, emotion, terms, motion events, objects, body part terms, causation, color categories, and relational categories. By bringing them together, Malt and Wolff highlight some of the most exciting cross linguistic and cross cultural work on the language thought interface from a broad array of fields including linguistics, anthropology, cognitive and developmental psychology, and cognitive neuropsychology. Their results provide some answers to these questions and new perspectives on the issues surrounding them.

Exploring Grammatical Metaphor Zhong Yang, 2025-06-30. This book explores the fascinating world of grammatical metaphor through the lens of systemic functional linguistics. It provides a valuable toolkit for understanding how grammatical metaphor can expand the potential for meaning and serve as a key resource for bridging linguistic and cultural gaps in different contexts. Grammatical metaphor is presented not merely as a linguistic feature but as a powerful tool that transforms meaning across grammatical categories. This book examines how this phenomenon of transcategorisation works, showing how it shifts and enriches the representation of meaning. Using the framework of systemic functional linguistics, the book emphasises the dynamic relationship between language systems and the texts they produce. Combining theory and practice, it investigates the wide ranging applications of grammatical metaphor in fields such as contrastive linguistics, discourse analysis, and translation studies. Readers will discover how grammatical metaphor increases the flexibility and depth of language, enabling speakers and writers to achieve more nuanced and effective communication. This book will be essential reading for linguists, language learners, translators, and intercultural communicators. Whether you are a researcher or a practitioner, this book will inspire new ways of thinking about language and communication.

Where Semantics meets Pragmatics Klaus von Stechow, Ken Turner, 2021-10-25. The Current Research in the Semantic Pragmatics Interface series has carved out a new and vibrant area of research. This volume offers the reader a state of the art record of new and established research in this area. Von Stechow and Turner's careful selection of topics and contributors ensures that each chapter integrates semantic and pragmatic facts into a single theory that each finds an adequate division of theoretical labour and that each attempts to design and corroborate an elegant account of meaning and use that would be compatible with other aspects of human behaviour. Importantly, each paper in the volume focuses on linguistic detail, not merely abstract discussions of a theoretical nature. Thus, each paper makes extensive reference to the semantic and pragmatic facts of English and also other languages. This reference gives each of the proposed analyses a more adequate empirical edge and a sharper theoretical focus. This book is a must for all scholars and students interested in the new and vibrant discipline of semantics/pragmatics and to anyone who is fascinated by the prospect of working beyond the traditional

disciplinary boundaries of linguistics and the philosophy of language The chapters in this volume originate from a workshop at the Linguistic Society of America Summer Institute held at Michigan State University
