Mistakes Of Reason Essays In Honour Of John Woods:

Mistakes of Reason John Hayden Woods, 2005-01-01 Over a distinguished academic career the Canadian philosopher and scholar John Woods has written on a rich variety of topics central to contemporary philosophy These include the history and philosophy of logic deviant logics inductive and abductive reasoning informal reasoning fallacy theory the logic of fiction epistemology and abortion and euthanasia Not only has Woods work been significant in itself it has also stimulated others working in these fields *Mistakes of Reason* is a tribute to Woods and contains twenty six new essays by leading Canadian and international philosophers The essays are accompanied by commentaries by Woods himself creating a unique dialogue between Woods and his colleagues Editors Kent A Peacock and Andrew D Irvine have grouped the works under the themes of Reality Knowledge Logic and Language Reasoning and Values The essays evaluate Woods work and celebrate the generous contribution that he has made to Canada s intellectual development over the past forty years *Pondering on Problems of Argumentation* Frans H. van Eemeren, Bart Garssen, 2009-02-11 *Pondering on Problems of Argumentation* is a collection of twenty essays brought together for anyone who is interested in theoretical issues in the study of argumentation This collection of papers gives the reader an insightful and balanced view of the kind of theoretical issues argumentation theorists are currently concerned with Because most of the perspectives on argumentation that are en vogue are represented this volume provides a multidisciplinary and even interdisciplinary outlook on the current state of affairs in argumentation theory Some of the contributions in *Pondering on Problems of Argumentation* deal with problems of argumentation that have been recognized as theoretical issues for a considerable time like the problems of fallaciousness and identifying argumentation structures Other contributions discuss issues that have become a focus of attention only recently or regained their prominence such as the relationship between dialectic and rhetoric and the strategic use of the argumentative technique of dissociation In five separate sections papers are included dealing with argumentative strategies problems of norms of reasonableness and fallaciousness types of argument and argument schemes the structure of argumentation and rules for advocacy and discussion Epistemology, Knowledge and the Impact of Interaction Juan Redmond, Olga Pombo Martins, Ángel Nepomuceno Fernández, 2016-04-28 With this volume of the series *Logic Epistemology and the Unity of Science* edited by S Rahman et al a challenging dialogue is being continued The series first volume argued that one way to recover the connections between logic philosophy of sciences and sciences is to acknowledge the host of alternative logics which are currently being developed The present volume focuses on four key themes First of all several chapters unpack the connection between knowledge and epistemology with particular focus on the notion of knowledge as resulting from interaction Secondly new epistemological perspectives on linguistics the foundations of mathematics and logic physics biology and law are a subject of analysis Thirdly several chapters are dedicated to a discussion of Constructive Type Theory and more generally of the proof theoretical notion of meaning Finally the book brings together studies on the epistemic role

of abduction and argumentation theory both linked to non monotonic approaches to the dynamics of knowledge On Reasoning and Argument David Hitchcock,2017-04-06 This book brings together in one place David Hitchcock s most significant published articles on reasoning and argument In seven new chapters he updates his thinking in the light of subsequent scholarship Collectively the papers articulate a distinctive position in the philosophy of argumentation Among other things the author develops an account of material consequence that permits evaluation of inferences without problematic postulation of unstated premises updates his recursive definition of argument that accommodates chaining and embedding of arguments and allows any type of illocutionary act to be a conclusion advances a general theory of relevance provides comprehensive frameworks for evaluating inferences in reasoning by analogy means end reasoning and appeals to considerations or criteria argues that none of the forms of arguing ad hominem is a fallacy describes proven methods of teaching critical thinking effectively Arguing on the Toulmin Model David Hitchcock,Bart Verheij,2007-01-24 Summarizing in The Uses of Argument Toulmin emphasized a number of points that are by now familiar but still deserve attention 1 Reasoning and argument involve not only support for points of view but also attack against them 2 Reasoning can have qualified conclusions 3 There are other good types of argument than those of standard formal logic 4 Unstated assumptions linking premisses to a conclusion are better thought of as inference licenses than as implicit premisses 5 Standards of reasoning can be field dependent and can be themselves the subject of argumentation Each of these points is illustrated by his layout of arguments The rebuttal illustrates the first point the qualifier the second point and the warrant and backing the last three points 2 RECEPTION OF TOULMIN S BOOK As Toulmin himself notes in his essay in this volume which was delivered as an address in 2005 his fellow philosophers were initially hostile to the ideas in his book They were taken up however by specialists in fields like jurisprudence and psychology who found that they fit the forms of argument and reasoning that they were studying And Toulmin s model was embraced by the field of speech communication in the United States whose textbooks on argumentation now include an obligatory chapter on the Toulmin model of micro arguments Russell vs. Meinong Nicholas Griffin,Dale Jacquette,2008-11-19 A century after On Denoting was published the debate it initiated continues to rage On the one hand there is a mass of new historical scholarship about both Russell and Meinong which has not circulated very far beyond specialist scholars On the other hand there are continuing problems and controversies concerning contemporary Russellian and Meinongian theories many of them involving issues that simply did not occur to the original protagonists This work provides an overview of the latest historical scholarship on the two philosophers as well as detailed accounts of some of the problems facing the current incarnations of their theories Truth in Fiction John Woods,2018-02-23 This monograph examines truth in fiction by applying the techniques of a naturalized logic of human cognitive practices The author structures his project around two focal questions What would it take to write a book about truth in literary discourse with reasonable promise of getting it right What would it take to write a book about truth in

