Campbell, Ian Ronald Johnston, 1988 *Eliminating Serious Injury and Death from Road Transport* Ian Ronald Johnston, Carlyn Muir, Eric William Howard, 2013-12-11 The book explodes the myths that currently drive society's view of traffic safety and limit progress in reducing death and serious injury It presents current scientific knowledge in a non technical way and draws parallels with other areas of public safety and public health It uses examples from the media and from public policy debates to paint a clear picture of a flawed public policy approach and offers preventive medicine principles to take the field forward

Road Traffic Injury Prevention Training Manual Dinesh Mohan, Indian Institute of Technology, Delhi, 2006 Road traffic collisions kill about 1.2 million people around the world every year but they are largely neglected as a health and development issue perhaps because they are still viewed by many as being beyond human control Efforts to prevent road traffic injuries are hampered by a lack of human capacity Policy makers researchers and practitioners need information on effective prevention measures and on how to develop implement and evaluate such interventions There is a need to train more specialists in road traffic injury prevention in order to address the growing problem of road traffic injuries at international levels **Position Papers from the Third National Injury Control Conference**, 1992 **Transportation, Traffic**

Recent Advances in Neurotraumatology Norio Nakamura,Takuo Hashimoto,Masaharu Yasue,2012-12-06 The dawn of neurosurgery can be traced back to the first description preserved in the Edwin Smith papyrus 3000 Be which dealt with head and spinal injury In the

course of 5000 years since the first record in Egypt advances in lifestyle and technology have brought about our modern civilized society. However, as a result of civilization, currently the total number of severe head injuries worldwide is believed to exceed 10,000,000 and the number of severe spinal injuries is believed to be more than 75,000 each year. This means that central nervous system injury is not only the oldest topic in neurosurgery but that it is also of critical importance in modern life. Taking these problems into consideration, the International Neurotraumatology Committee was organized in 1965 as an affiliated Committee of the World Federation of Neurosurgical Societies. The first scientific meeting was convened by the Committee in Marseilles in 1970. Nine further meetings were subsequently held in Europe, Africa, and South America. The meeting was first named International Conference on Recent Advances in Neurotraumatology (ICRAN) by Professor Phillip Harris when the scientific meeting was held in Edinburgh in 1982. The tenth meeting (ICRAN 1992) the first one in Asia was held at Karuizawa, Japan, from September 23rd to 26th 1992.
