Refinement Of Production Ecological Modernization Theory And The Chemical Industry:

The Refinement of Production Arthur P. J. Mol, 1995 The theory of ecological modernization explains the forces mechanisms and dynamics of environmental reform in modern society Its value is illustrated in the ecological restructuring of the chemical industry on a national and global scale Detailed studies on the paint industry the plastic and polymer sector and the pesticide industry show how and to what extent the environment is becoming a crucial factor in the redesigning of the institutional order of society

Ecological Modernisation Around the World Arthur P.J. Mol, David A. Sonnenfeld, 2014-04-08 The idea of ecological modernisation originated in Western Europe in the 1980s gaining attention around the world by the late 1990s At the core of this social scientific and policy oriented approach is the view that contemporary societies have the capability of dealing with their environmental crises Experiences in some countries demonstrate that modern institutions can incorporate environmental interests into their daily routines Elsewhere economic and political interests dominate development trajectories and environmental deterioration continues challenging the premises of ecological modernisation This volume brings together research on ecological modernisation practices around the world Studies on Western Central and Eastern Europe the USA and Southeast Asia examine the applicability of this approach to advanced industrial countries transitional economies and developing countries respectively Authors critically examine the premises of ecological modernisation theory assess its value for understanding past and present environmental transformations and outline paths for designing future sustainable development Taken together the studies in collected this volume offer significant refinements extensions and critiques of ecological modernisation theory and suggest important directions for future research on social and policy dimensions of environmental change

Ecological Modernisation and Environmental Compliance Shahpar Selim, 2013-02-01 Economic development that is environmentally socially and ethically sound is at the forefront of contemporary debates all over the world This is especially relevant to international trade where goods manufactured in least developed countries LDCs are being exported to developed countries DCs via international supply chains This book looks at Bangladesh s ready made garments RMG industry the seventh largest in the world facing demands for environmental and social management according to standards set by consumers in environmentally progressive societies Apart from these concerns not having found cultural or institutional resonance in Bangladesh the pressures for cost reduction on time delivery and cheap labour in a highly competitive international market make the problem that much more complex In this book Selim uses the analytical framework provided by the ecological modernisation theory to examine the economic communicative and social political aspects of ethical trade and argues that the economy ecology relationship can indeed be a positive sum game if nation states and economic actors change their policymaking styles and greening behaviour to take advantage of scientific evidence and green technological opportunities

Jacques Ellul and the Technological Society in the 21st Century Helena M. Jerónimo, José Luís Garcia, Carl Mitcham, 2013-07-08 This volume

rethinks the work of Jacques Ellul 1912 1994 on the centenary of his birth by presenting an overview of the current debates based on Ellul's insights As one of the most significant twentieth century thinkers about technology Ellul was among the first thinkers to realize the importance of topics such as globalization terrorism communication technologies and ecology and study them from a technological perspective The book is divided into three sections The first discusses Ellul's diagnosis of modern society and addresses the reception of his work on the technological society the notion of efficiency the process of symbolization de symbolization and ecology The second analyzes communicational and cultural problems as well as threats and trends in early twenty first century societies Many of the issues Ellul saw as crucial such as energy propaganda applied life sciences and communication continue to be so In fact they have grown exponentially on a global scale producing new forms of risk Essays in the final section examine the duality of reason and revelation They pursue an understanding of Ellul in terms of the depth of experience and the traditions of human knowledge which is to say on the one hand the experience of the human being as contained in the rationalist sociological and philosophical traditions On the other hand there are the transcendent roots of human existence as well as revealed knowledge in the mystical and religious traditions The meeting of these two traditions enables us to look at Ellul's work as a whole but above all it opens up a space for examining religious life in the technological society

Modernization Science Chuanqi He, 2012-02-18 Depending on their national level of income development and modernization all countries in the world can be generally categorized as either advanced or developing Studies on why advanced countries continue to develop how they maintain their level of development and how developing countries enter into the advanced club fall into the field of modernization science which is an emerging interdisciplinary science This monograph the first English book available on modernization science interprets its concepts methodologies general theories first and second modernization six level specific six field specific and three sector specific modernizations modernization policy and evaluation and the principles and methods of national development since the 18th century It provides clear systematic up to date information on this new discipline with more than 173 figures and 265 tables and covers 131 countries and 97% of the global population A comprehensive outlook on world modernization is presented from a Chinese perspective

China's Role in Reducing Carbon Emissions David Toke, 2017-04-21 China a still developing economy comprising a fifth of the world's population will play a key role in the global movement towards reducing carbon emissions The aims of the Paris Agreement may stand or fall with China both for its own contribution and the example it will set the developing world China's Role in Reducing Carbon Emissions discusses the prospects for China achieving radical reductions in carbon emissions within the context of the current economic and political landscape With a particular focus on technologies such as wind power solar power and electric vehicles Toke examines how China is transitioning to a state of stable energy consumption via a service based economy and heavy investment in non fossil energy sources The book concludes that China may be set to reduce its carbon emissions by approximately two thirds by 2050 This book is a valuable

resource for students and scholars of climate change sustainable development political science and energy as well as energy professionals seeking to understand the implications of recent developments in China

