Quantitative Zooarchaeology Donald K. Grayson, 2014-06-28 Quantitative Zooarchaeology Ethnozooology Romulo Romeu Nobrega Alves, Ulysses Paulino Albuquerque, 2017-10-23 Ethnozooology Animals In Our Lives represents the first book about this discipline providing a discussion on key themes on human animal interactions and their implications along with recent major advances in research Humans share the world with a bewildering variety of other animals and have interacted with them in different ways This variety of interactions both past and present is investigated through ethnozooology which is a hybrid discipline structured with elements from both the natural and social sciences as it seeks to understand how humans have perceived and interacted with faunal resources throughout history In a broader context ethnozooology and its companion discipline ethnobotany form part of the larger body of the science of ethnobiology In recent years the importance of ethnozooological ethnobiological studies has increasingly been recognized unsurprisingly given the strong human influence on biodiversity From the perspective of ethnozooology the book addresses all aspects of human connection animals and health from its use in traditional medicine to bioprospecting derivatives of fauna for pharmaceuticals with expert contributions from leading researchers in the field Draws on editors and contributors extensive research experience and studies covering ethnozooology and ethnobiology Covers all aspects of human animal interaction through the lens of this emerging discipline with coverage of both domestic and wild animal topics Presents topics of great interest to a variety of researchers including those in wildlife conservation biologists ecologists conservationists and domestic related disciplines psychologists sociologists

Archaeological Method and Theory Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and

future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

Near Eastern Archaeology Suzanne Richard, 2003 Filling a gap in classroom texts more than 60 essays by major scholars in the field have been gathered to create the most up to date and complete book available on Levantine and Near Eastern archaeology

Case Studies in Environmental Archaeology Elizabeth Reitz, C. Margaret Scarry, Sylvia J. Scudder, 2008 This book highlights studies addressing significant anthropological issues in the Americas from the perspective of environmental archaeology The book uses case studies to resolve questions related to human behavior in the past rather than to demonstrate the application of methods Each chapter is an original or revised work by an internationally recognized scientist This second edition is based on the 1996 book of the same title The editors have invited back a number of contributors from the first edition to revise and update their chapter New studies are included in order to cover recent developments in the field or additional pertinent topics

Manual of Forensic Taphonomy James Pokines, Steven A. Symes, 2013-10-08 Forensic taphonomy is the study of the postmortem changes to human remains focusing largely on environmental effects including decomposition in soil and water and interaction with plants insects and other animals While other books have focused on subsets such as forensic botany and entomology *Manual of Forensic Taphonomy* is the first update of

Exploring Methods of Faunal Analysis Michael Glassow, Terry L. Joslin, 2012-12-31 How does the practice of archaeology benefit from faunal analysis Michael Glassow and Terry Joslin's *Exploring Methods of Faunal Analysis* Insights from California Archaeology addresses this question Contributors to this volume demonstrate how faunal remains can be used to elucidate subsistence settlement technological systems economic exchange social organization adaptation to variability in resource distribution and abundance and the impacts of historic land use The sheer prevalence of faunal remains in California archaeological sites means that most archaeologists working in the state inevitably must give these resources their close attention and yet methodological challenges remain The chapters in this thoughtfully edited volume tackle these challenges providing strategies for identifying and mitigating sample bias and recommending quantitative techniques borrowed from a variety of disciplines The volume also presents examples that illustrate the use of faunal data to test hypotheses derived from microeconomic theory the applicability of bone and shell chemistry to faunal analysis and the relevance of faunal data to addressing issues in biology

The Archaeology of Class in Urban America Stephen A. Mrozowski, 2006-03-23 An engaging study which looks at archaeological documentary and environmental evidence to explore the factors determining class identity

Farming, Hunting, and Fishing in the Olmec World Amber M.

VanDerwarker, 2010-01-01 The Olmec who anciently inhabited Mexico's southern Gulf Coast organized their once egalitarian society into chiefdoms during the Formative period 1400 BC to AD 300. This increase in political complexity coincided with the development of village agriculture which has led scholars to theorize that agricultural surpluses gave aspiring Olmec leaders control over vital resources and thus a power base on which to build authority and exact tribute. In this book Amber VanDerwarker conducts the first multidisciplinary analysis of subsistence patterns at two Olmec settlements to offer a fuller understanding of how the development of political complexity was tied to both agricultural practices and environmental factors. She uses plant and animal remains as well as isotopic data to trace the intensification of maize agriculture during the Late Formative period. She also examines how volcanic eruptions in the region affected subsistence practices and settlement patterns. Through these multiple sets of data VanDerwarker presents convincing evidence that Olmec and epi Olmec lifeways of farming, hunting, and fishing were driven by both political and environmental pressures and that the rise of institutionalized leadership must be understood within the ecological context in which it occurred.

Settlement and Subsistence in Early Formative Soconusco Richard G. Lesure, 2010-12-31 The Soconusco region, a narrow strip of the Pacific coast of Mexico and Guatemala, is the location of some of the earliest pottery-using villages of ancient Mesoamerica. Mobile early inhabitants of the area harvested marsh clams in the estuaries, leaving behind vast mounds of shell. With the introduction of pottery and the establishment of permanent villages from 1900 B.C., use of the resource-rich estuary changed. The archaeological manifestation of that new estuary adaptation is a dramatic pattern of inter-site variability in pottery vessel forms. Vessels at sites within the estuary were about seventy percent neckless jars (tecomates), while vessels at contemporaneous sites a few kilometers inland were seventy percent open dishes. The pattern is well known, but the settlement arrangements or subsistence practices that produced it have remained unclear. Archaeological investigations at El Varal, a special purpose estuary site of the later Early Formative (1250-1000 B.C.), expand possibilities for an anthropological understanding of the archaeological patterns. The goal of this volume is to describe excavations and finds at the site and to propose, based on a variety of analyses, a new understanding of Early Formative assemblage variability.
