complexity it is fully consistent with mainstream evolutionary biology Corning refers to it as Holistic Darwinism Among the many important insights that are provided by this new paradigm Corning presents a scenario in which the human species invented itself synergistic behavioral and technological innovations were the pacemakers of our biological evolution Synergy has also been the key to the evolution of complex modern societies he concludes To You ,1966 Heel to Toe Charles Lister,2002 Having walked down the Appian Way for his acclaimed book Between Two Seas Charles Lister found himself irresistibly drawn to the land of contrasts that is the extreme south of Italy Lister had planned to travel by bicycle but an Italian said he was mad and insisted he take his moped He travelled extensively as engaged by the wines of the region and the beauty of the local women as by the plethora of temples and the weight of history In captivating prose he reveals it to be a place haunted by its extraordinary past once great and famous still beautiful and in places now tragically abandoned
