Qualitative Studies in Education (1995) Jane Salisbury, Sara Delamont, 2018-02-06 Published in 1995 this book comprises a group of original studies in education It includes detailed empirically based accounts of a variety of educational settings which are under represented in the sociological literature for instance special schools psychiatric adolescent units further education colleges and government policy settings Studies of other neglected issues include teachers understandings of subject the promotion of cross curricular themes and pupils acquisition of knowledge about menstruation Ethnographic fieldwork in Maltese classrooms and a study of Asian pupils in a Welsh school provide an international dimension to the volume Most contributions draw on ethnographic approaches and by using close observation and or in depth interviews they capture the internal workings of a classroom institution or culture *Teaching Qualitative Research* Rosalind E. Hurworth, 2008-01-01 Over the past two decades there has been a plethora of book for students about how to tackle Qualitative Research QR but absolutely nothing on how to teach it This book attempts to redress the imbalance by presenting a history of what is known about QR teaching as well as to bring alive current QR teaching and learning through a set of Australian and British case studies Courses visited were located within a variety of disciplines including Education Sociology Anthropology Nursing Psychology Communications and Evaluation were taught by both experienced and inexperienced lecturers were either presented alone or in pairs took place in a range of institutions lasted from seven weeks to a year and involved from 15 to over 100 students It emerged however that no matter what the context several common issues were raised such as Should you teach theory practice or both How do you determine a curriculum for a QR course What is the best way to manage student projects How should students of QR be assessed In what ways can the constraints of University structures be confronted and How can lecturer deficiencies in training and experience be overcome To answer such questions Professor Hurworth draws deftly from personal observations and rich conversations with both lecturers and students from all the courses described As a result many practical ideas for moving the teaching and learning of QR forward are suggested Blue Ribbon Papers Norman K.
