Qualitative Methods For Reasoning Under Uncertainty:

Qualitative Methods for Reasoning Under Uncertainty Simon Parsons, 2001 Using qualitative methods to deal with imperfect information **Qualitative Methods for Reasoning Under Uncertainty** Simon Parsons, 2016 **Qualitative Methods for Reasoning Under Uncertainty**, 1994 , **Uncertainty in Artificial Intelligence** David Heckerman, Abe Mamdani, 2014-05-12 Uncertainty in Artificial Intelligence contains the proceedings of the Ninth Conference on Uncertainty in Artificial Intelligence held at the Catholic University of America in Washington DC on July 9 11 1993 The papers focus on methods of reasoning and decision making under uncertainty as applied to problems in artificial intelligence AI and cover topics ranging from knowledge acquisition and automated model construction to learning planning temporal reasoning and machine vision Comprised of 66 chapters this book begins with a discussion on causality in Bayesian belief networks before turning to a decision theoretic account of conditional ought statements that rectifies glaring deficiencies in classical deontic logic and forms a sound basis for qualitative decision theory Subsequent chapters explore trade offs in constructing and evaluating temporal influence diagrams normative engineering risk management systems additive belief network models and sensitivity analysis for probability assessments in Bayesian networks Automated model construction and learning as well as algorithms for inference and decision making are also considered This monograph will be of interest to both students and practitioners in the fields of AI and computer science **Proceedings of the 2nd International Conference: Quantitative and Qualitative Methodologies in the Economic and Administrative Sciences** Christos Frangos, 2009 Advances in Intelligent Computing - IPMU '94 Bernadette Bouchon-Meunier, Ronald R. Yager, Lotfi A. Zadeh, 1995-06-26 This book presents a topical selection of full refereed research papers presented during the 5th International Conference on Information Processing and Management of Uncertainty in Knowledge Based Systems IPMU 94 held in Paris France in July 1994 The topical focus is on the role of uncertainty in the construction of intelligent computing systems and it is shown how the concepts of AI neural networks and fuzzy logic can be utilized for that purpose In total there are presented 63 thoroughly revised papers organized in sections on fundamental issues theory of evidence networks probabilistic statistical and informational methods possibility theory logics chaos reusability and applications Fusion of imprecise qualitative information Xinde Li, Xianzhong Dai, Jean Dezert, Florentin Smarandache, In this paper we present a new 2 tuple linguistic representation model i e Distribution Function Model DFM for combining imprecise qualitative information using fusion rules drawn from Dezert Smarandache Theory DSMT framework **Uncertainty in Artificial Intelligence MKP**, 2014-06-28 **Uncertainty Proceedings 1994** **Advances and Challenges in Multisensor Data and Information Processing** Eric Lefebvre, 2007 Information fusion resulting from multi source processing often called multisensor data fusion when sensors are the main sources of information is a relatively young less than 20 years technology domain It provides techniques and methods for Integrating data from multiple sources and using the complementarity of this data to

derive maximum information about the phenomenon being observed Analyzing and deriving the meaning of these observations Selecting the best course of action and Controlling the actions Various sensors have been designed to detect some specific phenomena but not others Data fusion applications can combine synergically information from many sensors including data provided by satellites and contextual and encyclopedic knowledge to provide enhanced ability to detect and recognize anomalies in the environment compared with conventional means Data fusion is an integral part of multisensor processing but it can also be applied to fuse non sensor information geopolitical intelligence etc to provide decision support for a timely and effective situation and threat assessment One special field of application for data fusion is satellite imagery which can provide extensive information over a wide area of the electromagnetic spectrum using several types of sensors Visible Infra Red IR Thermal IR Radar Synthetic Aperture Radar SAR Polarimetric SAR PolSAR Hyperspectral Satellite imagery provides the coverage rate needed to identify and monitor human activities from agricultural practices land use crop types identification to defence related surveillance land sea target detection and classification By acquiring remotely sensed imagery over earth regions that land sensors cannot access valuable information can be gathered for the defence against terrorism This books deals with the following research areas Target recognition classification and tracking Sensor systems Image processing Remote sensing and remote control Belief functions theory and Situation assessment
