for severe flooding the Rh ne France s most powerful river has long influenced the economy politics and transportation networks of Europe Humans have tried to control the Rh ne for over two thousand years but large scale development did not occur until the twentieth century The Rh ne valley has undergone especially dramatic changes since World War II

Hydroelectric plants nuclear reactors and industrialized agriculture radically altered the river as they simultaneously fueled both the physical and symbolic reconstruction of France In *Confluence* Sara B Pritchard traces the Rh ne s remaking since 1945 She interweaves this story with an analysis of how state officials technical elites and citizens connected the

environment and technology to political identities and state building In the process Pritchard illuminates the relationship between nature and nation in France Pritchard s innovative integration of science and technology studies environmental history and the political history of modern France makes a powerful case for envirotechnical analysis an approach that

highlights the material and rhetorical links between ecological and technological systems Her groundbreaking book demonstrates the importance of environmental management and technological development to culture and politics in the twentieth century As Pritchard shows reconstructing the Rh ne remade France itself **Twenty-Seventh International**
