Self-injurious Behavior James K. Luiselli, Johnny L. Matson, Nirbhay N. Singh, 2012-12-06 This volume addresses the topic of self injurious behavior SIB in persons with developmental disabilities Among professionals and the lay public alike there is little debate over the seriousness of self injury its detrimental effects and the need for therapeutic intervention At the same time there are divergent views concerning its etiology and treatment Understanding the causes of self injury for example requires an analysis of biological factors socioenvironmental variables communication competencies and in complex clinical cases the interrelationships among these influences There is also uncertainty with regard to the function of self injury Put simply why would people willingly inflict injury upon themselves Finally although there is little disagreement about the necessity to intervene for self injury clinicians do not make uniform therapeutic recommendations and in fact considerable differences in treatment selection are common This fact is most apparent when one considers the ongoing controversy with regard to aversive and nonaversive programming Our premise for this volume is that a greater understanding of self injurious behavior is dependent upon an empirical research base Theories of causality must be conceptually valid and capable of being evaluated objectively Treatment must be functionally determined operationalized and replicable across personnel and settings For these reasons we have assembled chapters by individuals who are experienced clinicians and researchers in the fields of psychology medicine psychiatry education psychopharmacology and developmental disabilities

Handbook of Clinical Child Psychology Johnny L. Matson, 2023-06-10 This comprehensive handbook explores the many issues affecting children's physical and mental health. Its coverage spans a broad range of topics exploring the history and foundations of clinical child psychology as well as the discipline's theories, research base, ethical and legal implications, and diagnostic systems including the NIMH's Research Domain Criteria (RDoC). The handbook examines family risk factors for children, e.g., parental stress, divorce, and depression, and provides leading edge reviews of cognitive variables, e.g., theories of memory, executive function, theories of intelligence, theory of mind, and cognitive tempo. In addition, it describes methods of assessment including checklists, interviews, and methods of treatment, e.g., cognitive behavior therapy, mindfulness, and family therapy. Chapters focus on assessment of specific diagnostic categories such as depression, anxiety, selective mutism, ADHD, and pediatric topics including chronic pain, childhood cancer, childhood obesity, and toilet training. Finally, the book addresses such emerging issues as gender diversity, social justice, cyberbullying, internet gaming disorder, and the impact of COVID-19. Key areas of coverage include Foundations of clinical child psychology, Cognition and clinical child psychology, Testing, assessment, and treatment methods in child psychology, Neurodevelopmental and pediatric disorders in childhood, Assessment and treatments for challenging behaviors in children, Assessment and treatments for psychopathologies in children. The *Handbook of Clinical Child Psychology* is a must-have resource for researchers, professors, graduate students, clinicians, therapists, and professionals in clinical child and school psychology, child and adolescent psychiatry, social work, public health, pediatrics, as well as special education, developmental psychology, nursing, and all interrelated disciplines. Schroeder, Theodore A. Hoch, 2007-11-02 *Self-Injurious Behavior in Intellectual Disabilities* gives a broad overview of the literature in the area of self-injurious behavior in people with intellectual disabilities, but most of the text is dedicated to the review of the behavioral and biological research in this field. In fact, it is our view that the most promising heuristic approach for the advancement of our understanding of this phenomenon and for its management and treatment is likely the bio-behavioral perspective in which behavior can be studied at the intersection of learning and the biological bases of behavior. We propose an overarching heuristic model which we call the Gene-Brain-Behavior Model of Self-Injurious Behavior that presents a platform to integrate disparate and previously isolated scientific approaches. Written by 3 authors to provide cohesive coverage, *Bridges the gap between psychological behavior and psychiatry. Examines the overlap between intellectual disabilities and developmental disabilities.* **Assessing Psychopathology and Behavior Problems in Persons with Mental Retardation**, 1994-02 A survey of the instruments and methods that are available for assessment of psychopathology and behavior problems in persons with mental retardation.
