*A New Environmental Ethics* Holmes Rolston III,2020-04-28 This Second

Edition of A New Environmental Ethics The Next Millennium for Life on Earth offers clear powerful and often moving thoughts from Holmes Rolston III one of the first and most respected philosophers to write on the environment and often called the father of environmental ethics Rolston surveys the full spectrum of approaches in the field of environmental ethics and offers critical assessments of contemporary academic accounts He draws on a lifetime of research and experience to suggest an outlook and even hope for the future This forward looking analysis focused on the new millennium will be a necessary complement to any balanced textbook or anthology in environmental ethics The First Edition guaranteed to put you in your place Beyond that the Second Edition asks whether you want to live a de natured life on a de natured planet Key Updates in the Second Edition Covers the worsening environmental situation due to actions of the Trump administration including withdrawal from the Paris Agreement and from the U N Framework Convention on Climate Change Includes information on legislation in key U S states e g California and New York aimed to ameliorate the damage done at the federal level Increases coverage of group knowledge group agreement and disagreement and group action in collective environmental ethics as distinguished from individual knowledge and action Examines the deleterious effects of online consumer behavior Explains how a loss of solidarity among a nation s citizens and even a larger solidarity among humanity leads to environmental degradation Offers new analysis of the effects of epistemic bubbles echo chambers and fake news on the behavior of voters and consumers Provides an extended critique of the Anthropocene Epoch and the prospect of geo engineering Earth to become a synthetic environment

**Principles of International Environmental Law** Philippe Sands, Jacqueline Peel, 2018-03-01 This new and fully updated edition of Principles of International Environmental Law offers a comprehensive and critical account of one of the fastest growing areas of international law the principles and rules relating to environmental protection Introducing the reader to the key foundational principles governance structures and regulatory techniques Principles of International Environmental Law explores each of the major areas of international environmental regulation through substantive chapters including climate change atmospheric protection oceans and freshwater biodiversity chemicals and waste regulation The ever increasing overlap with other areas of international law is also explored through examination of the inter linkages between international environmental law and other areas of international regulation such as trade human rights humanitarian law and investment law Incorporating the latest developments in treaty and case law for key areas of environmental regulation this text is an essential reference and textbook for advanced undergraduate and postgraduate students academics and practitioners of international environmental law

*The Long Road to Sustainability* Alexander Gillespie, 2018-02-01 For the last few thousand years humanity has struggled to achieve sustainable development Gillespie sees the problem as multi faceted a three legged stool of economic social and environmental conundrums have stalled the quest for the long term viability of both our species and the ecosystems in which we reside Gillespie moves from the low life expectancy excessive deforestation and wetland drainage of the medieval period through the species loss coal

burning free trade and poor waste management of the seventeenth and eighteenth centuries and to the more recent concerns of climate change unsustainable fisheries and chemical pollutants By delivering a comprehensive examination of human survival over the past millennium Gillespie illustrates that the challenges we face are not new that we now have the means to counter them is International Environmental Law, Policy, and Ethics Alexander Gillespie, 2014-08-21 This second edition of International Environmental Law Policy and Ethics revises and expands this groundbreaking study into the question of why the environment is protected in the international arena This question is rarely asked because it is assumed that each member of the international community wants to achieve the same ends However in his innovative study of international environmental ethics Alexander Gillespie explodes this myth He shows how nations like individuals create environmental laws and policies which are continually inviting failure as such laws can often be riddled with inconsistencies and be ultimately contradictory in purpose Specifically he seeks a nexus between the reasons why nations protect the environment how these reasons are reflected in law and policy and what complications arise from these choices This book takes account of the numerous developments in international environmental law and policy that have taken place the publication of the first edition most notably at the 2002 World Summit on Sustainable Development and the 2012 Rio 20 United Nations Conference on Sustainable Development Furthermore it addresses recent debates on the economic value of nature and the problems of the illegal trade in species and toxic waste The cultural context has also been considerably advanced in the areas of both intangible and tangible heritage with increasing attention being given to conservation wildlife management and the notion of protected areas The book investigates the ways in which progress has been made regarding humane trapping and killing of animals and how in contrast the Great Apes initiative and similar work with whales have failed Finally the book addresses the fact that while the notion of ecosystem management has been embraced by a number of environmental regimes it has thus far failed as an international philosophy **International Environmental Law** United Nations. Transnational Corporations and Management Division, 1993 **UNEP's New Way Forward** United Nations Environment Programme, 1995 **Cultural Norms, War and the Environment** Arthur H. Westing, 1988 The present volume is an outgrowth of a select symposium convened by the Stockholm International Peace Research Institute SIPRI in co operation with the United Nations Environment Programme UNEP in Stockholm 15 18 March 1987 **International Environmental Law in the Asia Pacific** Ben Boer, Donald R. Rothwell, Ross Ramsay, Donald Rothwell, 1998-02-18 The purpose of this book is to assess the development of international environmental law in the Asia Pacific Consideration is given to the impact upon the region of global regional and subregional environmental law An assessment is also undertaken of how certain states and groups of states have responded domestically and within their own subregions to these developments For the purposes of this book the Asia Pacific is defined as essentially the states which comprise East and Southeast Asia Australia New Zealand and the island states of the Southwest Pacific Occasional consideration is also given to the states of South Asia International
