Myers, on Mars Don E. Myers, 2001-01-01 **American Book Publishing Record** ,2002 **Books In Print**

2004-2005 Ed Bowker Staff, Staff Bowker, Ed, 2004 *The Bulletin* ,1889 **Martian Enigmas** Mark J.

Carlotto, 1993-01-29 On the surface of Mars lies a formation that looks remarkably like a humanoid face Forever staring up into the vastness of space it has attracted our attention For some that is why it is there beckoning us to come and explore Others believe that it is simply an odd looking geological landform a formation carved over the ages by the random forces of nature It is our imagination and our desire to find other life in the universe that makes us see it as an intelligently crafted object Opinions about the possibility of life on Mars have changed over the years from Percival Lowell s canals to the dead planet image by the early Mariner missions to Mars to the enormous volcanoes great canyon systems and channels carved by water seen by Mariner 9 and Viking In the first edition of *The Martian Enigmas* Dr Mark J Carlotto presented a detailed analysis of the controversial Viking photographs The revised edition greatly expands on his early work containing new research results that add further support to the claim that these objects may be precisely what many scientists have sought for decades the first hard evidence that we are not alone [THE FACES OF MARS](#) Gary Leggiere, 2025-07-23 More than two decades after groundbreaking books and research made the case for the infamous Face on Mars NASA officially closed the debate in 2007 declaring the formation a natural mesa shaped by erosion and lighting effects nothing more Despite the compelling evidence and arguments put forth by earlier researchers no major challenge has since emerged to counter NASA s final verdict But new higher resolution image data from multiple Mars missions suggest that the Case for the Face is far from closed This book reignites the debate by exploring the Face s deep psychological imprint on human culture even before its 1976 Viking Orbiter discovery and by examining NASA s evolving public statements from that point until their 2007 debunking The narrative reveals inconsistencies subtle cues and potentially misleading tactics in NASA s official line inviting readers to consider that what s being denied openly may be acknowledged indirectly The heart of this book lies in its comprehensive visual study of the Face using image data from Viking Orbiters Mars Global Surveyor Mars Odyssey Mars Express and Mars Reconnaissance Orbiter Side by side image comparisons reveal how official NASA releases often obscure important surface details whereas properly processed images show strikingly different and potentially artificial features These contrast sharply with NASA s claims and hint at deliberate obfuscation For the first time this work compiles and presents the most complete and detailed image based analysis of the Face supported by clear evidence of discrepancies in NASA s data presentation and public messaging It makes a bold but evidence backed claim the Face on Mars has never been truly debunked Instead it remains one of the most compelling visual anomalies in our solar system worthy of continued study open minded investigation and perhaps a complete rethinking of Mars mysterious past [The Photographic Story of Mars](#) Earl Carl Slipher, 2012-11-01 *Mars* Paul Raeburn, Matthew P. (FWD) Golombek, 1998-07-30 Dramatically heralding a bold

new era of space exploration NASA's Mars Pathfinder was launched on a record shattering 310 million mile course Pathfinder's celebrity passenger was a twenty four inch long roving robot named Sojourner which took to the surface of Mars desert like terrain and sent back an array of stereoscopic images that captured the human imagination like nothing since Apollo 11's voyage to the moon And Mars remains a hot topic as new missions continue to be launched Mars Uncovering the Secrets of the Red Planet captures in words and remarkable photographs all the drama of Sojourner's triumph as well as a series of previously unpublished super high resolution images from the Mars Surveyor the craft that is currently in orbit around the Red Planet mapping its surface By any standard the most definitive state of the art book available on Mars has arrived integrating 136 stunning photographs with author Paul Raeburn's provocative sharply written text examining the history of Mars exploration Featuring two exquisite panoramic three dimensional double gatefold photographs depicting the highest mountains and largest valleys in the entire solar system Mars brings readers closer than ever to the mind boggling beauty and variety of a planet more than 100 million miles from Earth
