A. Katz, 1993 This important volume presents a wealth of practical ideas for improving the art of reference librarianship. Reference Service Expertise provides pragmatic ways for librarians to aid patrons, consider reference collections, and how they are employed and assess various technologies in reference work. Dedicated to the idea that reference service is a benevolent desire to help the sometimes puzzled library user, this unique book describes numerous and varied means to that end and encourages reference librarians to become familiar with the multiple resources available in modern libraries. Reference Service Expertise pinpoints specific areas in which librarians can increase their knowledge in order to become more efficient. These strategies include using a systems approach in reference instruction for library professionals, guidelines for academic librarians to use for evaluating facilities, services, and staff as to how effectively they welcome users and validate their information needs, using team teaching to instruct users about library services, developing legal reference skills to support the constitutional right to know in a self-governing society, and helping non-science librarians to become science literate by reading popular science literature, watching science television programs, visiting science museums, and generally increasing their awareness of the problem of science illiteracy among the general population. A wide variety of resources available in today's reference libraries are discussed to help librarians become better informed about the options available to their patrons, including ERIC and NTIS, and the information gap between the two databases, resources on the evolving market economy, or investments in the Commonwealth of Independent States, fee-based services, PsycLIT CD-ROM, PsycINFO online, and the difference in retrieval patterns using the same vocabulary of terms. Interactive media centers, advantages, and shortcomings. Reference librarians in all types of libraries will benefit from chapters that describe specific methods for improving their own personal effectiveness, as well as chapters that evaluate specific services and reference tools available for reference library users.

The Reference Library User William A. Katz, 1990 Provide the best possible service to your library patrons. With a healthy respect for those who seek assistance at the reference desk, a group of library and information service specialists examine the public whom they serve. The Reference Library User focuses on the possible interactions between the reference librarian and the library user. The authoritative contributors discuss many problems in the relationship between the public and the library and all offer suggestions that will at least help librarians to better serve the public on a daily basis. A major emphasis of The Reference Library User is on the various populations using the library and their particular needs. For example, one chapter examines the information needs of deinstitutionalized patrons and presents methods of providing service and a rationale for community outreach. The state program in Rhode Island is outlined, describing efforts to reach community residents through public libraries and the state-operated Bookmobile. Other chapters provide strategies for providing reference services to older adults, the learning disabled, the blind, and the physically handicapped. This informative new volume also deals with general concerns facing librarians today, including determining the audience for both public and academic libraries, educating the user, encouraging nonusers to become library users, and

calming irate patrons Reference librarians will be particularly interested in the problems and solutions discussed in this new volume as will library managers and administrators who will always benefit from a fresh perspective on public service for the library user
