Presidential Framing in the 21st Century News Media Jennifer Rose Hopper, 2017-01-20 The Patient Protection and Affordable Care Act came into existence at a time when the president's ability to lead the public was in question political polarization had intensified and the media environment appeared ever more fragmented fast moving and resistant to control Under such circumstances how can contemporary American presidents such as Barack Obama build and maintain support for themselves and their policies particularly as controversies arise Using case studies of major contests over how key elements of the Affordable Care Act would be framed and analysis of how those frames fared in influential and popular U S news sources Hopper examines the conditions under which the president can effectively shape public debates today She argues that despite the difficult political and communications context the president retains substantial advantages in framing major controversial issues for the media and

the public These presidential framing advantages are conditional however and Hopper explores the factors that help make presidential frames more or less likely to gain hold in the news today More so than in the past an element of unpredictability in this news environment means that in pursuing favorable messaging the president and his surrogates may also generate some unintentional consequences in how issues are portrayed to the public Presidential frames can evolve with unfolding events to take on new meanings and applications a process facilitated alternately by supporters opponents and media actors Still media figures and political opponents remain largely reactive to presidential communications even as some seek to publicize and exploit weaknesses in the administration s narratives A close look at these recent cases casts new light on the scholarly debate surrounding the president s ability to persuasively communicate and challenges conventional wisdom that the 21st century media largely present an unmanageable news environment for the White House Presidential Framing in the 21st Century News Media engages with current events in American politics focusing on the Obama Administration and the Affordable Care Act while also reflecting upon the state of the American presidency the news media and the public in ways that have substantial implications for all of these actors not merely in the present but into the future making it a compelling read for scholars of Political Science Media Studies Communication Studies and Public Policy

Strömbäck,2012-04-05 Opinion Polls and the Media provides the most comprehensive analysis to date on the relationship between the media opinion polls and public opinion Looking at the extent to which the media through their use of opinion polls both reflect and shape public opinion it brings together a team of leading scholars and analyzes theoretical and methodological approaches to the media and their use of opinion polls The contributors explore how the media use opinion polls in a range of countries across the world and analyze the effects and uses of opinion polls by the public as well as political actors

Media Polls in American Politics Thomas E. Mann,Gary R. Orren,2010-12-01 Public opinion pools have become staples of contemporary political reporting and most national news organizations have sophisticated in house polling operations The increased number and quality of polls conducted and reported by the press give the public a chance to help see the agendas of campaigns and define the meaning of elections Yet competition and the need for fast responses to events often lead news organizations to misuse polls in a way that diminishes rather than enhances democracy Polls can shape public opinion as well as describe it they can set the news agenda and influence the coverage of political events in ways hostile to a constructive dialogue between citizens and their leaders In this volume media specialist and well known reporters provide a comprehensive survey of the problems and possibilities of polling by media organizations in the 1990s and beyond Thomas Mann and Gary Orren analyze the strengths and weaknesses of media polls and their impact on American politics Everett Carll Ladd and John Benson discuss the extraordinary growth of polling in news organizations for the past two decades Kathleen Frankovic addresses the tension between the needs of news organizations for quick results and the need to preserve the standards of survey research Henry Brady and Gary Orren examine the most

serious methodological problems with news media polls Michael Kagay explores the sources of well publicized variability in poll findings Michael Traugott considers the complicated question of how polls influence the public and whether their effects are benign or harmful Finally E J Dionne Jr examines media organizations obsession with polls and the impact polls have on reporters The authors offer recommendations for improving the conduct and use of media polls so that citizens can make better informed and enlightened decisions about the public agenda

Media Bias in Presidential Election Coverage 1948-2008 David W. D'Alessio, 2012-03-22 Accusations of partisan bias in Presidential election coverage are suspect at best and self serving at worst They are generally supported by the methodology of instance confirmation tainted by the hostile media effect and based on simplistic visions of how the news media are organized Media Bias in Presidential Election Coverage 1948 2008 by Dave D Alessio is a revealing analysis that shows the news media have four essential natures as journalistic entities businesses political actors and property all of which can act to create news coverage biases in some cases in opposing directions By meta analyzing the results of 99 previous examinations of media coverage of Presidential elections from 1948 to 2008 D Alessio reveals that coverage has no aggregate partisan bias either way even though there are small biases in specific realms that are generally insubstantial Furthermore while publishers used to control coverage preferences this practice has become negligible in recent years Media Bias proves that at least in terms of Presidential election coverage The New York Times is not the most liberal paper in America and the Fox News channel is substantially more conservative in news coverage than the broadcast networks Finally Media Bias in Presidential Election Coverage 1948 2008 predicts that no amount of evidence will cause political candidates to cease complaining about bias because such accusations have both strategic potential in campaigns and an undeniable utility in ego defense

