Selected papers on conflict, displacement, learned drives and theory Neal E. Miller, 2023 *Conflict, Displacements, Learned Drives and Theory* Neal E. Miller, 2008-07-01 Continues Learning motivation and their physiological mechanisms Neal E Miller New Brunswick Aldine Transaction 2007 Handbook of Applied Dog Behavior and Training, Adaptation and Learning Steven R. Lindsay, 2013-04-29 Twenty five years of study and experience went into the making of this one of a kind reference Veterinarians animal scientists dog owners trainers consultants and counsellors will find this book a benchmark reference and handbook concerning positive humane management and control of dogs Reflecting the author s extensive work with dogs this book promises thorough explanations of topics and proven behavioural strategies that have been designed tested and used by the author More than 50 figures and tables illustrate this unique and significant contribution to dog behaviour training and learning Learning, Motivation, and Their Physiological Mechanisms Neal E. Miller, 2017-07-28 Neal E Miller s pioneering work in experimental psychology has earned him worldwide respect This second in a two volume collection of his work brings together forty three of Miller s most important and representative essays on learning motivation and their physiological mechanisms They were selected on the basis of their current relevance and their historical significance at the time they were published In order to emphasize the main themes essays on a given topic have been grouped together Learning Motivation and Their Physiological Mechanisms begins when the author first discovered the thrill of designing and executing experiments to get clear cut answers concerning the behavior of children and of rats The first study was one of the earliest ones on the behavioral effects of the recently synthesized male hormone testosterone The second was one of the earliest studies demonstrating the value of using a variety of behavioral techniques to investigate the motivational effects of a physiological intervention The next studies investigated the satisfying and rewarding effects of food or water in the stomach versus in the mouth and the thirst inducing and reducing effects of hyper and hypotonic solutions respectively injected into the brain The last study describes a technique devised for extending the analysis of the mechanism of hunger to the effects of humoral factors in the blood The study is completed with an examination of trial and error learning that was motivated by direct electrical stimulation of the brain and rewarded by the termination of such stimulation Other studies show that the stimulation via such electrodes not only elicits eating but also has the principal motivational characteristics of normal hunger The conclusion deals with a series of experiments that overthrows strong traditional beliefs by proving that glandular and visceral responses mediated by the autonomic nervous system are subject to instrumental learning which can be *Dictionary of Theories, Laws, and Concepts in Psychology* Jon Roelcke, 1998-10-28 Fully cross referenced and source referenced this dictionary contains over 1200 entries consisting of terms concerning laws theories hypotheses doctrines principles and effects in early and contemporary psychological literature Each entry consists of the definition description of the term with commentary followed by a number of cross referenced related terms and by

chronologically ordered source references to indicate the evolution of the term An appendix provides supplementary material on many laws and theories not included in the dictionary itself and will be helpful to students and scholars concerned with specialty areas in psychology

Confirmation Bias in Criminal Cases Moa Lidén, 2023-04-15 In criminal cases practitioners such as police officers crime scene investigators pathologists prosecutors and judges are expected to make decisions that are objective and impartial However research since the 1960 s into so called confirmation bias provides persuasive scientific evidence that humans are unable to do so As flawed investigations and proceedings come to light the importance of undertaking proper bias mitigation measures is clear Confirmation Bias in Criminal Cases takes a multi disciplinary approach to a complex real world issue It lays out the chronology of criminal investigations and proceedings and assesses how bias plays a role in each stage It also offers research based strategies to combat bias such as independent review contextual information management linear sequential unmasking and structured evaluations of the evidence This book is vital reading for anyone involved in the criminal justice system It not only gives a holistic view of the human element of confirmation bias but it also offers strategies for how to address it

Learning As Self-organization Karl H. Pribram, Joseph S. King, 2013-06-17 A year before his death B F Skinner wrote that There are two unavoidable gaps in any behavioral account one between the stimulating action of the environment and the response of the organism and one between consequences and the resulting change in behavior Only brain science can fill those gaps In doing so it completes the account it does not give a different account of the same thing This declaration ended the epoch of radical behaviorism to the extent that it was based on the doctrine of the empty organism the doctrine that a behavioral science must be constructed purely on its own level of investigation However Skinner was not completely correct in his assessment Brain science on its own can no more fill the gaps than can single level behavioral science It is the relation between data and formulations developed in the brain and the behavioral sciences that is needed This volume is the result of The Fourth Appalachian Conference on Behavioral Neurodynamics the first three of which were aimed at filling Skinner s first gap Taking the series in a new direction the aim of the fourth and subsequent conferences is to explore the second of the gaps in the behavioral account noted by Skinner The aim of this conference was to explore the aphorism The motivation for learning is self organization In keeping with this aim and in the spirit of previous events this conference s mission was to acquaint scientists working in one discipline with the work going on in other disciplines that is relevant to both As a result it brought together those who are making advances on the behavioral level mainly working in the tradition of operant conditioning and those working with brains mainly amygdala hippocampus and far frontal cortex
