Looking For Flavour:

Search for Flavor-Changing Neutral Current Top Quark Decays $t \rightarrow Hq$, with $H \rightarrow b\bar{b}$, in pp Collisions at $\sqrt{s} = 8$ TeV with the ATLAS Detector Shota Tsiskaridze, 2017-08-02 This PhD thesis focuses on the search for flavor changing neutral currents in the decay of a top quark to an up type quark $q = u, c$ and the Standard Model Higgs boson where the Higgs boson decays to $b\bar{b}$. Further the thesis presents the combination of this search for top quark pair events with other ATLAS searches in the course of which the most restrictive bounds to date on tqH interactions were obtained. Following on from the discovery of the Higgs boson it is particularly important to measure the Yukawa couplings of the Standard Model fermions; these parameters may provide crucial insights to help solve the flavor puzzle and may help reveal the presence of new physics before it is directly observed in experiments. **Report on the Trial of New Varieties of Hops** East Malling Research Station, 1918

Miracle Brew Pete Brown, 2017-10-02 The Guardian's Best Books on Drink Pick Most people know that wine is created by fermenting pressed grape juice and cider by pressing apples. But although it's the most popular alcoholic drink on the planet, few people know what beer is made of. In lively and witty fashion, *Miracle Brew* dives into traditional beer's four natural ingredients: malted barley, hops, yeast, and water, each of which has an incredible story to tell. From the Lambic breweries of Belgium where beer is fermented with wild yeasts drawn down from the air around the brewery to the aquifers below Burton on Trent where the brewing water is rumored to contain life-giving qualities, *Miracle Brew* tells the full story behind the amazing role each of these fantastic four—a grass, a weed, a fungus, and water—has to play. Celebrated UK beer writer Pete Brown travels from the surreal madness of drink-sodden hop blessings in the Czech Republic to Bamberg in the heart of Bavaria where malt smoked over an open flame creates beer that tastes like liquid bacon. He explores the origins of fermentation, the lost age of hallucinogenic grain beers, and the evolution of modern hop varieties that now challenge wine grapes in the extent to which they are discussed and revered. Along the way, readers will meet and drink with a cast of characters who reveal the magic of beer and celebrate the joy of drinking it. And almost without noticing, we'll learn the naked truth about the world's greatest beverage. **Characterization, production and application of food flavours**
