Quality Of Life Research A Critical Introduction:

Quality of Life Research Mark Rapley, 2003-03-18 Many books have been published on quality of life research in recent years but few are as thought provoking or original as this one It is essential reading for anyone who has a serious and critical interest in this topic Nurse Researcher This was a fun book to read and I would suggest it be used for a graduate level seminar where of course it would lead to a lively discussion Quality of Life Research Quality of life is one of the fastest growing areas of research and policy The concept has an intuitive appeal as a measure of the well being of individuals communities and nations It is increasingly promoted as an aid for political decisions and public funding But what does the concept really mean And how can it be operationalized in teaching and research This is the first introductory text to offer a critical overview of the concept of quality of life and the ways in which it is researched Using an inter disciplinary approach the book covers every aspect of the concept and its application from the calculation of Quality Adjusted Life Years to conversation analysis and from the estimation of the quality of life of nation states to ethnographic studies of the life quality of individual disadvantaged people The book fills a huge gap in teaching and research Written with authority and the need to produce an accessible critical introduction to the field it will be of interest to students of sociology psychology public health and nursing health economics politics and medicine *Handbook of Quality of Life and Sustainability* Javier

Martinez, Claudia Andrea Mikkelsen, Rhonda Phillips, 2020-10-30 This handbook provides the latest research related to quality of life and sustainability taking into account social economic environmental and political governance aspects as well as specific socio spatial contexts The volume includes contributions from established and upcoming scholars from various disciplines and geographical contexts Global South and North The varying cultural and socio spatial contexts of the authors in the selected cases contribute to first hand knowledge on the realities of sustainability issues affecting the quality of life The authors apply a wide diversity of methods and tools which facilitates a unique understanding of the interlinkages between quality of life and sustainability The chapters are grouped in three main sections concepts and foundations tools techniques and applications and innovations The authors provide their own view and theoretical approximation of the dimensions of sustainability in particular on how these dimensions play out in relation to quality of life The combination of sustainability and quality of life concepts and perspectives is particularly important in unravelling the multi faceted nature of human urban rural spatial development *The Psychology of Quality of Life* M. Joseph Sirgy, 2012-06-20 The second edition will be an update and further elaboration of the literature related to subjective well being happiness and life satisfaction It will have a new substantial section that focuses on reviewing much of the literature of subjective well being within specific life domains social life material life leisure life work life community life spiritual life family life health life sex life travel life etc In the 1st edition the research in these various life domains was discussed only briefly The second edition will maintain the same organizational structure of the first edition that is Part 1 will focus on introduction definitions and distinctions

examples of measures of subjective well being happiness and life satisfaction and motives underlying subjective well being Part 2 will focus on psychological strategies that allow people to optimize subjective well being by engaging in psychological processes related to the relationship between and among life domains e g social life family life love life spiritual life community life financial life etc This part will contain four chapters related to these various inter domain processes bottom up spillover top down spillover horizontal spillover and compensation Part 3 of the book will focus on intra domain psychological strategies designed to optimize subjective well being These include re evaluation based on personal history re evaluation based on self concept re evaluation based on social comparison goal selection goal implementation and attainment and re appraisal Part 4 of the book will focus on balance processes how people attempt to create balance in their lives using psychological processes within specific life domains intra domain strategies and processes that relate one domain to another inter domain strategies

Handbook of Tourism and Quality-of-Life Research II Muzaffer Uysal,M. Joseph Sirgy,2023-09-23 The second volume of this handbook develops on and extends the discussion in the successful first volume published in 2012 This is a timely addition to the literature drawing on the momentum that quality of life QOL research in tourism has gained in the 21st century and on the boom in the tourism industry itself It focuses on four areas of growth in QOL research in the recent past 1 travelers tourists 2 host communities 3 service providers and 4 the role of technology The handbook helps management of tourism firms and policy makers develop specific policies and programs to ensure the most positive impact of tourism on tourists host communities and service providers The comprehensive coverage of topics in this handbook makes it a state of the art reference Academics interested in QOL research in travel and tourism tourism practitioners interested in applying the science of QOL in the tourism industry as well as policy makers involved in regulating the industry will view the handbook as indispensable source of recent research