fiction as true to the facts of lived literary experience as objectivity allows. It is argued that the most semantically distinctive feature of the sentences of fiction is that they are unambiguously true and false together. It is true that Sherlock Holmes lived at 221B Baker Street and also concurrently false that he did. A second distinctive feature of fiction is that the reader at large knows of this inconsistency and isn't in the least cognitively molested by it. Why it is asked would this be so? What would explain it? Two answers are developed. According to the no contradiction thesis the semantically tangled sentences of fiction are indeed logically inconsistent but not logically contradictory. According to the no bother thesis if the inconsistencies of fiction were contradictory a properly contrived logic for the rational management of inconsistency would explain why readers at large are not thrown off cognitive stride by their embrace of those contradictions. As developed here the account of fiction suggests the presence of an underlying three or four valued dialethic logic. The author shows this to be a mistaken impression. There are only two truth values in his logic of fiction. The naturalized logic of Truth in Fiction jettisons some of the standard assumptions and analytical tools of contemporary philosophy chiefly because the neurotypical linguistic and cognitive behaviour of humanity at large is at variance with them. Using the resources of a causal response epistemology in tandem with the naturalized logic the theory produced here is data driven empirically sensitive and open to a circumspect collaboration with the empirical sciences of language and cognition.

Approaches to Legal Rationality Dov M.

Gabbay, Patrice Canivez, Shahid Rahman, Alexandre Thiercelin, 2010-10-04. Legal theory political sciences sociology philosophy logic artificial intelligence. There are many approaches to legal argumentation. Each of them provides specific insights into highly complex phenomena. Different disciplines but also different traditions in disciplines e.g. analytical and continental traditions in philosophy find here a rare occasion to meet. The present book contains contributions both historical and thematic from leading researchers in several of the most important approaches to legal rationality. One of the main issues is the relation between logic and law: the way logic is actually used in law but also the way logic can make law explicit. An outstanding group of philosophers, logicians and jurists try to meet this issue. The book is more than a collection of papers. However, different their respective conceptual tools may be, the authors share a common conception: legal argumentation is a specific argumentation context.

Model-Based Reasoning in Science and Technology Lorenzo Magnani, 2013-08-31

This book contains contributions presented during the international conference on Model Based Reasoning (MBR 012) held on June 21-23 in Sestri Levante, Italy. Interdisciplinary researchers discuss in this volume how scientific cognition and other kinds of cognition make use of models: abduction and explanatory reasoning in order to produce important or creative changes in theories and concepts. Some of the contributions analyzed the problem of model based reasoning in technology and stressed the issues of scientific and technological innovation. The book is divided in three main parts: models, mental models, representations, abduction, problem solving and practical reasoning, historical, epistemological and technological issues. The volume is based on the papers that were presented at the international

