Secret Agent X Brant House, 2004-07-01 From the pages of the September 1935 issue of Secret Agent X comes this sensational full-length novel. Legions of the Living Dead From nowhere hurtled that black death car. And from nowhere came its grisly occupants. They were not of the earth for their human flesh was immune to bullets. They were not of the grave for they manned the wheel and a blasting machine gun. Secret Agent X made a desperate maneuver to block their invasion of the land of the living. And in that weird terror trap he came face to face with a man he knew a man he knew had died five years ago.

**English Text** J.R. Martin, 1992-11-18 This book is a comprehensive introduction to text-forming resources in English, along with practical procedures for analysing English texts and relating them to their contexts of use. It has been designed to complement functional grammars of English, building on the generation of discourse analysis inspired by Halliday and Hasan's *Cohesion in English*. The analyses presented were developed within three main theoretical and applied contexts: i) educational linguistics, especially genre-based literacy programmes; ii) critical linguistics as manifested in the development of social semiotics; and iii) computational linguistics in dialogue with the various text-generation projects based on systemic approaches to grammar and discourse. *English Text*'s major contribution is to outline one way in which a rich, semantically oriented functional grammar can be systematically related to a theory of discourse semantics, including deconstruction of contextual issues, i.e. register, genre, and ideology. The chapters have been organized with the needs of undergraduate students in theoretical linguistics and postgraduate students in applied linguistics in mind.

Alexiadou, Tibor Kiss, Gereon Müller, 2012-12-06 Syntactic dependencies are often non local They can involve two positions in a syntactic structure whose correspondence cannot be captured by invoking concepts like minimal clause or predicate argument structure Relevant phenomena include long distance movement long distance reflexivization long distance agreement control non local deletion long distance case assignment consecutio temporum extended scope of negation and semantic binding of pronouns A recurring strategy pursued in many contemporary syntactic theories is to model cases of non local dependencies in a strictly local way by successively passing on the relevant information in small domains of syntactic structures The present volume brings together eighteen articles that investigate non local dependencies in movement agreement binding scope and deletion constructions from different theoretical backgrounds among them versions of the Minimalist Program HPSG and Categorical Grammar and based on evidence from a variety of typologically distinct languages This way advantages and disadvantages of local treatments of non local dependencies become evident Furthermore it turns out that local analyses of non local phenomena developed in different syntactic theories spanning the derivational declarative divide often may not only share identical research questions but also rely on identical research strategies      Survey of the
