North America John Harris Paterson,1979 **North America** J. H. Paterson,1994 **North America** John H. Paterson,1984-01-01 A Guide to Information Sources in the Geographical Sciences Stephen Goddard,1983-01-01

Geography is a wide ranging discipline and the number of information sources available is truly enormous These include printed books and journal articles maps satellite photographs archives statistical information and much else One particular problem facing geographers is that when one studies a foreign country information may be available only in the foreign country and difficult to obtain This book discusses the information sources available to geographers **A Big History of North America** Kevin Jon Fernlund,2022-12-16 The special relationship between the United Kingdom an established and secure power and the United States a rising one began after the War of 1812 as the former enemies sought accommodation with rather than the annihilation of one another At the same time Mexico also a rising power was not so fortunate Its relationship with Spain an established but declining power turned hostile with Spain s final exit from North America after Mexico s War of Independence leaving its former colony isolated internally unstable and vulnerable to external attack Significantly Mexico posed little threat to its northern neighbor By the third decade of the eighteenth century then the fate of North America was largely discernable Nevertheless the three century journey to get to this point had been anything but predictable The United States rise as a regional power was very much conditioned by constantly shifting transcontinental transpacific and above all transatlantic factors all of which influenced North America s three interactive cultural spheres the Indigenous the Hispano and the Anglo And while the United States profoundly shaped the history of Canada and Mexico so too did these two transcontinental countries likewise shape the course of U S history In this ground breaking work Kevin Fernlund shows us that any society s social development is directly related to its own social power and just as crucially to the protective extension or destructive intrusion of the social power of other societies *U.S.-Canada Relations* United States. Congress. House. Committee on International Relations. Subcommittee on the Western Hemisphere,2006 *Memoir - Geological Survey of Canada* ,1912 Report of the Chief Astronomer Dominion Observatory (Canada),1913 Beyond Walls: Re-inventing the Canada-United States Borderlands Victor Konrad,Heather Nicol,2016-12-05 September 11 2001 marked the beginning of a new era of security imperatives for many countries The border between Canada and the United States suddenly emerged from relative obscurity to become a focus of constant attention by media federal and state provincial governments on both sides of the boundary and the public at large This book provides a comprehensive examination of the Canada USA border in its 21st century form placing it within the context of border and borderlands theory globalization and the changing geopolitical dialogue It argues that this border has been reinvented as a state of the art technology steeped crossing system while the image of the border has been engineered to appear consistent with the friendly border of the past It shows how a border can evolve to a heightened level of security and yet continue to function well

sustaining the massive flow of trade It argues whether in doing so the US Canada border offers a model for future borderlands Although this model is still evolving and still aspires toward better management practices the template may prove useful not only for North America but also in conflict border zones as well as the meshed border regions of the EU Africa s artificial line boundaries and other global situations *New York Teachers' Monographs* ,1907 *Teachers Monographs* ,1914 Alphabetical and Analytical Catalogue of the New York Society Library New York Society Library,1838 **So Vast and Various** John Warkentin,2010 A look at 150 years of writings about Canada s regions An Economic History of Organized Crime Dennis M.P. Mullen,2020-02-10 Winner of the 2021 Society of Professors of Education Outstanding Book Award *Canadian Indigenous Literature and Art* sheds light on Indigenous justice

perspectives in Indigenous literature and art Decolonizing education culture and society is the revolutionary pulse of this book aimed at educational reform and comprehensive change Select works of published literature and exhibited art are interpreted in the critical discourse presented Indigeneity as a lens is used to deconstruct education accountability and policy in Canada and globally A new hypothesis is advanced about colonization and Indigenous voicelessness helplessness and genocidal victimhood as unchanging conditions of humanity Activist pushback is demonstrated in the rise of Indigenous sources originating in global Canada While colonization dehumanizes Canadian Indigenous peoples a global movement has erupted changing pockets of curriculum teaching and research Through agency and solidarity in public life and gradually education Indigenous justice is a mounting paradigmatic force Indigenous voices speak about colonialism as a crisis of humanity that provokes truth telling and protest Glimpses of Indigenous futurity offer new possibilities for decolonizing our globally connected lives Actionable steps include educating for a just world and integrating Indigenous justice in other advocacy theories Compelling interesting important and original I was impressed with Carol Mullen s knowledge as well as how she wove together this knowledge with both the literature and personal experience throughout this beautifully and soulfully written text I appreciate how she illuminated spaces and people whose work is often relegated to dark corners Pamela J Konkol Professor of Foundations Social Policy and Research at Concordia University Chicago See inside the book