A Logical Approach to Philosophy David

DeVidi, Tim Kenyon, 2006-07-10 Graham Solomon to whom this collection is dedicated went into hospital for antibiotic treatment of pneumonia in October 2001 Three days later on Nov 1 he died of a massive stroke at the age of 44 Solomon was well liked by those who got the chance to know him it was a revelation to find out when helping to sort out his affairs after his death how many friends he had whom he had actually never met as his email included correspondence with philosophers around the world running sometimes to hundreds of messages He was well respected in the philosophical community more broadly He was for several years a member of the editorial board for the Western Ontario Series in Philosophy of Science While he was employed at Wilfrid Laurier University in Waterloo Ontario several of us at the University of Waterloo always regarded our own department as a sort of second academic home for him We therefore decided that it would be appropriate to hold a memorial conference in his honour Thanks to the generous financial support of the Humphrey Conference Fund we were able to do so in May 2003 Many of the papers in this volume were presented at that conference **The**

De-mathematisation of Logic Barry Hartley Slater, 2007 **Scientific Theories and Philosophical Stances** Claus Beisbart, Michael Frauchiger, 2024-05-20 Since the publication of his seminal monograph *The scientific image* Bas van Fraassen is a key figure in philosophy of science In this book other philosophers with various outlooks critically discuss his work on theories empiricism and philosophical stances The book starts with a new article by van Fraassen on his preferred account of theories the so called semantic view This account is now 50 years old and van Fraassen takes this anniversary as an opportunity to review the account its history and the philosophical discussion about it In the main part of the book Nancy Cartwright Finnur Dellsén Matthias Egg Steven French Michael Friedman Milena Ivanova and Michela Massimi discuss van Fraassen's contributions to philosophy Three chapters focus on his engagement with realism French Friedman Ivanova Others study his voluntarism Cartwright and his view on representation Massimi Finally there are contributions about his elaboration of empiricism Dellsén and his proposal to consider philosophical positions as stances Egg The volume includes a laudatio written by Steven French and finishes with a reply by van Fraassen to his critics **Games: Unifying Logic,**

Language, and Philosophy Ondrej Majer, Ahti-Veikko Pietarinen, Tero Tulenheimo, 2009-01-16 Ondrej Majer Ahti Veikko Pietarinen and Tero Tulenheimo 1 Games and logic in philosophy Recent years have witnessed a growing interest in the unifying methodologies over what have been perceived as pretty disparate logical systems or else merely an assortment of formal and mathematical approaches to philosophical inquiry This development has largely been fueled by an increasing dissatisfaction to what has earlier been taken to be a straightforward outcome of logical pluralism or methodological diversity These phrases appear to reflect the everyday chaos of our academic pursuits rather than any genuine attempt to clarify the general principles underlying the miscellaneous ways in which logic appears to us But the situation is changing Unity among plurality is emerging in contemporary studies in logical philosophy and neighbouring disciplines This is a necessary follow up to the intensive research into the intricacies of logical systems and methodologies performed over the

recent years The present book suggests one such peculiar but very unrestrained methodological perspective over the field of logic and its applications in mathematics language or computation games An allegory for opposition cooperation and coordination games are also concrete objects of formal study *The Cambridge Companion to Ancient Logic* Luca Castagnoli, Paolo Fattori, 2023-03-02 A state of the art overview of ancient logic for students and scholars with in depth analyses of its central themes *Bas van Fraassen's Approach to Representation and Models in Science* Wenceslao J. Gonzalez, 2014-02-19 This book analyzes Bas van Fraassen's characterization of representation and models in science In this regard it presents the philosophical coordinates of his approach and pays attention to his structural empiricism as a framework for his views on scientific representations and models These are developed here through two new contributions made by van Fraassen In addition there are analyses of the relation between models and reality in his approach where the complexity of this conception is considered in detail Furthermore there is an examination of scientific explanation and epistemic values judgments This volume includes a wealth of bibliographical information on his philosophy and relevant philosophical issues Bas van Fraassen is a key figure in contemporary philosophy of science as the prestigious Hempel Award shows His views on scientific representation offer new ideas on how it should be characterized and his conception of models shows a novelty that goes beyond other empiricists approaches of recent times Both aspects the characterization of scientific representation and the conception of models in science are part of a deliberate attempt to forge a structural empiricism an alternative to structural realism based on an elaborated version of empiricism *Reasonable Responses* Catherine E. Hundleby, 2017-01-17 This tribute to the breadth and influence of Trudy Govier's philosophical work begins with her early scholarship in argumentation theory paying special attention its pedagogical expression Most people first encounter Trudy Govier's work and many people only encounter it through her textbooks especially *A Practical Study of Argument* published in many editions In addition to the work on argumentation that has continued throughout her career much of Govier's later work addresses social philosophy and the problems of trust and response to moral wrongs The introduction by Catherine Hundleby situates Govier's research along the path of her unusual academic life While following the timeline of Govier's research publication in this collection the authors build on her work and suggest certain new connections between her argumentation theory and social philosophy *A Practical Study of Argument* first published in 1985 situates Govier among a distinct segment of informal logicians whose concerns about teaching reasoning to post secondary students orient their research Takuzo Konishi argues Moira Kloster evaluates Govier's progress in the challenge of providing critical thinking education to diverse and changing social contexts Shifting gears to social philosophy but still addressing education Laura Elizabeth Pinto explores the significance of Govier's work on trust for explaining the problem of audit culture for teaching At the centre of this volume social philosophy receives an abstract meta ethical defense from Linda Radzik Moving solidly into the domain of normative social philosophy Alice MacLachlan reconsiders Govier's condemnation of revenge by viewing it as a