Payment schemes for forest ecosystem services in China J.F. Liang, 2023-09-04 Faced with intensified ecological crisis the Chinese government has sought policy interventions to reverse its forest degradation Among the policy instruments is the Payment for Ecosystem Services PES that aims to transform the pattern of traditional forest management and protection and to encourage forest sustainable use by financial incentive This book provides a policy evaluation on the payment schemes for forest ecosystem services in China It examines PES schemes with respect to ecological effectiveness economic and livelihood impacts participation of local people and the interlinkages with forest tenure reform The evaluation is based on different cases across China's main forested regions The implementation of payment schemes in China shows improvements in forest management and protection and an incentive based governance method is employed instead of command and control New forest use practices are also created to couple local livelihood requirements with ecological conservation In addition local farmers are more and more involved in the implementation of payment schemes Providing a comprehensive assessment of payment policies for ecosystem services in China this book will be of great interest to policy makers and government advisers in China international donor agencies and academics and students with an interest in PES and forest governance

When Green Growth Is Not Enough Anders Hayden, 2014-11-01 Is the pursuit of endless economic growth compatible with the deep reductions in greenhouse gas emissions required to avoid the worst extremes of climate change In *When Green Growth Is Not Enough* Anders Hayden analyzes the political battle between three competing approaches to this question and how it has played out in Canada and Britain Defenders of the business as usual approach reject climate action as too costly and in conflict with economic growth while downplaying the severity of climate change Supporters of ecological modernization or green growth on the other hand aim to use technology and efficiency to delink economic expansion from emissions and find business opportunities through environmental action While mainstream debate has focused on these two pro growth models Hayden pays particular attention to the struggles and limited inroads of a third more radical perspective the idea of sufficiency which challenges the continued growth of production and consumption in the already affluent global North and asks how much is enough Drawing on interviews participation in climate related events and analysis of key documents Hayden shows the role these paradigms have played in Britain one of the world's leaders in climate reform and in Canada a nation at the bottom of international climate change rankings Rich in detail *When Green Growth Is Not Enough* is a lively account of the theory and real world politics of climate action

Environmental Sociology Matthias Groß, Harald Heinrichs, 2010-06-17 Despite being a relatively young sub discipline European environmental sociology has changed considerably in the last decades towards more interdisciplinary collaborations and problem solving Current trends such as global environmental modernization and processes of economic political and socio cultural globalization fuelled by

developments of transport environmental flows scientific uncertainty and information technologies have fostered new conceptual approaches that move beyond classical sociological mind sets toward broader attempts to connect to other disciplines

The Oxford Handbook of Environmental Political Theory Teena Gabrielson, Cheryl Hall, John M. Meyer, David Schlosberg, 2016-01-07 Set at the intersection of political theory and environmental politics yet with broad engagement across the environmental social sciences and humanities The Oxford Handbook of Environmental Political Theory defines illustrates and challenges the field of environmental political theory EPT Featuring contributions from distinguished political scientists working in this field this volume addresses canonical theorists and contemporary environmental problems with a diversity of theoretical approaches The initial volume focuses on EPT as a field of inquiry engaging both traditions of political thought and the academy In the second section the handbook explores conceptualizations of nature and the environment as well as the nature of political subjects communities and boundaries within our environments A third section addresses the values that motivate environmental theorists including justice responsibility rights limits and flourishing and the potential conflicts that can emerge within between and against these ideals The final section examines the primary structures that constrain or enable the achievement of environmental ends as well as theorizations of environmental movements citizenship and the potential for on going environmental action and change

International Encyclopedia of Environmental Politics John Barry, E. Gene Frankland, 2014-02-25 Why care about the environment Is the earth s climate really changing for the worse What are CFCs exactly And who or what is the WTO What are the causes of environmental problems Who are the main actors and what are the main ideas and issues in international environmental politics Which countries have the best worst environmental record and policies The International Encyclopedia of Environmental Politics is the essential reference source to enable all those with an interest in the politics of the environment particularly students and academics working within political science to answer these questions and to explore many other related topics in international environmental politics It will be welcomed as an essential teaching resource and a trusty companion to independent study Written by a team of international experts the Encyclopedia is vital for fact checking provides authoritative initial orientation to a particular topic or issue and will serve as a solid starting point for wider explanation With over 300 fully cross referenced entries many of which are followed with suggestions for further reading the Encyclopedia includes Country and regional entries with country entries giving a concise overview of the history main actors issues and policies related to its environmental politics Normative and ethical dimensions of environmental politics from animal rights social and global justice to deep ecology Environmental movements organizations struggles and actors from local to international levels Issues in international environmental politics such as global warming biodiversity trade and the environment Prominent individuals historical and current who have inspired or been actively involved in international environmental politics such as Mahatma Gandhi Petra Kelly Vandana Shiva and Aldo Leopold Central topics and issues in environmental politics such as global warming

