Quality Issues In Ict Based Higher Education

Celia Popovic, David A. Green

Quality Issues In Ict Based Higher Education:

Quality Issues in ICT-based Higher Education Rakesh Bhanot, Stephen Fallows, 2004-11-10 Higher education institutions are becoming increasingly reliant on ICT for providing enhanced teaching and learning and lecturers are adopting new methods of working and ways of teaching with technology all the time. However, without structure and commitment, these changes may not be bringing out the best that ICT has to offer. Providing a wide-ranging account of the quality issues surrounding the use of ICT in higher education, this book develops useful advice and guidance on key areas including devising an institution-wide strategy, developing course materials, providing distance and e-learning courses using ICT-assisted assessment, adopting professional support processes. With authoritative and practical contributions from leading experts in the field, this book will be a valuable addition to the shelves of all those involved in using ICT in higher education: managers, lecturers or education developers. *Quality Issues in Ict-Based Higher Education* Fallows Bhanot Staff, 2004-01-03

Quality Issues in ICT-based Higher Education Stephen J. Fallows, Rakesh Bhanot, 2005 This text provides advice on how to ensure educational quality is maintained when ICT approaches are successfully adopted. It includes contributions from authors around the world who scrutinize the implications for using institution-wide ICT in teaching strategy. *Recent Progress in Data Engineering and Internet Technology* Ford Lumban Gaol, 2012-03-31

The latest inventions in internet technology influence most of business and daily activities. Internet security, internet data management, web search, data grids, cloud computing, and web-based applications play vital roles, especially in business and industry, as more transactions go online and mobile. Issues related to ubiquitous computing are becoming critical. Internet technology and data engineering should reinforce efficiency and effectiveness of business processes. These technologies should help people make better and more accurate decisions by presenting necessary information and possible consequences for the decisions. Intelligent information systems should help us better understand and manage information with ubiquitous data repository and cloud computing. This book is a compilation of some recent research findings in Internet Technology and Data Engineering. This book provides state-of-the-art accounts in computational algorithms, tools, database management, and database technologies, intelligent information systems, data engineering applications, internet security, internet data management, web search, data grids, cloud computing, web-based application, and other related topics. *Developing Effective*

Part-time Teachers in Higher Education Fran Beaton, Amanda Gilbert, 2013 This book, drawing on the voices of part-time teachers and the expertise of those who support them, considers whole institution strategies to promote individual and collective professional development. Amanda Gilbert from Victoria University of Wellington, New Zealand. **Understanding Undergraduates** Celia Popovic, David A. Green, 2012-08-06 Most university teachers have ideas about the typical good or not so good student in their classes, but rarely do they share these thoughts with others. By keeping quiet about the preconceptions or stereotypes they harbour, teachers put themselves at risk of missing key evidence to help them revise their

beliefs more importantly they may fail to notice students in real need of their support and encouragement In this unique work the authors explore UK and US university teachers beliefs about their students performance and reveal which beliefs are well founded which are mistaken which mask other underlying factors and what they can do about them So is it true for instance that British Asian students find medicine more difficult than their white counterparts or that American students with sports scholarships take their studies less seriously Is it the case that students who sit at the front of the lecture hall get better grades than those who sit at the back By comparing students demographic data and their actual performance with their teachers expectations the authors expose a complex picture of multiple factors affecting performance They also contrast students comments about their own study habits with their views on what makes a good learner For each preconception they offer clear advice on how university teachers can redesign their courses introduce new activities and assignments and communicate effective learning strategies that students will be able to put into practice Finally the authors explore the ramifications of teachers beliefs and suggest actions that can be taken at the level of the institution department or programme and in educational development events designed to level the playing field so that students have a more equitable chance of success Ideal for both educational developers and university teachers this book reveals general tendencies and findings that will inform developers own work with university teachers provides practical guidance and solutions for university teachers to be able to identify and address students actual rather than assumed needs explores means of addressing and challenging people s natural tendency to rely on preconceived ideas and stereotypes and explains an action research method that educational developers can use on their own campuses to unravel some of the local preconceptions that may be hampering student success

Cases on Technology Enhanced Learning through Collaborative

Opportunities Mukerji, Siran, Tripathi, Purnendu, 2010-03-31 The collection of cases in the book analyzes and evaluates how organizations and institutions of learning in the developing and developed world are adapting to technology enhanced learning environments and exploring transnational collaborative opportunities Provided by publisher *Technological Transformation of the Indian Education Pedagogy, Policy , And Progress* Dr. Abdul Salam Khan , *Personal, Academic and Career Development in Higher Education* Arti Kumar, 2009-03-04 This book is the first to show how to integrate Personal Development Planning PDP activities into teaching in higher education It is packed with activities exercises lesson plans resources reflective questionnaires skills audits and case studies and with suggestions for how these may be customized to suit different groups of students in different subject areas By embedding activities into the curriculum students are encouraged to engage with the PDP process to help them gain a better understanding of what and how they are learning improve study skills gain a clear idea strengths and areas for development improve ability to explain and discuss skills and abilities with prospective employers with the evidence to support your claims become a more effective independent and confident self directed learner Personal Development Planning will help all staff and educational development professionals

teachers in HE and advisers and support staff in careers services enable students to build up a personal development record to improve their ability to relate their learning and achievements to employers interests and needs and ultimately gain employment

Bridging the Knowledge Divide Stewart Marshall, Wanjira Kinuthia, Wallace Taylor, 2009-04-01 In many international settings developing economies are in danger of declining as the digital divide becomes the knowledge divide This decline attacks the very fabric of cohesion and purpose for these regional societies delivering increased social health economic and sustainability problems The examples in this book will provide leaders policy developers researchers students and community with successful strategies and principles of ICT use in education to address these needs This book will discuss how educational technology can be used to transform education and assist developing communities to close the knowledge divide It will provide comprehensive coverage of educational technology in development in different professions and parts of world The book will provide examples of best practice case studies and principles for educators community leaders researchers and policy advisers on the use of educational technology for development In particular it will provide examples of how education can be provided more flexibly in order to provide access to hitherto disadvantaged communities and individuals
