using BIOVIA Materials Studio LAMMPS and GROMACS Second Edition introduces the three major software packages essential for the molecular dynamics simulation of nanocomposites providing detailed instructions on utilizing each. This content is accompanied by real world examples that illustrate when each should be applied. Numerous case studies demonstrate how each software package predicts various properties of nanocomposites encompassing metal matrix polymer matrix and ceramic matrix based nanocomposites. Explored properties include mechanical thermal optical and electrical characteristics. This is a valuable resource for students researchers and scientists working in the field of molecular dynamics simulation. All chapters have been fully updated to reflect the latest developments in the field and this new edition has been enriched with additional chapters covering AI composites machine learning polymer coatings and graphene based materials and carbon nanotubes. Provides a detailed explanation on the basic commands and modules of Materials Studio LAMMPS and GROMACS. Demonstrates how these materials predict the mechanical thermal electrical and optical properties of nanocomposites. Introduces coding in LAMMPS explaining modeling using Materials Studio and LAMMPS. Utilizes case studies to illustrate the appropriate software for solving various nanoscale modeling problems.

Infrastructure Computer Vision Ioannis Brilakis, Carl Thomas Michael Haas, 2019-11-28 Infrastructure Computer Vision delves into this field of computer science that works on enabling computers to see identify process images and provide appropriate output in the same way that human vision does. However implementing these advanced information and sensing technologies is difficult for many engineers. This book provides civil engineers with the technical detail of this advanced technology and how to apply it to their individual projects. Explains how to best capture raw geometrical and visual data from infrastructure scenes and assess their quality. Offers valuable insights on how to convert the raw data into actionable information and knowledge stored in Digital Twins. Bridges the gap between the theoretical aspects and real life applications of computer vision.
