Casas Grandes and Its Hinterland Michael E. Whalen, Paul E. Minnis, 2001-03 Michael E Whalen and Paul E Minnis have worked extensively in the Casas Grandes area and now offer new research arguing that it was not as similar to the highly developed complex societies of Mesoamerica as has been thought In the first book of its kind in 25 years the authors analyze settlement pattern data from more than 300 communities in the area surrounding Casas Grandes to show that its Medio period culture was a local development BOOK JACKET Casas Grandes and Its Hinterlands Michael E. Whalen, Paul E. Minnis, 2001-03-01 Casas Grandes or Paquim is one of the most important settlements in the prehistoric North American Southwest The largest and most complex community in the Puebloan world it was characterized by its principal excavator Charles Di Peso as an outpost of the Toltec empire which used it as a trade link between Mesoamerican and southwestern cultures Michael E Whalen and Paul E Minnis have worked extensively in the Casas Grandes area and now offer new research arguing that it was not as similar to the highly developed complex societies of Mesoamerica as has been thought In the first book of its kind in 25 years the authors analyze settlement pattern data from more than 300 communities in the area surrounding Casas Grandes to show that its Medio period culture was a local development Whalen and Minnis propose that Casas Grandes lacked extensive stratification well established decision making hierarchies and formalized positions of authority They suggest instead that emerging elites used bribes promises and threats to build factions and extend their power The communities at the periphery are shown to have had varying levels of social and economic interaction with Casas Grandes This innovative study offers a new model for the rise and fall of Casas Grandes that departs considerably from the view most scholars have come to accept and will be of interest to all concerned with the comparative study of emergent complexity It clearly shows that the idea of extensive regional centralization by Casas Grandes is no longer tenable and merits reconsideration by the archaeological community *The Prehispanic Ethnobotany of Paquimé and Its Neighbors* Paul E. Minnis, Michael E. Whalen, 2020-11-17 Paquim also known as Casas Grandes and its antecedents are important and interesting parts of the prehispanic history in northwestern Mexico and the U S Southwest Not only is there a long history of human occupation but Paquim is one of the better examples of centralized influence Unfortunately it is also an understudied region compared to the U S Southwest and other places in Mesoamerica This volume is the first large scale investigation of the prehispanic ethnobotany of this important ancient site and its neighbors The authors examine ethnobotanical relationships during Medio Period AD 1200 1450 when Paquim was at its most influential Based on two decades of archaeological research this book examines uses of plants for food farming strategies wood use and anthropogenic ecology The authors show that the relationships between plants and people are complex interdependent and reciprocal This volume documents ethnobotanical relationships and shows their importance to the development of the Paquim polity How ancient farmers made a living in an arid to semi arid region and the effects their livelihood had on the local biota their relations with

plants and their connection with other peoples is worthy of serious study The story of the Casas Grandes tradition holds valuable lessons for humanity **Paleoecología y Arqueología en la Frontera Norte de Mesoamerica** Roy B.
