Century James White, 2023-06-15 Shortlisted for the 2024 British Kuwait Friendship Society Book Prize A wealth of scholarship has highlighted how commercial political and religious networks expanded across the Arabian Sea during the seventeenth century as merchants from South Asia traded goods in the ports of Yemen noblemen from Safavid Iran established themselves in the courts of the Mughal Empire and scholars from across the region came together to debate the Islamic sciences in the Arabian Peninsula's holy cities of Mecca and Medina This book demonstrates that the globalising tendency of migration created worldly literary systems which linked Iran India and the Arabian Peninsula through the production and circulation of classicizing Arabic and Persian poetry By close reading over seventy unstudied manuscripts of seventeenth century Arabic and Persian poetry that have remained hidden on the shelves of libraries in India Iran Turkey and Europe the book examines how migrant poets adapted shared poetic forms imagery and rhetoric to engage with their interlocutors and create communities in the cities where they settled The book begins by reconstructing overarching patterns in the movement of over a thousand authors and the economic basis for their migration before focusing on six case studies of literary communities which each represent a different location in the circulatory system of the Arabian Sea In so doing the book demonstrates the plurality of seventeenth century aesthetic movements a diversity which later nationalisms purposefully simplified and misread *The National Union Catalog, Pre-1956 Imprints*, 1981 *Umara Al-Yamani* Jawād Aḥmad 'Alwash, 1971 **MLA International Bibliography of Books and Articles on the Modern Languages and Literatures**, 1996 Vols for 1969 include ACTFL annual bibliography of books and articles on pedagogy in foreign languages 1969 **Supplementary Catalogue of Arabic Printed Books** British Museum. Stephen Humphreys, 1977-01-01 Upon the death of Saladin in 1193 his vast empire stretching from the Yemen to the upper reaches of the Tigris fell into the hands of his Ayyubid kinsmen These latter parceled his domains into a

number of autonomous principalities though some common identity was maintained by linking these petty states into a loose confederation in which each local prince owed allegiance to the senior member of the Ayyubid house. Such an arrangement was of course highly unstable and at first glance Ayyubid history appears to be no more than a succession of unedifying squabbles among countless rival princelings until at last the family's hegemony was extinguished by two events: 1 a coup d'état staged by the palace guard in Egypt in 1250 and 2 the Mongol occupation of Syria, brief but destructive in 1260. But appearances to the contrary, the obscure quarrels of Saladin's heirs embodied a political revolution of highest importance in Syro-Egyptian history. The seven decades of Ayyubid rule mark the slow and sometimes violent emergence of a new administrative relationship between Egypt and Syria, one in which Syria was subjected to close centralized control from Cairo for the unprecedented period of 250 years. These years saw also the gradual decay of a form of government, the family confederation, which had been the most characteristic political structure of Western Iran and the Fertile Crescent for three centuries and its replacement by a unitary autocracy. Finally it was under the Ayyubids that the army ceased to be an arm of the state and became in effect the state itself. When these internal developments are seen in the broader context of world history as it affected Syria during the first half of the thirteenth century—Italian commercial expansion, the Crusades of Frederick II and St. Louis, the Mongol expansion—then the great intrinsic interest of Ayyubid history becomes apparent. Professor Humphreys has developed these themes through close examination of the political fortunes of the Ayyubid princes of Damascus. For Damascus, though seldom the capital of the Ayyubid confederation, was nevertheless its hinge. The struggle for regional autonomy vs. centralization, for Syrian independence vs. Egyptian domination, was fought out at Damascus and the city was compelled to stand no less than eleven sieges during the sixty-seven years of Ayyubid rule. Almost every political process of real significance either originated with the rulers of Damascus or was closely reflected in their policy and behavior. The book is cast in the form of a narrative describing a structure of politics which was in no way fixed and static but dynamic and constantly evolving. Indeed the book does not so much concern the doings of a group of rather obscure princes as it does the values and attitudes which underlay and shaped their behavior. The point of the narrative is precisely to show what these values were, how they were expressed in real life, and how they changed into quite new values in the course of time.
