In Bed with the Atlantic

Kitiara Pascoe,2018-09-11

In Bed with the Atlantic is a travel memoir of a young woman Kitiara Pascoe as she goes from never having stepped on a yacht to sailing over 18 000 miles across the Atlantic around the Caribbean and then back in three years with her partner At first she was dogged by doubt a belief that she wasn't a sailor never would be and that she was in no way capable of such an undertaking She believed that the ocean was out to get her that weather needed to be battled with and that she would forever be ruled by anxieties that plagued her Woven into the narrative of the journey's progression are stories from Kit's childhood and life before the voyage explaining her battles with anxiety and the feelings of being lost as a graduate in post recession Britain The book also relays her struggle with reconciling a life of travel with the expectations and experiences of those back home at an age when most

of her contemporaries were starting corporate careers and families In her courage to leave everything she knows behind she learns the history of the islands and their people swims with turtles explores strange cave systems and learns to forage for food straight from the sea But she also encounters hardships like running out of food and water battling against storms trying not to be struck by lightning and discovering the crippling loneliness of sailing an ocean for months on end Sailing back to the UK after three years Kit realises the colossal difference that sailing has made to her life and understanding of the world She ponders how easy it is not to do something to protect ourselves from risks and ridicule and everything that makes us uncomfortable But now appreciates that it is only when we take the risk that we get the reward and that we connect not just with the world at large but also with ourselves **Cruising World** ,1999-01 **Popular Science** ,1985-09 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Cruising World** ,1999-01
