## **Self Knowledge And Social Action:**

*Self-knowledge and social action* Obadiah Silas Harris,1974      **Education, Self-consciousness and Social Action**

Krassimir Stojanov,2017-12-15 Education Self consciousness and Social Action reconstructs the Hegelian concept of education Bildung and shows that this concept could serve as a powerful alternative to current psychologist notions of learning Taking a Hegelian perspective Stojanov claims that Bildung should be interpreted as growth of mindedness and that such a growth has two central and interrelated components including the development of self consciousness toward conceptual self articulation and the formation of one's capacity for intelligent social action The interrelation between the two central components of education implies that learning is transformed into education only when it involves the self consciousness and the identity of the learner Since both are grounded in the ethical beliefs and values of the individual transforming learning into education therefore requires that education also address students everyday ethical assumptions as well as their articulation and conceptualization This claim has a number of implications for educational policy and pedagogy one being that learning and teaching in schools are educative only if they have ethical significance for both students and teachers Another implication is that the point of departure for educative teaching becomes the actual everyday ethical beliefs and experiences of the students rather than fixed curricular contents Students encountering with sciences and arts should aim at the conceptual articulation of those beliefs and experiences an articulation which makes individual's rational autonomy and self determination possible Education Self consciousness and Social Action will be of great interest to academics researchers and postgraduate students interested in the philosophy of education It should also be essential reading for anyone engaged in the study of Hegel's work

**Know Thyself** Thomas O. Buford,2011-01-01 *Know Thyself An Essay in Social Personalism* proposes that social Personalism can best provide for self knowledge In the West self knowledge has been sought within the framework of two dominant intellectual traditions order and the emerging self On the one hand ancient and medieval philosophers living in an orderly hierarchical society governed by honor and shame and bolstered by the metaphysics of being and rationalism believed persons gain self knowledge through uniting with the ground of their being once united they would understand what they are what they are to be and what they are to do On the other hand Renaissance and modern thinkers such as Pico della Mirandola Copernicus Descartes Locke and Kant shattered the great achievement of the high middle ages and bequeathed to posterity an emerging self in a splintered world Continuing their search for self knowledge the moderns found themselves faced with the dualism of the emerging self of the Renaissance and the natural world as understood by modern scientists New problems spun out of this dualism including the mind body problem the other minds problem free will and determinism the nature and possibility of social relationships values moral norms and their relationship to the natural and social worlds and the relationships between science and religion Finding self knowledge among these splinters without a guiding orientation has proven difficult Even though luminaries such as Spinoza Berkeley and Hegel attempted to bring order to the sundered elements their attempts proved unsatisfactory We contend that neither order nor the emerging self can adequately provide for self knowledge Since those culturally embodied master narratives lead us to an impasse we turn to social Personalism Self knowledge developed in this book shows how persons in relation to the Personal learn who they are what they are to become and what they must do to achieve that goal It also shows that the achievement of self knowledge is supported by a natural social and cultural environment rooted in trust In this humane and timely discussion Thomas O Buford offers a personalist understanding of self knowledge that avoids the impersonalisms that erode the dignity of persons and their moral life which characterize modern life
