The Life of Charles the Great Thomas Hodgkin,2017-12-20 In the gradual transformation of the old world of classical antiquity into the world with which the statesmen of today must deal no man played a greater part than Charles the Great King of the Franks and Emperor of Rome The sharp lines of demarcation which we often draw between period and period and which are useful as helps to memory have not for the most part had any real existence in history for in the world of men as in the development of the material universe it is true that uniformity rather than cataclysm is the rule *Naturanon vadit per saltum* Still there are some great landmarks such as the foundation of Constantinople Alaric s capture of Rome the Hegira of Mohammed the discovery of America the Reformation and the French Revolution which have no merely artificial existence We can see that the thoughts of the great majority of civilized men were suddenly forced into a different channel by such events that after they had occurred men hoped for other benefits and feared other dangers than they had looked for before these events took place And such a changeful moment in the history of the world was undoubtedly the life of the great ruler who is generally spoken of as Charlemagne and preeminently the year 800 when he was crowned as Emperor at Rome
