piece to solve this puzzle **Scenarios for Success** Bill Sharpe, Kees van der Heijden, 2008-07-31 Properly researched and intelligently deployed scenario planning is today's most powerful tool for understanding and preparing for an uncertain future. Yet it remains a niche approach poorly understood by leaders at large. To bring it into the strategy mainstream, leaders need advice on how to turn concepts/scenarios into actions. *Scenarios for Success* delivers a unique and coherent account of the state of the scenario planning art. It is aimed particularly at those trying to implement its findings. Striking a balance between theory and practice, the contributors show how and why the core techniques of scenario thinking have endured and are still valuable, while bringing new tools and processes that keep scenario planning in touch with modern realities.

Organized Complexity in Business Johannes Strikwerda, 2023-02-25 This book explores a most central phenomenon in our contemporary businesses and organization: the growing complexity in business. Economic growth and growth of complexity always have been inseparable, but the last decennia the growth of complexity appears to outrun our growth of knowledge and understanding. For success and continuity, the modern firm in the developing complexity of its markets and societal contexts must have the capacity to master and exploit a commensurate level of complexity in its internal organization. This book is the first of its kind to help the reader to understand the different types of complexity and the different concepts and tools to deal with each of them in business administration, strategy and organization. This book offers the reader a fresh perspective on conventional concepts and tools in the field of business administration and bridges these to new concepts as are being used to exploit new complexities. In the process, the reader becomes familiar with the rich cybernetic concept of information as a basis for the information-based organization and to master big data. With that, complex decision making is clarified and a fresh understanding of the core function of the organization's coordination is offered for those who want to solve the issue of self-coordination. The book provides working examples, but even more, the strongest tool to master and to reduce complexity: a deeper and broader understanding of what is going on beneath the surface of what we experience daily. This book builds on Herbert Simon's hypothesis of simplicity: to use the simplicity of process to deal with the complexity of state.

Values-based Service for Sustainable Business Bo Edvardsson, Bo Enquist, 2008-10-31 This is the first book on the role of values in developing and managing service companies, emphasizing sustainable business. The authors examine the role of values in forming a service culture which creates customer value.

New Business Models and Value Creation: A Service Science Perspective Lino Cinquini, Alberto Di Minin, Riccardo Varaldo, 2013-03-12 The contemporary economic landscape features the prevalence of the service sector in economic systems, the pervasive servitisation of manufacturing innovations in

traditional business models and new value creation models thanks to the new possibilities offered by the web ICT and other enabling technologies In this evolving context this book provides qualified contributions on the topic of service science from a managerial perspective A multidisciplinary perspective is adopted dealing with both the structural technological and dynamic relational aspects of managing complexity In addressing the contribution that service science can make to business value creation this book covers relevant issues such as product servitisation business modelling value cocreation with customers performance measures and the role of ICT It also presents some innovative experiences of management models in service organisations operating in the environmental energy and health care sectors This book aims to enhance the value of the results of research intertwined with the development of a new training curriculum started four years ago at the Scuola Superiore Sant Anna of Pisa Italy with the evolution of the Master in Management of Innovation into the new Master in Management Innovation and Service Engineering MAINS

Handbook of Service Business John R. Bryson, Peter W. Daniels, 2015-04-30 Service business accounts for more than 75 per cent of the wealth and employment created in most developed market economies The management and economics of service business is based around selling expertise knowledge and experiences This Handbook co

The Knowledge Creation Potential of Management Consulting Francesco Ciampi, 2008-06-02 The Knowledge Creation Potential of Management Consulting interprets management consulting from a knowledge perspective and proposes a general conceptual framework for investigating and interpreting that potential To begin with the main dynamics of change that characterize today's demand for management consulting is outlined and it is suggested that firms are becoming increasingly aware of the real cognitive rather than only the economic value generation potential that can be activated through the consulting relationship Also the possible pathways for evolutionary transformation of consulting practices models and roles that consulting firms could follow if they want to take advantage of the important changes that are taking place are looked at Next a definition of management consulting is proposed which aims to identify the distinctive ontological real essential and relatively stable features of this particular service and emphasizes the mainly cognitive nature of its value creation potential Furthermore two approaches to interpreting management consulting are discussed the diachronic approach and the synchronic approach To conclude the theories interpreting knowledge creation processes as knowledge conversion processes are explained and applied to the specific context of management consulting relationships
