J. Jaffe, Herbert F. Spirer, 1987 The Misuse, Misrepresentation, and Politicization of Statistics in American Society Robert E. Parker, 2022-07-18 The Misuse Misrepresentation and Politicization of Statistics in American Society critically examines the early measurement efforts of several government agencies responsible for some of the most widely watched social indicators on unemployment life expectancy crime and population It argues that official statistics are dubious at best better seen not so much as objective barometers of social life but rather as socially constructed metrics that are easily manipulated and often politicized This book argues that official statistics powerfully frame social reality ultimately helping to determine who counts and what matters in society It makes the case that as with other types of official accounts data derived from government sources needs to be regarded skeptically and systematically investigated This book concludes that official statistics are a kind of sanctioned cover up of everyday reality hiding the true extent of joblessness distorting the real increase in life expectancy obscuring where crime actually happens and understating the undeniable growth of minority populations **Misused Statistics** Herbert Spirer, Louise Spirer, 1998-07-16 Revised and updated edition of a standard in the field Alerts readers to the problems inherent in statistical practice illustrating the types of misused statistics with well documented real world examples nearly half new to this edition drawn from a wide range of areas including the media public policy polls and surveys political election **Business Statistics** J. Sex, Drugs, and Body Counts Peter Andreas, Kelly M. Greenhill, 2011-05-15 At least 200 000 250 000 people died in the war in Bosnia There are three million child soldiers in Africa More than 650 000 civilians have been killed as a result of the U S occupation of Iraq Between 600 000 and 800 000 women are trafficked across borders every year Money laundering represents as much as 10 percent of global GDP Internet child porn is a 20 billion a year industry These are big attention grabbing numbers frequently used in policy debates and media reporting Peter Andreas and Kelly M Greenhill see only one problem these numbers are probably false Their continued use and abuse reflect a much larger and troubling pattern policymakers and the media naively or deliberately accept highly politicized and questionable statistical claims about activities that are extremely difficult to measure As a result we too often become trapped by these mythical numbers with perverse and counterproductive consequences This problem exists in myriad policy realms But it is particularly pronounced in statistics related to the politically charged realms of global crime and conflict numbers of people killed in massacres and during genocides the size of refugee flows the magnitude of the illicit global trade in drugs and human beings and so on In *Sex Drugs and Body Counts* political scientists anthropologists sociologists and policy analysts critically examine the murky origins of some of these statistics and trace their remarkable proliferation They also assess the standard metrics used to evaluate policy effectiveness in combating problems such as terrorist financing sex trafficking and the drug trade

Lies, Damned Lies, and Drug War Statistics, Second Edition Matthew B. Robinson, Renee G. Scherlen, 2014-01-01 Revised and updated edition that analyses how the Office of National Drug Control Policy employs statistics to misleadingly claim the War on Drugs is a success First published in 2007 *Lies Damned Lies and Drug War Statistics* critically analyzed claims made by the Office of National Drug Control Policy ONDCP the White House agency of accountability in the nation's drug war since 1989 as found in the six editions of the annual National Drug Control Strategy between 2000 and 2005 In this revised and updated second edition of their critically acclaimed work Matthew B Robinson and Renee G Scherlen examine seven more recent editions 2006 2012 to once again determine if ONDCP accurately and honestly presents information or intentionally distorts evidence to justify continuing the drug war They uncover the many ways in which ONDCP manipulates statistics and visually presents that information to the public Their analysis demonstrates a drug war that consistently fails to reduce drug use drug fatalities or

illnesses associated with drug use fails to provide treatment for drug dependent users and drives up the prices of drugs They conclude with policy recommendations for reforming ONDCP s use of statistics as well as how the nation fights the war on drugs Praise for the First Edition Lies Damned Lies and Drug War Statistics is surprisingly easy to read and Robinson and Scherlen have done a huge favor not only to critics of current drug policy by compiling this damning critique of ONDCP claims but also to anyone interested in how data is compiled presented and misused by bureaucrats attempting to guard their domains It should be required reading for members of Congress Drug War Chronicle Book Review The authors have performed a valuable service to our democracy with their meticulous analysis of the White House ONDCP public statements and reports They have pulled the sheet off what appears to be an official policy of deception using clever and sometimes clumsy attempts at statistical manipulation This document at last gives us a map of the truth Mike Gray author of Drug Crazy How We Got into This Mess and How We Can Get Out Robinson and Scherlen make a valuable contribution to documenting how ONDCP fails to live up to basic standards of accountability and consistency Ethan Nadelmann Executive Director Drug Policy Alliance

based on a misunderstanding of the diversity and complexity of drug misuse Professionals have confused different types of drug misuse and or attempted to compress all types into one narrowly defined category i.e all drugs are good or bad This is the first mistake it is preferable to go right back to the ancient Greeks and try to understand the range of different effects of drugs on different people Practitioners first of all need to understand the complexity of drug misuse in order to develop realistic concepts and construct useful categories for assessment After this they are in a position to identify clearly the main risks and problems in the different categories and so to determine which type of intervention is most appropriate **Math**