Handbook of Social Indicators and Quality of Life Research Kenneth

C. Land, Alex C. Michalos, M. Joseph Sirgy, 2011-11-25 The aim of the Handbook of Social Indicators and Quality of Life Research is to create an overview of the field of Quality of Life QOL studies in the early years of the 21st century that can be updated and improved upon as the field evolves and the century unfolds Social indicators are statistical time series used to monitor the social system helping to identify changes and to guide intervention to alter the course of social change Examples include unemployment rates crime rates estimates of life expectancy health status indices school enrollment rates average achievement scores election voting rates and measures of subjective well being such as satisfaction with life as a whole and with specific domains or aspects of life This book provides a review of the historical development of the field including the history of QOL in medicine and mental health as well as the research related to quality of work life QWL programs It discusses several of QOL main concepts happiness positive psychology and subjective wellbeing Relations between spirituality and religiousness and QOL are examined as are the effects of educational attainment on QOL and marketing and the associations with economic growth The book goes on to investigate methodological approaches and issues that should be considered in measuring and analysing quality of life from a quantitative perspective The final chapters are dedicated to research on elements of QOL in a broad range of countries and populations *Pursuing Quality of Life* Leonard

Nevarez, 2011-03-29 From anxieties over work life balance and entangling technologies to celebrations of cool jobs and great places to live quality of life frames the ways we enhance our lives and legitimate social change today But how does the idea of quality of life envision the greater good and what gets lost as a result This book provides the critical framework for understanding the idea's contexts and tensions that are conspicuously missing in popular discussions professional activities and scholarly research on quality of life With multiple case studies taken across North America and Europe it provides a sociological perspective on the contradictory ways we talk about and pursue quality of life in relation to technology consumerism family work public space rural ways of life and ultimately the final years of life Drawing on contemporary and classical social theory it provides an incisive account of the historical shifts in developed societies over the last half century that have transformed our views and pursuits of quality of life Originally a promise to undertake collective effort and pursue social justice at a moment of unprecedented opportunity quality of life now enshrines a solipsistic ideal with which to accommodate the storms of market forces and political failure Student Motivation and Quality of Life in Higher Education

Marcus Henning, Christian Krägeloh, Glenis Wong-Toi, 2014-12-17 Higher education is a high stakes process involving engagement with curricula and often entails coping with the onslaught of assessments and examinations This process creates a level of intensity that impacts on the student experience in higher education It is therefore important to consider not only the motivational aspects of learning but also quality of life issues as they have profound effects on students Quality of life affects the way students interact with their formal education and has wide reaching effects on future careers and their ability to coordinate everyday events Integrating these two concepts student motivation and quality of life brings together the

explicit elements that underpin learning in the higher education context creating links between the affective and social aspects of the student life This synthesis is integral to improving student retention and quality of life and has important ramifications for educationalists administrators pastoral care and academic support service personnel and students themselves Some highlights of the book include Applied Positive Psychology in Higher Education Internationalisation and Quality of Life A Taiwanese Perspective The Computer Assisted Learning for the Mind CALM Website Teaching Skills to Increase Resilience The Oxford University Peer Support Programme Addressing the Wellbeing of Students Higher Education and Student Stress Reclaiming Light Liberty and Learning Improving academic quality of life through attribution and motivation focused counselling

The Spirit of Global Health Simon Peng-Keller, Fabian Winiger, Raphael Rauch, 2022 Since the beginning of the World Health Organization many of its staff members regional

offices member states and directors general have grappled with the question of what a spiritual dimension of health looks like and how it might enrich the health policies advocated by their organisations Contrary to the wide spread perception that spirituality is primarily related to palliative care and has emerged relatively recently within the organisation this study shows that its history is considerably longer and more complex and has been closely connected to the WHO s ethical aspirations its quest for more holistic and equitable healthcare and its struggle with the colonial legacy of international health organisations While such ideals and struggles silently motivated many of the key actors and policies such as the provision of universal primary healthcare which for decades have embodied the organisation s loftiest aspirations the WHO s official relationship with spirituality advanced in fits leaps and setbacks At times creative and interdisciplinary at others deeply political this process was marked by cycles of institutional forgetting and remembering Rather than as a triumph of religious lobbyists this book argues the spiritual dimension of health may be better understood as a ghost that has haunted and continues to haunt the WHO as it comes to terms with its mandate of advancing health as a state of complete well being available to all
