Development in China Yang Yao, Ho-Mou Wu, 2010-09-13 Between 1978 and 2006, GDP growth in China maintained an annual average rate of 9.7%, meaning the Chinese economy increased by more than twelve times. This was achieved with quite unorthodox approaches to reform and development as China has adopted a gradualist approach to adopting key institutions as well as modifying and experimenting with traditional recipes for economic growth. This collection brings together key researchers in the field from Asia, US, Europe, and Australia to discuss how China has managed to push forward reforms in the face of political resistance, how the Chinese economy has maintained growth within an imperfect institutional environment, and how the Chinese government remains effective when it relinquishes its power to the market. Specific emphasis is paid to the relevance of China's experiences to other developing countries. This valuable contribution to the study of China's economy covers a wide range of topics including the historical foundations of the 30 years of reform, law and development in China, foreign direct investment, poverty reduction, market integration, income distribution, social protection, as well as demographics and population. Reform and Development in China finds both unique elements to the Chinese experience and

elements which can be applied to other developing countries In particular China s gradualism in economic reform strong leadership and emphasis on inclusive development are singled out to be potentially transferable to other developing countries This collection will be of interest to postgraduate students and researchers as well as practitioners in development economics

*Takes Off* Jean C. Oi,1999-05-17 In this incisive analysis of one of the most spectacular economic breakthroughs in the Deng era Jean C Oi shows how and why Chinese rural based industry has become the fastest growing economic sector not just in China but in the world Oi argues that decollectivization and fiscal decentralization provided party officials of the localities counties townships and villages with the incentives to act as entrepreneurs and to promote rural industrialization in many areas of the Chinese countryside As a result the corporatism practiced by local officials has become effective enough to challenge the centrality of the national state Dealing not only with the political setting of rural industrial development Oi s original and strongly argued study also makes a broader contribution to conceptualizations of corporatism in political theory Oi writes provocatively about property rights and principal agent relationships and shows the complex financial incentives that underpin and strengthen the growth in local state corporatism and shape its evolution This book will be essential for those interested in Chinese politics comparative politics and communist and post communist systems      **Land System**
