Monetary Policy in Europe after Maastricht Wilhelm Noelling, trans Brian Rasmussen, 1993-05-11 What shape will Europe's future take Can the full economic and monetary union envisaged for the end of the century be achieved Is Maastricht the right way forward In this book Nolling subjects the Treaty to a dispassionate and searching scrutiny He concludes that the attempt to achieve monetary union within such a short space of time is fraught with dangers and unlikely to advance Europe's economic and political fortunes Maastricht could well fail And what then Nolling argues that there are other ways forward and in this book he suggests a number of realistic alternatives

Economic Aspects of German Unification Paul J.J. Welfens, 2012-12-06 Paul J J Welfens The editor is pleased to present a second edition of *Economic Aspects of German Unification* which includes new chapters and several postscripts Almost five years after unification output in the ex GDR is back to its 1989 level Due to a massive intra German resource transfer consumption per capita in eastern Germany has not fallen as much as output and employment which reduced by one fifth within three years Given high West German transfers which represented about 5% of West German GDP and more than 50% of East German GDP the fall of industrial output could have been much stronger than had politically been feasible Hence structural change necessary for productivity growth was dramatic in the ex GDR where the goods producing sector manufacturing mining energy and construction strongly changed its proportions within four years construction almost doubled and the share of investment goods production reduced by 10 percentage points between 1990 and 1994 and is now down to 21.1% Mining lost two thirds of its share in the producing sector which itself was reduced relative to GDP The share of the services industry increased by 5 percentage points between 1991 and 1994 but with a share of 27.7% in East Germany's GDP it was still about 9 percentage points lower than in western Germany By contrast

government accounted for 20.9% of GDP in eastern Germany but for only 13.2% in western Germany

The American Economic Review, 1995 Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges

European Monetary Union and Exchange Rate Dynamics Paul J. J. Welfens, 2001 The creation of the European Central Bank and the Euro have brought new challenges to EU integration and economic policy This book looks into issues of monetary and factor market policies The analysis also presents new theoretical and empirical research on the transitory decline of the Euro Issues of exchange rate policy and international economic relations also are addressed

The Flight of Icarus Yiannis Drossos, 2020-12-10 This book provides a detailed analysis of the institutional transformations brought about by the financial crisis focusing on the institution building course of Europe and the Constitution bending course in several Member States It discusses the seemingly contradictory interplay between national and European institutions and the law resulting from the crisis arguing that the anti crisis exceptionality constitutes the matrix of the new normality of the reformed European economic governance The author carries out a critical analysis of the new economic governance and its case law with regular reference to relevant political episodes key economic figures and to the hitherto lax modes and rules The author also offers deep insights into the Greek adjustment programme and the crisis related Greek and Portuguese constitutional case law presented in comparison with the German and French case law The book concludes with a critical overview of the profound mutations in the role of national Constitutions instigated by the new European economic governance and the emergence of a democratically deficient meta constitutional mode of functioning of both the European institutions and national Constitutions

The External Dimension of the EU's Migration Policy Katharina Eisele, 2014-05-08 In recent years the EU has been active in developing a common European immigration policy in cooperation with third countries and in building an external dimension of such an EU policy The linkages between the EU's external relations and migration policies have influenced the distinct legal positions of third country nationals non EU nationals This book critically discusses whether the EU's objective of creating a common EU migration policy can be achieved against the backdrop of a highly fragmented EU framework for migration law and policy and it argues that it is difficult to speak of one single unitary group of third country nationals forming the counterpart to EU citizens

Conflict and Transformation Christian Joerges, 2022-10-06 In this important compendium one of the leading scholars of EU law and its legal framework reflects on his previous writings in the context of current challenges the European project is facing More than a simple restatement it offers an important theoretical comment at this defining time for EU law The author offers a welcome counterbalance to what some perceive to be a surfeit of optimism when assessing the EU and its development In so doing Professor Joerges identifies three flaws in the current European ideology Firstly he points to the intellectual weakness of the integration through law ideology Secondly the book sets out the systematic neglect of the economic and its political dynamics Finally it addresses the complacency with respect to Europe's darker legacies This is an important critical and

candid assessment of Europe at its half century *The European Studies Journal* ,1996 *From the Treaty of Versailles to the Treaty of Maastricht* Martin Holmes,2022-08-04 This book examines European history and politics between two very well known but flawed treaties The Treaty of Versailles and the Treaty of Maastricht Taking the Treaty of Versailles signed following World War I as a starting point the volume argues that while it was well intentioned to the point of being utopian it was also totally impractical rearranging the map of Europe in a way which led to the tragic descent into conflict and barbarism in World War II The volume then moves through the post war period the outcome of the war producing the uneasy stability of a Cold War divided continent and with the establishment of NATO in 1949 the process of European integration ushered in the era of cooperation Under the influence of Charles de Gaulle the newly created European Community acted as an association of sovereign states led by France and Germany spurring economic growth and encouraging other countries to apply to join After de Gaulle s retirement in 1969 this approach was progressively abandoned in favour of a federal model of integration in which member states transferred their sovereignty to the institutions of what became the European Union Europe was to be transformed from a continent to a country The book concludes by analysing the Maastricht treaty which enshrined this process as being as fatally flawed as the Versailles Treaty and charts the post Maastricht slow decline of the European Union giving way to widespread Euroscepticism From the Treaty of Versailles to the Treaty of Maastricht will appeal to researchers and students alike interested in European history politics and World War I and II **Economic**

Craig,Gráinne De Búrca,1999 The European Community has been in existence for 40 years This period has seen considerable change and development in both the institutional and the substantive law of the EC and more recently the EU This work seeks to stand back from the ever growing detail of Community law and examine this jurisprudence from an evolutionary and interdisciplinary perspective Every important area of institutional and substantive European law is covered leading lawyers analyze the evolution of their area of expertise across time bringing out the major thematic changes which have occurred These changes are then viewed against the broader political and economic background of the community as a whole The New Economy and Economic

Growth in Europe and the US David B. Audretsch, Paul J.J. Welfens, 2002-04-10 There are many issues relating to the new economy in Europe and the USA that are unexplored Here the authors present innovative theoretical and empirical analysis on Internet dynamics productivity growth and organizational changes in selected OECD countries New empirical findings related to telecommunications Internet and growth also are presented Based on the theoretical and empirical analyses various policy options are developed Policy measures both at the regional and national levels can stimulate structural change knowledge diffusion and economic growth Different governance strategies for the Internet and e commerce are identified from a global perspective **Politics and Finance in the European Union** Francesco Capriglione, 2016-03-09 The recent financial and sovereign debt crisis while turning the spotlight into the degenerating effects of modern day capitalism has engendered a series of hard to control events that are severely testing the stability of the European institutions The adjustments to date have proved unable to adequately tackle the financial turmoil that is undermining the construction of the EU Hence the need to identify the reasons behind this situation which is accompanied by the failure to achieve an osmosis between the member countries of the Union The objective to be pursued is clarifying the uncertainties and contradictions within Europe for the purpose of addressing what many see as a systemic crisis **Labour Research** ,1999 *Integration in Asia and Europe* Paul J.J. Welfens, 2006 Broadening and deepening of economic and political integration are hallmarks of the EU and ASEAN Analysing the economic and institutional changes in both Europe and Asia this book emphasizes on banking financial market dynamics ICT and macroeconomic policies The legal aspects are combined with historical and economic perspectives