Transnational Buildings in Local Environments Luciana Melchert Saguas Presas, 2017-11-22 By focusing on the skyscraping transnational building this book bridges two key debates on the transformation and emerging problems besetting major cities globalization and ecological and sustainable building design While such structures tend to be constructed and or used by transnational companies and are generally viewed as emblems of a global city they nevertheless impact seriously on their local environment posing numerous environmental burdens on it By examining office blocks held by multinational firms in Amsterdam S o Paolo and Beijing the book analyses how transnational buildings might be made sustainable It compares and contrasts the different social mechanisms that are or may be in place and how sustainable building practices that are being activated in certain locations could be adopted elsewhere

Treadmill of Production Kenneth A. Gould, David N. Pellow, Allan Schnaiberg, 2015-11-17 Schnaiberg's concept of the treadmill of production is arguably the most visible and enduring theory to emerge in three decades of environmental sociology Elaborated and tested it has been found to be an accurate predictor of political economic changes in the global economy In the global South it has figures prominently in the work of structural environmental analysts and has been used by many political economic movements Building new extensions and applications of the treadmill theory this new book shows how and why northern analysts and governments have failed to protect our environment and secure our future Using an empirically based political economic perspective the authors outline the causes of environmental degradation the limits of environmental protection policies and the failures of institutional decision makers to protect human well being

China's Environmental Foreign Relations Heidi Wang-Kaeding, 2021-03-01 Over recent decades China has moved from being a follower towards taking on a leadership role in global environmental governance This book discusses this important development It examines the key role of Chinese interest groups showing how through various domestic dynamics they have influenced how China has approached issues such as climate change and the environment Focusing on examples of multilateral environmental treaties bilateral cooperation and the proposition of alternative norms the idea of China as an ecological civilisation the book provides crucial insights on the evolution of China's approach to international relations and engagement with global environmental governance and contributes to the discussion of what kind of power China is poised to become

Governing Sustainable Energies in China Geoffrey Chun-fung Chen, 2016-06-29 This book examines sustainable energy development in China a non liberal state as a counterexample to conventional wisdom that effective policy outcomes are premised on the basis of decentralized governance The use of sustainable energies as part of the solution for stabilising global warming has been promoted in industrialised countries for the past three decades In the last ten years China has expanded its renewable energy capacity with unprecedented speed and breadth This phenomenon seems to contradict the principle of orthodox environmental governance in which stakeholder participation is deemed a necessary condition for effective policy outcomes

Based upon policy documents news report and interviews with 32 policy makers business leaders and NGO practitioners in selected subnational governments this book examines the politics of sustainable energy in China It engages debates over the relationships among democratic prioritisation environmental protection and economic empowerment arguing that China's quasi corporatist model in the sustainable energy field challenges Western scholars dominant assumptions about ecopolitics

Philosophy, Technology, and the Environment David M. Kaplan, 2017-03-03 Contributions by prominent scholars examining the intersections of environmental philosophy and philosophy of technology Environmental philosophy and philosophy of technology have taken divergent paths despite their common interest in examining human modification of the natural world Yet philosophers from each field have a lot to contribute to the other Environmental issues inevitably involve technologies and technologies inevitably have environmental impacts In this book prominent scholars from both fields illuminate the intersections of environmental philosophy and philosophy of technology offering the beginnings of a rich new hybrid discourse All the contributors share the intuition that technology and the environment overlap in ways that are relevant in both philosophical and practical terms They consider such issues as the limits of technological interventions in the natural world whether a concern for the environment can be designed into things how consumerism relates us to artifacts and environments and how food and animal agriculture raise questions about both culture and nature They discuss among other topics the pessimism and dystopianism shared by environmentalists environmental philosophers and philosophers of technology the ethics of geoengineering and climate change the biological analogy at the heart of industrial ecology green products and sustainable design and agriculture as a bridge between technology and the environment Contributors Braden Allenby Raymond Anthony Philip Brey J Baird Callicott Brett Clark Wyatt Galusky Ryan Gunderson Benjamin Hale Clare Heyward Don Idhe Mark Sagoff Julian Savulescu Paul B Thompson Ibo van de Poel Zhang Wei Kyle Powys Whyte

Electric Mountains Shaun A. Golding, 2021-07-16 Climate change has shifted from future menace to current event As eco conscious electricity consumers we want to do our part in weening from fossil fuels but what are we actually a part of Committed environmentalists in one of North America's most progressive regions desperately wanted energy policies that address the

climate crisis For many of them wind turbines on Northern New England's iconic ridgelines symbolize the energy transition that they have long hoped to see For others however ridgeline wind takes on a very different meaning When weighing its costs and benefits locally and globally some wind opponents now see the graceful structures as symbols of corrupted energy politics This book derives from several years of research to make sense of how wind turbines have so starkly split a community of environmentalists as well as several communities In doing so it casts a critical light on the roadmap for energy transition that Northern New England's ridgeline wind projects demarcate It outlines how ridgeline wind conforms to antiquated social structures propping up corporate energy interests to the detriment of the swift de carbonizing and equitable transformation that climate predictions warrant It suggests therefore that the energy transition of which most of us are a part is probably not the transition we would have designed ourselves if we had been asked