form of moral address but she notes how revenge as an act of communication contrasts with argumentation in lacking the respect that Govier maintains is intrinsic to argumentation MacLachlan ultimately agrees that revenge is morally indefensible The practical challenges of addressing others in the aftermath of wrongdoing especially in public contexts can make it difficult to distinguish between victims and combatants or wrongdoers Alistair Little and Wilhelm Verwoerd explain and Kathryn Norlock argues that forgiveness is psychologically vexed too People may recognize transformation to be in principle possible for all people Norlock argues and yet we may find the evidence regarding some particular evildoer sufficient to count that person as an exception Finally Govier responds to the various papers

Cognitive Dynamics in Linguistic Interactions Alexander Kravchenko, 2012-03-15 In the era of globalization issues of international and intercultural communication in different professional areas become even more acute There is a growing demand to increase the efficiency of higher learning educational programs called upon to enhance second or foreign language communicative competence of would be specialists Yet the existing methods of teaching a foreign or second language are far from being satisfactory in terms of expected efficiency This is symptomatic of a general methodological problem we lack holistic understanding of how natural language shapes the cognitive domain of human interactions Orthodox linguistic science is based on a premise that language is a tool for expressing and conveying thought thus making communication between humans possible This dualistic assumption ignores the fact that just as there may be no language without interacting human subjects there may be no human thought or largely humanness to speak of without languaging as species specific behavior because we as humans happen in language Maturana The study of language therefore must focus on the dynamics of linguistic interactions and dialogue should be pursued between applied linguists and theoreticians about the conceptual theoretic foundations of linguistic education This volume is just such an attempt

The Uses of Argument Daniel Farr, Ontario Society for the Study of Argumentation, 2005

Thinking and Calculating Francesco Ademollo, Fabrizio Amerini, Vincenzo De Risi, 2022-07-04 This volume collects 22 essays on the history of logic written by outstanding specialists in the field The book was originally prompted by the 2018 2019 celebrations in honor of Massimo Mugnai a world renowned historian of logic whose contributions on Medieval and Modern logic and to the understanding of the logical writings of Leibniz in particular have shaped the field in the last four decades Given the large number of recent contributions in the history of logic that have some connections or debts with Mugnai's work the editors have attempted to produce a volume showing the vastness of the development of logic throughout the centuries We hope that such a volume may help both the specialist and the student to realize the complexity of the history of logic the large array of problems that were touched by the discipline and the manifold relations that logic entertained with other subjects in the course of the centuries The contributions of the volume in fact span from Antiquity to the Modern Age from semantics to linguistics and proof theory from the discussion of technical problems to deep metaphysical questions and in it the history of logic is kept in dialogue with the history of mathematics economics and

the moral sciences at large Liberty, Games and Contracts Malcolm Murray, 2016-05-06 Jan Narveson is one of the most significant contemporary defenders of the libertarian political position Unlike other libertarians who typically defend their view with reference to natural rights or an appeal to utilitarianism Narveson's main contribution has been to offer a philosophical defence of libertarianism based on a Hobbesian individualist contractarian ethic Critiques of Narveson's contractarian libertarianism fall into three categories those that reject contractarian moral theory those that reject any link between contractarianism and libertarianism and those that accuse libertarians of conflating liberty with property In this book Malcolm Murray brings together the most significant of Narveson's critics and presents their work alongside replies by Jan Narveson