President Trump and the News Media Jim A. Kuypers, 2020-06-17 In President Trump and the News Media Moral Foundations Framing and the Nature of Press Bias in America political communication researcher Jim A Kuypers takes readers on a rhetorical framing tour de force this time incorporating elements of Moral Foundations Theory to investigate the ideological underpinnings of press reports Using a rhetorical version of framing analysis Kuypers analyzes four major speeches by President Trump and compares them with the reporting on those speeches by the mainstream news media The moral foundations of both Trump and the news media are examined to assess their respective moral ideological underpinnings The results turn framing theory on its head by demonstrating how frames do not give rise to moral assessments as previously thought but rather the presence of moral foundations provide moral substance to frames as they are developed and found throughout news coverage The results reveal how journalists inject bias consciously and unconsciously into hard news stories and that their moral foundations act to privilege liberal concerns and denigrate conservative concerns Kuypers conveys how news media framing acted to treat President Trump not as a source of news but as a political opponent while at the same time helping the political opposition of the President By evaluating journalistic practices through the lens of their own published ethical standards Kuypers argues

that contemporary journalistic practices are damaging the American Republic and makes the case for immediate incorporation of viewpoint diversity within news organizations. Scholars of communications, journalism, and political science will find this book particularly interesting.

The Media and Neo-Populism Gianpietro Mazzoleni, Julianne Stewart, Bruce Horsfield, 2003-02-28. Mazzoleni, Stewart, Horsfield, and their contributors analyze the two-way relationship of the mass media and the contemporary phenomenon of extreme right-wing neo-populist political parties which emerged in the closing years of the 20th century across the world. The success of Jean-Marie Le Pen, leader of the neo-populist Front National, in the first French presidential ballot in April 2002 shows that these extremist parties have strong if varying electoral support. Drawn into reporting on the policies and antigovernment critiques of the new parties, the mass communication institutions, especially those engaged in news production, have been challenged by a variety of unconventional but effective political campaign strategies that caused many media professionals considerable challenge. Taking an approach informed by mass communication theory, this book analyzes eight case studies of the interaction of news media dynamics and neo-populism in Austria, Australia, France, Canada, India, Italy, the United States, and the Latin American region against the background of widespread disenchantment with traditional parties and the complacency and cynicism of popularly elected governments. Insights into media responses reveal how dependent on media coverage the neo-populist parties were and how, in many cases, the media were initially unequal to the confronting ideologies of the new parties. Although the news media exploited the new parties, new parties exploited the news media as well in quite shrewd and original ways. This is an important resource for scholars, students, and other researchers involved with political mass communications and right-wing political organizations.

Political Communication Cultures in Western Europe B. Pfetsch, 2013-12-17. Was the 2004 Presidential Election Stolen? Steven F. Freeman, Joel Bleifuss, 2011-01-04 On the afternoon of election day 2004 the world was abuzz with the news exit polls indicated that John Kerry would decisively win the election and become the next president of the United States That proved not to be the case According to the official count the number of votes tallied not necessarily the number of votes cast George W Bush beat Kerry by a margin of three million votes The exit polls however had predicted a margin of victory for Kerry of five million votes Occurrences of vote manipulation vote suppression and outright election fraud were alleged at the local level in many precincts throughout Ohio and other battleground states Where the controversy of the 2000 presidential election had come about as the result of an extremely close race in 2004 the irregularities were widespread and appeared to follow a clear pattern Why then did the Democrats concede the election early the next morning Why has there been no investigation by any major news organization What does it say about our democracy when the slot machine industry is more strictly regulated than our electronic voting machines *Was the 2004 Presidential Election Stolen* analyzes the available data and attempts to answer the question of whether America's sitting president was inaugurated after winning or losing the 2004 presidential race

Statistical Reference Index, 1986 *How the News Media Fail American Voters* Kenneth Dautrich, Thomas H. Hartley, 1999 It is often noted that the public is frustrated with the news media But what do American voters really think about how the media present political information While studies have examined how the news shapes opinions as well as what people respond to and remember this is the first book to provide an in depth analysis of how voters use and evaluate the news media in political elections and the impact these trends have on their use of the news Kenneth Dautrich and Thomas H Hartley performed a four wave national panel survey of voters during the 1996 presidential campaign They found that although voters are profoundly dissatisfied with the usefulness of news in helping them make decisions they are unlikely to stop using the news media or switch media from network news to public broadcasting for instance Thus the media have little incentive to adjust to the needs or wishes of voters Here is an important contribution to the debate about the responsibilities of the news media raging among pundits and policymakers
