Predictive Species and Habitat Modeling in Landscape Ecology C. Ashton Drew,Yolanda F. Wiersma,Falk

Huettmann,2010-11-25 Most projects in Landscape Ecology at some point define a species habitat association These models are inherently spatial dealing with landscapes and their configurations Whether coding behavioral rules for dispersal of simulated organisms through simulated landscapes or designing the sampling extent of field surveys and experiments in real landscapes landscape ecologists must make assumptions about how organisms experience and utilize the landscape These convenient working postulates allow modelers to project the model in time and space yet rarely are they explicitly considered The early years of landscape ecology necessarily focused on the evolution of effective data sources metrics and statistical approaches that could truly capture the spatial and temporal patterns and processes of interest Now that these tools are well established we reflect on the ecological theories that underpin the assumptions commonly made during species distribution modeling and mapping This is crucial for applying models to questions of global sustainability Due to the inherent use of GIS for much of this kind of research and as several authors research involves the production of multicolored map figures there would be an 8 page color insert Additional color figures could be made available through a digital archive or by cost contributions of the chapter authors Where applicable would be relevant chapters GIS data and model code available through a digital archive The practice of data and code sharing is becoming standard in GIS studies is an inherent method of this book and will serve to add additional research value to the book for both academic and practitioner audiences

Office of Technology Assessment,1982 *Retail Brand Equity and Loyalty* Julia Katharina Weindel,2016-09-06 Julia Weindel provides novel implications for researchers and managers by first identifying the sector specific main levers of retail brand equity Second she shows that retail brand equity and perceived value have a reciprocal relationship The author analyzes which one of these has stronger effects on loyalty Third she addresses the interdependencies between brand beliefs retail brand equity and loyalty within multichannel retail structures The study is forced through the knowledge that management of retail brands is highly valuable for scholars and managers because retail brand equity is known to strongly influence consumer behavior in various contexts The retail brand represents a valuable asset for retailers which need to know the levers of retail brand equity *Assessing Quality of Life in Clinical Trials* Peter M. Fayers,Ron D. Hays,2005 Quality of Life Assessment has progressed considerably since the publication of the first highly acclaimed edition of this book in 1998 Quality of life has now become an indispensable outcome measure in many randomised clinical trials and other studies Thus it is timely to provide not just an update but a completely new edition that reviews the current state of art and also discusses topical issues including areas where active research is in progress The first section discusses the development and evaluation of generic and disease targeted questionnaires Having decided the items to be included the thrust of the next section covers how to convert these into usable forms Section 3 addressing analysis and the methods of analysing studies with missing data is followed by chapters on interpretation of results and exploring the role of single item questions The final section of the book looks beyond the individual clinical trial and how we can use clinical trial and other data to make macro decisions A strong international team of experts cover a wide range of topics emphasizing new and innovative approaches that are of practical and clinical importance reviewing the current state of the art and illustrating the benefits and potential of health related quality of life assessment in clinical trials **Cross-Cultural Design** Pei-Luen Patrick Rau,2024-05-31 This four volume set LNCS 14699 14702 constitutes the thoroughly refereed proceedings of the 16th International Conference on Cross Cultural Design 2024 CCD 2024 held as part of the 26th International Conference on Human Computer Interaction HCI International 2024 HCII 2024 was held as a hybrid event in Washington DC USA during June July 2024 The total of 1271 papers and 309 posters included in the HCII 2023 proceedings was carefully reviewed and selected from 5108 submissions The CCD 2024 conference focuses a broad range of theoretical and applied issues related to Cross Cultural Design and its applications and much more **Operations Management** Massimiliano Schiraldi,2013-03-13 Operations Management is an area of business concerned with managing the process that converts inputs into outputs in the form of goods and or services Increasingly complex environments together with the recent economic swings and substantially squeezed industrial margins put extra pressure on companies and decision makers are pushed to increase operations efficiency and effectiveness This book presents the contributions of a selected group of researchers reporting new ideas original results and practical experiences as well as systematizing some fundamental topics in Operations Management Although it represents only a small
