The International Recording Industries Lee Marshall, 2012-11-12 The recording industry has been a major focus of interest for cultural commentators throughout the twenty first century As the first major content industry to have its production and distribution patterns radically disturbed by the internet the recording industry's content attitudes and practices have regularly been under the microscope Much of this discussion however is dominated by US and UK perspectives and assumes the recording industry to be a relatively static homogeneous entity This book attempts to offer a broader less Anglocentric and more dynamic understanding of the recording industry Its starting premise is the idea that the recording industry is not one thing but is rather a series of

recording industries locally organised and locally focused both structured by and structuring the international industry Seven detailed case studies of different national recording industries illustrate this fact each of them specifically chosen to provide a distinctive insight into the workings of the recording industry The expert contributions to this book provide the reader with a sense of the history structure and contemporary dynamics of the recording industry in these specific territories and counteract the Anglo American bias of coverage of the music industry The International Recording Industries will be valuable to students and scholars of sociology cultural studies media studies cultural economics and popular music studies
