Quality Assurance In Higher Education The Uk Experience Since 199:

Quality Assurance in Higher Education Roger Brown, 2004 This text provides an analytical account of the changes to quality assurance of UK universities and colleges from 1992 to 2003 Quality Assurance in Higher Education Don F. Westerheijden, Bjorn Stensaker, Maria Joao Rosa, 2007-09-04 By bringing together leading experts on quality assurance in higher education from seven countries from Europe the USA and South Africa this volume intends to go several steps further than most publications on quality assurance First it brings together views from micro to macro levels in the multi actor space showing how quality assurance impacts the higher education system throughout Second it links quality assurance solidly to issues of regulation translation rather than mechanical implementation and transformation instead of being only focused on quality assurance as a single policy instrument Third it uses this broad range of research insights to criticize current practices explaining for instance why sometimes people have difficulty in tracing any concrete effects of all initiatives taken in this area Finally the book offers proposals for better focusing quality assurance in the future to address institutional challenges better The general purpose of the book then is to give an engaged academic reflection on how quality assurance is embedded in higher education and in a dynamic way to assess its impacts and potential improvements Quality Assurance in Higher Education David Lim, 2020-07-24 This title was first published in 2001 Universities in developing countries have followed their counterparts in developed countries and adopted quality assurance to improve the quality of their activities This text examines the wisdom of such a move when many of the conditions necessary for its success are not present It concludes that quality assurance can be useful in developing countries because it shows how a university's seemingly disparate activities are related to one another to serve a common goal and how the quality of these can best be improved by using an integrated approach Quality assurance also provides more focus and direction to the work of the traditional university system However it must be modified to suit the conditions prevailing in developing countries by being simple in design modest in expectations and realistic in requirements *Quality Assurance in Higher Education in Eastern and Southern Africa* Peter Neema-Abooki, 2021-08-23 This book examines the critical aspect of quality assurance maintenance of competitive standards in African higher education It explores both the micro and macro levels of continental African higher education regulatory authorities and analyses different institutional regional and national practices for moving towards continental quality assurance approaches Contributed to by scholars across Eastern and Southern Africa the book considers conceptual practical epistemological and policy dimensions of quality and quality assurance especially in relation to higher education in Africa It therefore draws on research and local expertise to open up debate about how to assure and enhance the quality of higher education providing a comprehensive review of eight countries and considers societal challenges It aims to satisfy the need of more thoughtful and critical works on African education as produced by African educators The uniqueness of this book lies in integrating both the theoretical and practical dimensions of quality to devise appropriate

strategies for ensuring quality and standards in higher education in continental Africa and beyond This authoritative book advocates for a timely discussion around the provision of good quality higher education and research in African universities and will be of great interest to academics policy makers researchers and post graduate students in the fields of higher education comparative education and African studies *The Governance of British Higher Education* Ted

Tapper,2007-05-05 How has the system of governance changed Do British higher education institutions still exercise autonomous control over their development as was widely believed to be the case but a few years ago These questions are pursued through a three pronged strategy Firstly to examine the institutional changes which have occurred since the 1988 Education Reform and the emergence of the funding council model of governance In particular we want to know how the various institutional actors the higher education institutions the government departments and the funding councils interact with one another to shape policy outcomes Secondly to explore the political context within which these institutional actors have to work This means examining the role of the political parties policy networks and the parliamentary forces all of which have a major stake in influencing the direction of higher education policy This section of the book incorporates the move towards political devolution in the United Kingdom and examines what is different and what is similar about higher education policy making in Scotland and Wales in comparison to England Thirdly the book observes the process of policy making and change in relation to critical issues the funding of higher education the research assessment exercises the quality assurance regime and the widening participation agenda In effect it examines policy making in action Higher Education
